

STATISTICS OF CANNING

Bureau of Census Give Figures for Calendar Year 1904.

VEGETABLES HEAD LIST IN VALUE

California's Output is Greatest, with New York Second—Best Sugar Production Makes Rapid Progress.

WASHINGTON, Dec. 7.—(Special.)—The bureau of the census has just published bulletin 18, which contains the reports on the industries of canning and preserving, rice cleaning and polishing, and manufacturing beet sugar.

The quantity of rice and rice products exported during the year ending June 30, 1905, amounted to 294,101,967 pounds, valued at \$2,322,987, while only 59,191,837 pounds, valued at \$1,564,865, were imported.

The manufacture of sugar from beets is comparatively new industry in the United States, but it has progressed with a rapid rate. Statistics for this industry were reported for the first time at the census of 1900.

In the total production for the United States, the largest item was canned vegetables, the value of which was \$45,252,148, or 47.1 per cent of the total.

The establishments in the United States reporting this industry are subdivided into three groups, according to their principal products, as follows:

Fruits and Vegetables. The canning and preserving of fruits and vegetables is by far the most important branch of the industry.

Meats. In the production of canned and preserved fish, in which 27.3, or 13.8 per cent of the total number of establishments were engaged.

Fish. The branch of the industry next in importance was the canning and preserving of fish, in which 27.3, or 13.8 per cent of the total number of establishments were engaged.

Alaska. led in the production of canned and preserved fish. It held that position because of its salmon canneries, the value of the salmon canning in that territory being \$7,638,378.

Massachusetts. led in the production of canned cod, with an output of \$7,512,154 pounds, valued at \$2,111,119.

Rice Cleaning. The cleaning and polishing of rice is carried on in eight states in seventy-four establishments in the industry.

Beet Sugar. The quantity of beets used in the manufacture of beet sugar in 1905 was 2,460,595 tons, valued at \$10,774, while the imports for that year reached 214,360,523 pounds, valued at \$4,569,840.

Meat Curing. The quantity of meat cured in 1905 was 1,928,000 pounds, valued at \$1,232,132. The reports for 1905 showed one woman and four children among the wage earners.

Consumption of Rice. The annual per capita consumption of rice is about .390 pounds for Japan and .290 pounds for some of the provinces of India.

SHAH OF PERSIA IS DYING

Paris Says Report of Death Has Been Received There.

POWERS SCRAMBLE FOR PREFERENCE

Germany Said to Be Striving to Acquire Territorial Advantages in Persia, but Berlin Denies Report.

TEHERAN, Persia, Dec. 8.—The health of the shah today shows that he has made a further slight improvement, but he is still very weak.

LONDON, Dec. 8.—A dispatch received here this morning from Paris announced that it was reported there that the shah of Persia was dead.

Berlin, Dec. 8.—Although the German Foreign office does not believe the shah of Persia is so near death as reported from Teheran, it is well understood that his malady are in the final stages.

Germany is popularly supposed, in Great Britain and France especially, to be pursuing mysterious political objects with the ultimate design of acquiring territorial advantages in Persia.

The activity and enterprise of the German traders led the shah's advisers to suggest the establishment of a German bank in Persia.

Germany is popularly supposed, in Great Britain and France especially, to be pursuing mysterious political objects with the ultimate design of acquiring territorial advantages in Persia.

The utilization of by-products is one of the leading factors in the contest between the use of cane and beets in the manufacture of sugar.

In many European countries molasses and beet sugar are used extensively for cattle food and this use is being developed to a limited extent in this country.

Quantities of beet juice are used in the manufacture of alcohol, and lime cake, which is another by-product of the beet sugar industry, is being employed for fertilizers and in making pigments.

States Making Beet Sugar. The manufacture of beet sugar was carried on in twelve states at the time of the census of 1905.

At the census of 1905 Michigan, Ohio and Wisconsin appeared for the first time among the states engaged in this industry.

The state which had the greatest number of factories in 1905 was Michigan, and of the nineteen factories in that state ten had been established since 1900.

The largest sugar factory in this country and one of the largest in the world is located in California.

A reliable remedy for Croup. With the dry, cold weather of the early winter months, parents of croupy children should be on the alert for ominous symptoms.

Crowds Too Great at Brandeis' Saturday to Give Balloons to All. MORE BALLOONS ALL THE TIME.

Santa Claus Apologizes. To the Boys and Girls of Omaha I want to apologize to you because many of the boys and girls who came with coupons to the Brandeis store Saturday could not get balloons.

PARIS, Dec. 8.—(Special.)—The police have discovered in the rooms of a convicted criminal Sporn a manuscript entitled "The Adventures of an Escaped Convict."

Sporn appears to be something of a philosopher, for the recital of his adventures is interspersed with numerous moral reflections and appreciations on the beauties of nature, written in almost a religious strain.

Sporn is a habitual criminal had been ordered to live for the remainder of his life in the French gulags and he has just been sentenced to a term of years there.

Under the pretext of wishing to start in business as a fish dealer, he obtained a permit to navigate in the Maroni river and bought a large fishing boat.
