REFORM IN POLICE RULES

Sermany Shocked at Revelation of Treatment of Reformed Prisoners in Berlin.

BERLIN, Dec. 19.-(Special.)-William Voight has every prospect of having his name handed down in history, not only as the brilliant raider of Koepnick, but also as the pioneer of new humane legislation abolishing the present system of police su pervision of discharged prisoners.

The revelation at his trial of the ex traditionary persecution, which he endured despite the fact that he systematically endeavored to resume an honest career, has aroused such a storm of public indignation and stimulated a strong popular appeal for the abolition or at least radical reform of a system which is universally acknowledged to be barbarous and un

worthy of a civilized country. The national liberal party, which in spite of its name is really conservative, has taken up the matter and will introduce an interpellation in the Reichstag at an early date to demand a pledge from the government to introduce a bill reforming largest recovery growing out of timber the present system.

Mr. Fairchild said: "The matters referred to are probably in connection with the Chicago & North-

western and the St. Paul railroad securities, of which the insurance company held large amounts. Under its by-laws the ompany, it was believed, must remove the stocks from its assets, and it could not sell such large amounts of inactive stocks without serious loss and, apparently, requested the trust company, of which I am president, to take these stocks and hold them until an advantageous sale could be made. The books of the trust company show that these stocks were taken. Subsequently, for some reason the holdings were changed into the form of loans to individuals, and later, I am told, the stocks were sold at a profit of several hundreds f thousand dollars to the policyholders of the insurance company, with no profit or advantage to any other company or in-The transaction occurred long ago and I cannot now be certain about the

BARTHOLDT FOR BOND ISSUE

Missouri Congressman Proposes to Borrow Half Billion for Internal

ST. LOUIS, Dec. 29.-Forty bankers, nanufacturers and jobbers representing the financial interests of St. Louis tendered a dinner at the St. Louis club tonight to Congressman Richard Bartholdt of St. Louis, chairman of the committee of public buildings and grounds of the house of representatives, and an address was delivered by him in which he declared in favor of a national policy of issuing bonds

for internal improvements and especially the waterways, Mr. Bartholdt's announcement was considered especially important in view of the fact that it is made deliberately, and he has been engaged for several weeks in Washington in perfecting the plan which he explained tonight. Mr. Bartholdt said,

Since the civil war every great question which has divided political parties has been a business question pure and simple. Whether desirable or not, it is the trend of the times and from it we have a right to conclude that the political party is most likely to succeed which has been most willing to become an adept in business matters and which now is most willing to champion the cause of the general welfare by promoting the most important business policy which was ever before the country, namely, the policy of internal improvements on a grand scale, including the development of waterways, the erection of public buildings and the improvement of the roads and highways of the country. conclude that the political party is most

ountry.
The government, I insist, should be conrolled by business principles. An issue of or 3 per cent bonds to the amount of 500,000,000 to be distributed over a period \$500,000,000 to be distributed over a period of say ten years, will suffice to complete all great river projects and will forever solve the problem of the continuous and permanent improvement of our great waterways. It is my deliberate judgment that it cannot be done in any other way, and if the gentlemen here present think well of it. I shall draft and introduce a bill to that effect without further delay, I am well aware of the existing prejudice against an issue of honds in time of peace. The prejudice would be justified if the government proposed to borrow money in order to defray its running expenses, but here we contemplate an extraordinary expenditure with an ample reordinary expenditure with an ample re-urn for every dollar and with all the cuarantees of a permanent investment for the lasting benefit of the present, as well as future generations.
