DUN'S REVIEW OF TRADE

Volume of Trade Christmas Week Compare Favorably with Other Years.

WHOLFSALF BUSINESS CONTINUES ACTIV.

High Prices Are Maintained in All Classes of Iron and Steel-Big Demand for Cotton Goods

NEW YORK, Dec. 28 .- R. G. Dun & Co.'s Weekly Review of Trade will tomorrow

Christmas week made a favorable com-parison with previous years as to the volume of trade. Retailers stocks of goods have been so well distributed that there remains less than the usual assortment for bargain sales. Wholesale business is good for the season and collections show further improvement. Jobbers are deliverfurther improvement. Jobbers are delivering spring goods in some lines, adding to
the freight congestion, which has not been
relieved except in isolated cases. Manufacturers complain of the light receipts
of fuel and raw material, which has reduced activity at many plants, and there is
also some interruption because of inventories and repairs. On the whole, however, tories and repairs. On the whole, however, there is less idle machinery than is customary at this time. Lack of snow greatly facilitated building operations at many clites and work is making rapid progress, although delayed deliveries of materials retard operations in this industry also. High prices are maintained in all sections of the iron and steel industry, with all departments crowded with work and contracts that run far into the future. Pressure for pig iron is especially severe, partly because of railroad blockades. As current deliveries are interrupted, there is a dis-

THE VALUE OF CHARCOAL.

Few People Know How Useful it is in Preserving Health and Beauty. Costs Nothing To Try.

Nearly everybody knows that charcoal is the safest and most efficient disinfectant and purifier in nature, but few realize its value when taken into the human system for the same cleansing purpose. Charcoal is a remedy that the more you take of it the better; it is not a drug at all, but simply absorbs the gases and impurities always present in the stomach and intestines and carries them out of the

Charcoal sweetens the breath after smoking, drinking or after eating onlone or other edorous vegetables.

Charcoal effectually clears and improves the complexion, it whitens the treth and further acts as a natural and eminently safe cathartic.

It absorbs the injurious gases which collect in the stomach and bowels; it disinfects the mouth and throat from the poi-All druggists sell charcoal in one form

or another, but probably the best charcoal and the most for the money is in Stuart's Charcoal Lozenges; they are composed of the finest powdered Willow charcoal, and other harmless antiseptics in tablet form or rather in the form of large, pleasant tasting lozenges, the charcoal being mixed with honey.

The daily use of these lozenges will soon

position to prevent a repetition of this dificulty by placing larger orders for future
delivery. Railway congestion is still most
disturbing to southern furnaces, while best
reports of prompt shipment are received
from coke ovens, where an unprecedented
output is being handled.
Jobbers are not actively engaged in the
primary markets for cotton goods, and no
sales of size are expected until after inventories have been taken. The feiture of
the market depends on spring business
contains the volume aspected.

ventories have been taken. The festure of the market depends on spring business equaling the voigine expected from the large initial demand. Steadiness of raw cotton is a supporting influence, however. Few developments have appeared in men's wear, woolens, but activity is anticipated after the holidays. No interest is at present shown by purchasers of dress goods. Wool goods continue to develop a little fastern than worsteds, indicating that the trend has probably changed, Prices of cotton yarns are higher, prompt deliveries being so much needed that the mills make higher bios. Prices for packers' hides are firmly maintained and some varieties have risen still higher. Tanners in need of prompt shipments are often compelled to pay a premium. Leather is quiet, but a gratifying improvement is noted in the demand for upper leather, especially calf skins. Most castern shoe manufacturers are making inventories, little attention being given at present to new contracts.

Narrow holiday markets have prevailed for the leading staples of the farm, small changes in prices occurring and no devaluances of significance being recorded.

changes in prices occurring and no developments of significance being recorded. BRADSTREET'S REVIEW OF TRADE

Holiday Suspensions Are of Short Duration. NEW YORK, Dec. 28.-Bradstreet's to serrow will say:

With an unparalleled volume of business With an unparalleled volume of business for 1905, increased by a record holiday trade and a heavy volume of future orders hooked, the commercial and industrial increases of the country look forward with confidence to the developments of 1907.

While many more establishments are closed until after the turn of the year, it a noteworthy that holiday suspensions in the trans and steel textile and various other. is noteworthy that holiday suspensions in the iron and steel, textile and various other industrial lines were of short duration. *Cle owing to the mills being so well sold the steel trade is of the filling order character, and while a cold snap early in the week heined retail trade in acasonable goods, the weather, on the whole has been too mild for the fullest developments. Mency continues firm and active, but easier conditions are looked for after the turn of the new year. Car shortages still prevail, though the situation is somewhat better in such sections as the northwest and parts of the pour south.

One of the most significant features in Richmond

One of the most significant features in the entire s'unation is that consumers are apparently convinced of the permanency of the present high prices, and, as shown by advance orders, are disposed to order ahead with fiberality and confidence.

Buying of one iron for delivery in the second half of 197; is increasing in volume Eastern furnaces are well sold into the chird quarter of 1907. Basic pig flaure largely in the contracts now being placed.

Mest of the business colls for delivery in the second half of 1907, walle the quotations range from \$22 to \$23.55 at furnaces.

Southern pig iron brings \$25 a ton for spot delivery, while \$22 is quoted for the drat quarter, \$1 leas for the second. \$17.50 kg/98.60 for the third and \$18.00213.50 for the more distant delivery. A significant feature is the fact that objects appear disposed to accept the present high level of orices, the feeling in this respect being in the summer, when there was a tendency in question the permanency of bich questions. After the turn of the New Year a very active movement is expected to set in. Demand for steel ralls still keeps up. New business in structural material is not large, but specifications are heavier.

Coke is firm and shipments are heavier.

Coke is firm and shipments are heavier to being for small lots.

Raw sugars at New York have receded to a level corresponding to the quotations wilkesberre.

being mixed with honey.

The daily use of these losenges will soon tell in a much improved condition of the general health, better complexion, sweeter breath and purer blood, and the beauty of it is, that no possible harm can result from their continued use, but, on the contrary, great benefit.

A Buffalo physician, in speaking of the benefits of charcoal Lozenges to all palicatis suffering from gas in stomach and bowels, and to clear up the complexion and purify the breath, mouth and throat; I sing believe the liver is greatly benefits with the daily use of them; they cost but twenty-five cents a box at drug stores, and sithough in some sense a patont preparation, yet I beneve a get more and better charcoal in Stuert's Charcoal Lozenges than in any of the ordinary charcoal todays for a free trial package and set for yourself.
