FRESH THINGS ON MARKET

Green Stuff in Groceries and Stalls Shows Lec.ded Improvement.

NEW BEETS, POTATOES, TURNIPS, ETC.

Christmas Demand Is Over, but the Supply of Good Things to Est is Not in Any Way Diminished.

There is a decided improvement in the green stuff in the markets and grocery stores, everything having taken on a fresh This is emphasized by the green tops of the new beets, turnips and carrots which have come in this week and are of fine quality. The fruit stands are posttively gorgeous, with their stacks of red apples, oranges and nuts, making in all a combination hard to resist.

New potatoes are the newest offering of the week, having come in Monday, in time for the Christmas demand. They sell for 10 cents a pound. New beets, carrots and turnips are 10 cents a bunch or three bunches for 25 cents; cauliflower sells from 20 to 35 cents a head, head lettuce is 10 and 16 cents a head, endive lettuce 5 and 10 cents a head and leaf lettuce 5 cents a bunch; tomatoes are 20 cents a pound, and, while firmer and better than they were a week ago, they are a little green; wax and string beans are 20 cents a quart, green peppers are 30 cents a dozen, artechokes 20 and 25 cents each, parsley 5 cents a bunch, sednach fo cents a peck, sweet potatoes 40 cents a peck, Irish potatoes 20 cents a peck, 75 cents a bushel; cranberries, 10 and 15 cents a quart; cucumbers, 10 and 15 cents each. Believue celery is in and sells for 5 and 10 cents a stalk.

Practically everything in the way of fruit that refrigerator cars and hot houses could afford was available in the local market for Christmas, including many things seen here. Oranges, navel and Florida, sell from 15 to 30 cents a dozen. and lemons from 20 to 30 cents a dozen. Pineapples are la and 20 cents each; tangerines, 15 cents. Catawba grapes are still cloth that has been wet in vinegar and are as much in demand as ever. Some of basket; Malaga grapes are 20, 30 and 40 in a paper bag and put in a dry place. If cents a pound; Tokay grapes are 15 cents prepared in this manner the cheese will not a pound and kumquats 35 cents a pint box. dry out or mold for a long time. These are the best that have been in the pound.

stores, and the best candled eggs for 25 toilet articles. cents a dozen. This is a decided improvement over the prices of the last month, alum although there is a tendency on the part coals forms a strong cement for joining of some dealers to hold the price at 33 glass and metal together. It is the best cents for the best and 28 cents for the thing for holding glass lamps to

Butter is still up, however, the best package creamery selling for 35 cents a pound and the tub creamery from 25 to 27 cents use warm soapsuds with borax or soda a pound. Oleomargarine sells for 12, 16 and added, scrubbing the bristles with a firm 2º cents a pound.

20 cents a pound; ducks and geese are 12% cally clean is one made of Siberian briscents a pound and chickens from 91 to ties. The old-time hair brush is a lodging 11% cents a pound.

Some Special Recipes. These recipes for special holiday dishes

are by the chef of the Northwestern limited of the Chicago & Northwestern rail-

way:

Bisque of Pigeon a la Hoteliere-Prepare four tender pigeons, cover them with thin bardes of fat pork and roast them. Cool partialiy and remove the largest bones; boil the bones with lard and drippings of rich broth; chop the meat and pound to a puree; put a chopped onlon in a saucepan with two ounces of butter; fry light brown, add a pound of white stale bread previously soaked in cold water and well pressed. Stir a little longer, put in the pigeon meat, mix well, dilute with the broth prepared with bones and drippings, more white broth, and a gill of port wine. Stir and boil ten minutes; skim and rub through a very fine sleve; return to a saucepan, boil, and skim again; finish with a pinch of red pepper and four ounces of butter in small bits; pour in a soup tureen and serve with small squares of fried bread.

Showball Puff-One cup of flour, butter size of an egg, one cup of boiling water; add the butter to the water, and when melted stir in the flour, cooking until the mixture leaves the sides of the pan, then set aside to cool. When lukewarm break in three eggs without beating, mix thoroughly, drop in baking tin about two inches apart and bake in a slow oven twenty-five minutes. Serve with whipped cream.

Tomato Fritters-Beat three eggs, add one pint of strained tomato, and sait and pepper to iaste. Baste this over thick fingers of stale bread until they are thoroughly soaked, then roll them in bread crumbs, and fry in hot fat.

Artichokes Farcie-Closely trim the artichoke all around, blanch and scoop out the choke; stuff the cavity with a farce made of unions, ripe tomatoes, mushrooms and fresh bread crumbs, then braise in the oven.

Things Worth Remembering To keep cheese, wrap it in a clean, fresh

urpasses Any in Euilding of New Lines with Exception of 1888.

OVER SIX THOUSAND MILES OF TRACK

Scarcity of Labor and Inability to Get Material Only Elements that Prevented Much Greater Record.

The year just closing will pass into history as the year of the greatest railroad building in this country since 1888. The ecord for the United States was made in 1887, when 13,000 miles of new main line track was laid, and the following year witnessed the completion of 7,106 miles. Since that time the figures have fluctuated from 1,803 miles in 1895 and 5,786 in 1903. The Railway Age is authority for the statement that but for the scarcity of labor and the difficulty of securing material the year of 1906 would have surpassed the record of 1888. As it was, 6.067 miles of track were

Last March 13,000 miles of new railroad were under contract and since that time contracts for several thousand miles have been awarded. The demand for more

On the line of the Western Pacific the contractors for months have been advertising for 5,000 more laborers, but without much success. This road is now under contract for the entire 929 miles from Salt Lake City to San Francisco, and while over 100 miles of track have been laid on the eastern end, work in Nevada and California has been held back by the lack of [ahachie. workmen. On many other important extensions similar conditions have prevailed for months and the result is that much new mileage which has been planned for completion this year will have to be caried over into 1907

Other roads which have been more fortunate in securing the labor for the work of steel for track laying, and many hundreds of miles of grade have been completed for has been suspended until spring because the mills have been unable to supply the but were hewed and split. steel, says the Railway Age.

States West of Mississippi.

In the states located west of the Mississippi river the new mileage aggregate 4.190, or nearly 70 per cent of the total, and in the states south of the Ohio river and east of the Mississippi river 1,150 mile. were built, leaving 727 miles to be credited to the states north of the Unio and east of which shows a larger mileage than any other group, are located Missouri, Arkansas, Texas, Kansas, Colorado, Indian Territory and Okiahoma. Nearly one-half of the track in this group was laid in the state of Texas, and almost 47 per cent (33) miles) of the mileage in that state was built by the Southern Pacific and the Trinity & Brazos Valley, the latter road being the joint property of the Colorado & Southern and the Chicago, Rock Island & Pacific. The Colorado & Southern has built another line, eighty-four miles long, in Texas, and the Santa Fe has completed fifty-eight miles in the same state.

The completed mileage for the year in the extreme northwest is small considering the vast amount of construction which is under way in that section of the country. But work on many of the important lines under contract has been largely of a preliminary character and the track laying stage has not yet been reached. Although 2.380 miles of new road were completed during the last year in the northwestern states and the Pacific states, larger increase may be expected during the coming year. In addition to the 363 miles of track laid during the last twelve months in Washington. Oregon and Idaho, there are over 1,700 niles of new line under contract in those three states and preparations are being made to start work on several other im-

Milwaukee Coast Line.

While the coast extension of the Chicago, Milwaukee & St. Paul is under contract from Glenham, S. D., to Butte, Mont., 731 siles, and from the Washington-Idaho state line west to Seattle and Tacoma, and while the work of grading has been under way in South Dakota, Montana and Wash igion for the greater part of the year, only thirty-six miles of track have been laid on the eastern end. The plans of the ompany provide for the vigorous prosecu ion of work during the coming year, and by January I, 1908, it is hoped to have the line completed from the Missouri river starting point west to Butte, Mont., and also for much of the distance across Wash ington. The heavy mountain work in western Montana and in Idaho will require a longer time, but it is promised that the

nonths ago it was confidently expected to

of the year, which would have made the

of 389 miles. All these lines will be pushed

emplete all of these extensions by the end

Work of Harriman Roads. The Harriman lines, including the Southern Pacific, the Union Pacific, the Oregon Railroad and Navigation company and the Oregon Short Line, have completed extensions aggregating 379 miles in Texas, Louislana, Nebraska, Kansas, Wyoming, Callfornia, Idabo, Utah, Oregon and Washington, in addition to eighty miles in Mexico; the Santa Fe has laid 357 miles of track on extensions in Louisiana, Kansas, Oklahoma, Indian Territory, Texas, Colorado, New Mexico and Arizona, and the Chicago & Northwestern has completed 344 miles in Wisconsin, Wyoming, South Dakota and Illinois. Some of the other large systems have made additions as follows: Trinity & Brazos Valley (Rock Island and Colorado & Southern), 193 miles in Texas; Great Northern, 175 miles in Canada; Chicago, Milwaukee & St. Paul, 143 miles in South Dakota and Wisconsin: Minneapolis & St. Louis, 128 miles in South Dakota; Soo Line, 129 miles in North Dakota; Rock Island System, 122 miles in Arkansas, Iowa and Indian Territory; Colorado & Southern, 102 tral, 97 miles in Indiana, Tennessee, Kentucky, Alabama, Mississippi and Illinois; Chicago, Burlington & Quincy, 91 miles in Wyoming: Missouri Pacific, 80 miles in Illinois, Arkansas and Louisiana; Southern Railway, 80 miles on various short extensions in several southern states; Norfolk & Southern, 71 miles in North Carolina; St. Louis & San Francisco, 71 miles in

Missouri and Texas. The longest stretch of new road completed has been built by the Trinity & Brazes Valley from Mexia to Houston, ex., 157 miles, in addition to thirty-six iles on the branch from Teague to Wax-

Bridge of Mahogany.

A bridge built entirely of mahogany, said to be the only one of the kind in the world, is in the state of Chiapas, Mexico. The bridge spans the Rio Michol, and its total length, including approaches, exceeds 150 feet, while the width is fifteen feet. It is used by both teams and pedestrians, and, though somewhat rude and primitive in construction, is substantial. None of ninety days or more on which further work the timbers of the flooring were sawed. for in that region there are no sawmills,

SOME USES OF THE BANQUET

Whys and Wherefores of the Merry Habit of Dining Tegether.

ORIGIN OF THE HABIT AND ITS GROWTH

Once a Necessity, it Now Persists as a Ceremonial, but Still Performs a Function More or Less Essential.

This is the season when co-operative new mileage in the state 654 miles instead mastication is most in vogue. Family reunions are brought about under the pretext of satisfying the hunger; the triumphs and misfortunes of our ancestors are memorialized by eating, and moral causes and mining stocks promoted in the same manner. Men who come from the same state come together for a meal, and men who weigh too much add to their weight by a simultaneous effort. The Society for the Relief of the Starving Russians meets for the purpose of collectively spoiling enough costly food to satisfy the nunger of a village of mujiks. As soon as it becomes known that a man has plenty to eat at home he is invited out. The richer he is the more free dinners he gets.

Some speculative philosophers have ventured to predict that as mankind became more civilized eating, like all the other bodily functions, would be performed in private. There are no indications of progress in that direction at present visible The communal meal was never so popular since it has been unnecessary. It has become a ceremonial, and when an institution ecomes a ceremonial it is fastened on humanity forever. Ceremonials are customs that have outlived their usefulness and have therefore become indispensable. miles in Texas and Colorado; Illinois Cen- They are former necessities of life that Origin of the Banquet.

The banquet had its origin in the early, out not the earliest stages of human life, the period in which one of our popular novelists finds his heroes and heroines. So long as man lived on casual meals snatched from bushes and trees there was no reason for communal eating. And when he robbed a bird's nest or caught a fish in his hands his altruistic impulses were not aroused. He hid in the bushes to eat, or at the best shared his prize with his mate and offspring. But when he had risen to the triumph of catching a deer in grapevine entanglement, he could, for the first time in the history of the world, af ford to be generous. He had no colstorage warehouse and preservaline has not been invented. The only way to save the meat was to eat it, and, as he could not do that alone, he called in the neighboring troglodytes to share it with him. The eating bee thus originated prevails to this day, retaining vestiges of its primi tive signification. The barbecued pig or o being more than one family could dispos of, became an excuse for getting togethe Any family chicken, but the sacrifice of so large a bir

polite fiction. The meal is merely an excuse, superfluous but indispensable. Certain people want to get together or the host wants to get them together, and the only practical way is to give them a din-We have been made so wary of each

sa a goose or a turkey involves such a train of leftovers that the host is willing to extend his hospitality. If our dinner in-

vitations retained their original meaning

we would have engraved upon them: "We

are going to have more than we can ent at our house on such a day, and you can

> Whyfore of the Feast. dinner invitation is, of course, a

have some if you come."

other by the exigencies of our civilization that to get acquainted with a man you have to stalk him as you would a deer. You cannot approach a stranger and say to him, "You seem to be my kind of a man. I think it would be to our mutual advantage to become acquainted." That would be altogether too blunt and presumptuous. The more modest and diplomatic way is to assume that you have no more in common than a dependence upon food, and say to him: "I have to eat and you have to eat. Let us eat together. Possibly between mouthfuls we may indulge in a little casual but profitable conversation." By this subterfuge his natural suspicion is disarmed and you sidle up to each other while ostensibly looking in another direction. Head-on collisions are avoided in good society. By mutually agreeing to adopt some such fictitious objective as a dinner, people can travel on converging lines and gradually approach one another, Effect of the Banquet.

We can endure human beings best when they are stuffed. The object of putting a heavy banquet before the speeches is to get the guests in a comatose state, so they will not be bored, or, if they are, they will not know it. When a man has eaten until he can eat no more, he will swallow anything. Food does not stimulate the mind. It withdraws blood from the brain, rendering one dull. To still further stupefy the gorged subjects, narcotics, such as tobacco and alcohol, are used, until it is safe for the speakers to begin. It used to be the custom, as the gospel, according to John, bears witness, to palm off poor wine on the guests at a marriage feast when they were too far gone to know the difference. Nowadays we palm off poor stories when the banqueters are in an uncritical state. The hungry man is critical. You cannot eatch him with old jokes and please him with platitudes. His wits are sharpened by his empty stomach. Fill it and he is tamed. The most successful after-dinner speakers eat sparingly and drink nothing This gives them an advantage over their auditors, who are busy digesting while they are speaking, so anything they say sounds brilliant and plausible. Read the speeches you applauded last night in the morning's paper, when your brain is freshened by sleep, and see what they amount

Thus the common meal, while losing its original purpose, has acquired new functions, and as a means of reuniting reluctant relatives, of promoting acquaintance and of securing a patient hearing for any and all causes, it is a useful piece of social mechanism.-The Outlook.

Equal to the Occasion. The bookkeeper, thinking the boss had rone home for the day, had invited a few friends to assist him in disposing of a

feast that had been brought in from a neighboring restaurant. While the work of demolition was in progress the boss unexpectedly returned. He stood in the doorway and surveyed the festive scene.

the bookkeeper, "and-and help a hungry bunch crunch lunch." "No, thanks," said Mr. Spilker. "I prefer to stand here and watch an idle clerk shirk work."-Chicago Tribune.

"Er-come in, Mr. Spilker," stammered

RELIGIOUS NOTES.

The Methodist cathedral in Manila, which is in process of erection, will seat more than 2,000 people.

Rt. Rev. Henrique da Silva, titular bishop

Rt. Rev. Henrique da Silva, titular bishop of Trajanopolis and uncle to the reigning king of Portugal, is visiting in this country. He came from Lisbon to officiate at the laying of the cornerstone of a new Portuguese church in Providence, R. I.

Rev. Albert Negahnquet of Kansas, now conducting religious labors among his fellow race men in Oklahoma and Indian Territory, is the only living Roman Catholic priest who is a full-blood Indian. Father Negahnquet was born on the Pottawattamie reservation, near St. Marys Kan., in 1877.

Henry G. Davis, the vice presidential candidate, will build a Presbyterian church to cost \$50,000 at Gassaway, W. Va. The Davis Memorial Presbyterian church at Clkins, that state, was built by Mr. Davis or his son, who was drowned off the coast

or his son, who was drowned off the coast of Africa.

A great intersynodical convention for men from the fifteen central synods of the Presbyterian church and the men of the Cumberland synods, together with 100 special representatives from the other synods and foreign fields, is called to meet in Omaha chunry 19 to 21.

Rev. A. J. Burrows, president of Marquette college, Milwaukee, Wis., has received formal approval from Rome for the consolidation of Marquette college with the Milwaukee Medical college. It is expected that the new educational institution will be ready for students in less than two months.

eady for students in less than two months

The "Discovery" of the Soda Cracker

For years the humble soda cracker remained obscure and unappreciated. No one seemed to realize its food value-no one seemed to know that it was one of the most nutritious rations obtainable.

Then one day the soda cracker was "discovered." The NATIONAL BISCUIT COMPANY saw its value if properly presented to the public. They set about to bring its quality to the highest possible standard-the result being Uneeda Biscuit. which are to-day recognized as one of the staple foods of the American people.

Nearly 400,000,000 packages of them have been sold, and the food value of the soda cracker is a settled fact.

Uneeda Biscuit

NATIONAL BISCUIT COMPANY
