Wheat Holds Firm, Though Trade is in Small Volume.

NORTHWESTERN NEWS PROVES FACTOR

Held Stendy by Other Grains-Onts the Center of Specuintive Activity.

OMAHA, January 12, 1907.

Wheat was firm, though the trade was not of large proportions. Northwestern news was something of a factor. Minneapolis reports quite liberal sales from Port Arthur for all rail shipment sast and one of the largest of the export houses reports nine cargoes loading this month at the seaboard for ports other than those made by regular liners. Cash wheat was strong in Kansas City and there appeared to be some ease up in receipts. The cash article was firm locally.

Corn was rather inclined to eastness, though holding duite steady, affected by wheat and oats. Cables came a shade lower. The weather is mild and damp through the belt today, but a sharp drop to seasonable temperatures is forecasted. The cash market is about steady.

The oats pit was really the center of speculative activity. For weeks every advance in the May has been checked by resting orders, but today these were absorbed and proved of much less volume than anticipated. Sample market was strong.

Primary wheat receipts were \$55,000 bush.

strong.

Primary wheat receipts were 555,000 bushels and shipments 182,000 bushels, against receipts last year of 364,000 bushels and shipments of 172,000 bushels. Corn receipts were 500,000 bushels and shipments of 172,000 bushels. Corn receipts were 500,000 bushels and shipments 56,000 bushels and shipments 56,000 bushels and shipments of 657,000 bushels and shipments of 657,000 bushels and shipments of 657,000 bushels and shipments of 658,000 bushels corn, 1,000 bushels wheat, 155,731 bushels corn, 1,000 bushels onto, and flour and wheat equal to 50,000 bushels.

Liverpool closed unchanged to 4d lower on wheat and 4d lower on corn.

Broomball estimates world's wheat shipments at 5,400,000 bushels.

"Country offerings of corn have failen off considerably," says the Exchange Grain company, "solely for the reason that shippers cannot get the cars and do not care to enter into contracts that they may not be able to fill on this account, yet the week's primary receipts will foot up nearly 25 per cent more than last year. They would have overrun largely without doubt could cars have been had."

"Advancing price in Minneapolis will not for the moment bring any more wheat in here," says Watson of Minneapolis. "It is simply physical inability on the part of the railroads to move the stuff. If climatic conditions permit the lines will be opened and cleared as quickly as possible, and every effort will be made to relieve the direction."

CHICAGO GRAIN AND PROVISIONS

atures of the Trading and Closing Prices on Board of Trade.

CHICAGO, Jan. 12.—Heavy snow in North Dakota and western Minnesota was the chief cause of firmness today in the local wheat market, the May option closing at a net gain of %c. Corn was a shade lower. Oats were up 1/2 1/4c. Provisions were 2 1/4c lower to 2 1/4c higher.

The wheat market was dominated almost entirely by the situation in the northwest. Reports from St. Paul were that railroad traffic in certain sections most entirely by the situation in the northwest. Reports from St. Paul were that railroad traffic in certain sections of Minnescia and North Dakota is almost at a standstill because of snow blockades and the official forecast was for additional snow tonight, followed by much colder weather. These conditions seem to favor still smaller receipts of wheat at Minneapolis and Duluth and caused a firmer feeling on the local exchange. With a good demand by commission houses and local buils prices attendity navanced, and the closing quotations were at the highest point of the day. A lively demand for cash wheat at outside markets also atrengthened prices. The market closed firm. May opened unchanged to '4c lower at 76% 57% cand sold up to 75% c. where it closed. Clearances of wheat and flour were equal to 56%,000 bu. Primary receipts were 556,000 bu. gainst 564,000 bu. for the corresponding day one year ago. Minnespolis, Duluth and Chicago reported receipts of 324 cars, against 437 cars last week and 429 cars a year ago. Trading in the corn pit was quite and prices were steady. A leading elevator concern was the principal buyer and pit traders were the chief sellers. Weather conditions throughout the corn belt extended a depressing effect during the last half of the seasion. The close was steady. May opened unchanged to '4c higher at 42% 643% to 643% c. sold off to 43% c. and closed at 45% c. Local receipts were 235 cars, with two of contract grade. Oats were in good demand all day and the market showed considerable strength. Local builla and pit traders were good buyers, the chief cause of the demand being light receipts and an improved demand for cash oats. May opened a shade lower at 36% 93% c. kold off to 43% c. and closed at 55% 036% c. Local receipts were 130 cars.

Provisions were weak early in the day on selling by local holders, who were discouraged by the liberal receipts of live I hops. Later the market became steady on fair buying by packers. At the close May pork was up 1½ c at \$16.16. Lard was off \$240 ca

HOGS-First bids were weak this morning, but there was no trading to speak of on that basis. When buyers and sellers finally got together it was on the basis of a shade better prices then prevalled yesterday. The hogs sold largely at 26.30, as against \$6.27\footnote{Application} yesterday and putting on today, as the hogs today sold practically where they did Thursday. The trade was fairly active at the prevailing prices and the hogs were practically all sold by 10 o'clock in the morning or soon after.

The receipts of hogs this week, while decidedly larger than for the previous week, still show a very considerable decrease as compared with a year ago. The market during the week has fluctuated back and forth to considerable extent. Thus the week started out with a good sharp decline, which was made up on Tiesday and Wednesday. Hogs sold still higher on Thursday, but dropped back again on Friday only to recover the lost ground today. After all the chapges back and forth the week closes with the market on an average about 240 lower than one week ago.

From a Broker

TO INVESTORS:

To invest the savings of a lifetime in something safe, yet in something that will pay a good return, is hard work for the man whose time is occupied with greater things.

That is where the broker steps in. His "greater things" are, investigating, studying, comparing, reading, figuring, and the investor has but to take advantage of his work.

This is Your Opportunity

The Broker Says, "Buy Stocks and Bonds"

There is real estate. All right, but there are the taxes, rents to be collected, abstract to be approved and repairs to be made.

Banks. All right, but the rate of interest is too low for the man of moderate capital. Invest your own money.

Mining schemes. All right, but the chances are ten to one against you that you will pick out a good one. Why guess when you can buy something safe?

The Broker Says, "Buy Stocks and Bonds"

Tour dividend is delivered to your office. When you wish to sell there are no formalities. Domestic corporations are exempt from taxation. You have a ready collateral. There is no attorney to be consulted. No personal attention is required.

Here is where you need the broker's help. Naturally, you have not the time to read the financial papers, study annual reports, make comparison of carnings, locks into physical conditions; that's for the broker to do, and all the broker wants of you is to come to him as your financial physician.

THIS IS HIS OPPORTUNITY

If you want absolute security and a very low rate of interest, we prescribe government and railroad bonds, but if you want a good return, and yet
a safe investment, one that we can call glit-edge, we suggest some public
utility, high class industrial or municipal.

In brief, my policy is to give the man who is getting 4 per cent a safe,
same 6 per cent investment in an established company; to handle securities
that have a market value and are readily convertible into cash.
