RAILROADS MAKE PROGRESS

Much Building, Betterments and Enlargements on Various Lines.

Enormous Increase in Volume of Traffic Necessitates Expansion of Transportation Facilities on Many Roads.

The enermous increase in the business of the railroads is but a reflex of the great eperity which the entire country is enoring at the present time.

Millions are being spent by the Union Pacific, with two objects in view, to improve the main line and to provide feeders or what is already recognised as the est main line in the country. To enumerate all the improvements would require that goes to make up the great system. Omaha has come in for its share of imovements with the Lane cut off, costing to be built this year and miles of addiin the newly made wholesale and jobbing Vice Freedent and General Manager Fortage purposes. Double tracking is oing put in as fast as the steel may be filt in Wyoming. The line from Lincoln to Marysville is being straightened out and ent off built from Marysville to Topeka, which will give a good line from Omaha to Kansas City as soon as the line from sha to Lincoln, the survey of which has

Increase of Burlington, se increase in business on the Burlington s been phenomenal west of the river, through the northwest line to function with the Northern Pacific at The increase in freight cars led west of the river over the corre- the road is being steadily reballasted and

with the increase in business with some arrived. The increase has been in all commodities as well as in passenger business. Statistics show that 40 per cent more people were handled at the state OMAHA GAINS AS RAILWAY CENTER fair than during any previous fair. New lines have been built from Ashland to Sloux City and from Francie to Worland and immense gravity wards are being built at Lincoln.

Building of Northwestern The Northwestern is building what will eventually be a \$1,000,000 freight depot in the heart of Omaha and building feeders all over the west. During the year the Wyoming & Northwestern line, from Casper to Lander, a distance of 148 miles, has been completed and twelve stations opens. and daily passenger and freight service inaugurated. The Pierre, Rapid City & Northwestern line has been constructed from Rapid City to Wasta, a distance of forty-five miles, and further work is progressing at the rate of one mile a day. From the eastern portion of this line there is ention of almost every line and town approximately sixty miles of track laid. which is also being operated. An extenof twenty-six miles, is completed to within \$4,000,000; new shops to cost \$1,200,000, a two miles south of Burke, or sixteen and commissary, a new headquarters site one-half miles north of Bonesteel, and with a twelve-story headquarters building work is progressing at the rate of onehalf mile per day. This work, as well as tional trackage, considerable of which is that on the Pierre, Rapid City & North- exclusive mail and express have been adwestern railway, will be continued so long strict, made such by the foresight of as the weather will permit. Twenty more locomotives are in service on the Northin securing the lower streets for western lines west of the Missouri river ago, this exclusive of engines in construction service. During the year local service ad and the line is now double tracked as for accommodation of Omaha business has ar as Valley, with hundreds of miles being been installed between Omaha and Oakdale, ariving at Omaha in the morning and re turning after the day's shopping. daylight train from Omaha to Long Pine has been extended through to Chadron and the probabilities are it will be extended on through to Lander this year.

Changes on Wabash. Under the new management of F. A. Delano, who succeeds Joseph Ramsey, the Wabash is paying more attention to have been built in Council Bluffs to accommodate the increase in freight and for ing month last year for January, 6,700; shortened to make a better passenger road.

festivities, showing the people living on in the world. that road were inclined to come to Omaha when the opportunity was offered. The year just passed was a year of

hustling for business with the Chicago President Stickney has still maintained his interest in the Omaha Grain exchange, which was founded on his suggestion, and is always looking to Omaha interests for the bettering of rates in and out.

Rock Island Expands. During the year 1906 the Rock Island has nade extensive improvements in roadway quipment, train service and extensions, the main line, Chicago to Colorado Springs and Denver, having been practically rebuilt and in connection with which several thousand cars of rock ballast were used; the Illinois and Colorado divisions relaid with new and heavier steel. The Missouri division between the Mississippi river and Kansas City has also been re built with new ballast. This work is being continued during the winter months on the Oklahoma divisions, the company using all the laborers they can secure. One hundred and twenty-five locomotives, 100 passenger coaches and several thousand freight cars were added to the equipment during the year. Two new passenger trains and one ded between Omaha and Chicago during the year; one new passenger train in each direction between Omaha and Believille, Kan., one new passenger train in each dinow than during the same period a year rection between Fairbury and St. Joseph; one new passenger train each direction between Kansas City and Dallas, Tex. A new extension between Little Rock, Ark., and New Orleans, La., is now under construction, 200 miles of which have been

completed and in operation. The Illinois Central has been in the lim light because of the acquiring of that road by Harriman and deposing of President Fish. Two moves of importance to Omaha have been made during the year. The freight terminals at Birmingham have been Fort Crook during the year 1906. acquired. Birmingham is one of the three gateways from this territory to the southeast and with the operation of the line to supplies excepting horses, and cover the Birmingham in the spring another outlet expenses of running the department, tran-By the purchase of the Tennesee Central the Illinois Central has come in possession of the line from Hopkinsville to Nashville, expended also for commissary suppli this territory to Nashville, another gate- purchasing commissary of subsistence

been increased and received in accordance increased enormously. Two new passenger ville. The impose of New Orleans hauled Omaha jobbers and embrace food purtrains have been put in service, which will by the Illinois Central to this territory surplus engines. A large number of addi- be a great help to the people living along the have increased over 800 per cent and the partment, but for meats and miscellaneous be built. tional cars have been ordered, but few have line in getting into Omaha. The road had rebuilding of the wharves at New Orleans business beyond expectation during the fall gives that road some of the best wharves Philippines.

> The Milwaukee has been noticeable largely by its extension to the Pacific M. G. Zalinski as chief quartermaster and Great Western, with no new lines built. This line has recently put in reduced rates to South Dakota points, which will give Omaha jobbers a chance to compete in that Thomas Cruse, who is now chief quarterterritory and by other adjustments a large

> > The tonnage from the east to Omaha was 631,837 tons for 1906 and 876,756 tons for 1906. The tonnage of all eastern roads from Omaha was 650,660 in 1906 and 708,410 in 1906. General Prosperity Held Responsible This does not include grain.

ARMY EXPENDITURES LARGE Over Two Million Dollars Spent for Supplies and at Fort

Omaha. The growing importance of Omaha as a military headquarters and disbursing point of relative unimportance and may not b for army supplies is no better demonstrated than in the office of the chief quar- a party had a raised note in his possestermaster of the Department of the Missouri at Omaha. In the further view of the fact that practically all of these sup-

plies and payments for transporation are purchased and made in Omaha adds additional interest to the matter. The total amount of money expended during the year 1906 up to December 25, was \$1,826,-538,04, These expenditures were extended over the several months of the year as follows: January, \$159,180.48; February, \$128,084.61; March, \$166,828.61; April, \$158,492.96; May, \$122,857.48; June, \$137,307.85; July, \$134,416.37;

August, \$123,282.97; September, \$297,483.61; October, \$169,188.86; November, \$129,480.90; December, \$108,935.04. These expenditures do not include about \$300,000 expended by the constructing quartermasters in the rebuilding of For Omaha, and the improvements made a
