C A BREAKS THE STRONGEST CONSTITUTION Rheumatism is caused by a sour, acid condition of the blood, brought

on by chronic constipation, weak kidneys, poor digestion and a general sluggish condition of the system. Because of these irregularities the refuse and waste matters of the body are not promptly expelled, but are left to sour and ferment, producing irritating acids which are taken up by the blood and distributed to all parts of the system. This acrid matter weakens and diseases the blood so that instead of supplying the body with nourishing, healthful properties it deposits the poison with which it is loaded into the muscles, nerves, bones and joints, and Rheumatism gets complete control of the system. Some suffer almost constantly with the disease, while others have intervals of freedom, during which they live in constant dread of the next attack, when an exposure to cold or dampness or some other irregularity will cause the symp-toms to return. If the cause is not removed

Rheumatism will progress and reach a point where it becomes incurable, and the strongest constitution will break down, S. S. S. has been curing Rheumatism for more than forty years.
