I am done experimenting

# I Have at Last the Greatest Invention of This Century. I Can Double the Earning Capacity of Any Steam or Electric Railway in Existence.

It will remodel the whole railroad business. There is not a railroad in this country but that will 36,634 44,408 41,789 27,1%5 sooner or later be compelled to adopt my system, because it is faster, safer, and more economical in operation than any other system.

I absolutely control the next great step forward in the railroad world in my patents. Why? Because steam has run its limit! Steam cannot run a train 100 miles an hour and keep it up. The trolly and present third-rail systems cannot be depended upon for long distances. Their motors are likely to burn out any minute. With my system I can run a train any distance in any kind of weather, without a hitch or breakdown, 80 to 200 miles an hour, with perfect safety. By my system, if a wheel broke or a fall broke, the cars would stay exactly in position on the track. They could not do otherwise. They could not jump the track at any speed. It would be impossible to run my cars off the end of a track into a river

where a bridge is open. My car would stop itself even if the leverman was asleep. I know this whole system to be a success, because I have tried it for two years. During that time millionaires have tried to get control of my system, but I would not let them, because I preferred to protect my own and the other stockholders' investments.

Charles T. Yerkes offered me \$100.000 If I would throw my invention on the scrap-pile and forget it. He did not want to be compelled to change his old cable system. Wall street capitalists have made five different attempts to gain control over the Leffler Electric Sys-

tem, and Wall street generally knows a good thing when they see it. I could not afford to let these big moneyed interests get control. I preferred to go to the smaller investors, to the people who want to make good, safe and sure investments. I have therefore bound myself to this company, and to every stockholder, that I will personally see to it that every man and woman who makes an investment in this com-pany will get a square deal. This is a square deal from start to finish.

My Automatic Signal Service It absolutely prevents collisions. Every-where a car moves it sends signals ahead and behind. It is not affected by storms or any weather condition. My signal sys-tem does not require either hand or mind of man to operate it. No wires or kolos are exposed where storms can blow them down or interfere with them. If through some accident any signal is broken or otherwise put out of commission another signal immediately takes its place. Every train dispatcher or operator on the road can go to sleep and my signals will work perfectly and safely. Even the trainmen have nothing to do with them. There is no forgetting. Every signal works auto-matically. When trains come together too closely, head on or from the rear, an electric bell rings vigorously in the lever-man's cab. any given period, may share equally and proportionately. However, the stock of this Company is only redeemable from funds received, or to be received, as royalties from railroad companies using the patents of this companies using the patents of this com-pany under license, and after proper notice as aforesaid, which may be re-ceived from stocholders direct, or from such of said railroad companies as have received said stock in payment for transportation or otherwise, PRO-VIDED, HOWEVER, no stock shall be redsemed until after May 10th, 1909, except at the option of this Company.

# Points to Remember About the Leffler System Taking the Place of Present Steam Railways.

It does away entirely with locomo-tives, heavy motor cars, electric engines and all other similar heavy and expen-sive machines.

A speed of 80 to 200 miles an hour can be regularly reached and main-tained for any distance.

Runs winter and summer alike. Not affected by ice, snow, grease, dirt, sleet, rain or any other weather condition. Less than one-quarter of the fuel is needed.

Trains can be started and stopped quicker than by any other system and without discomfort to passengers. Power-houses can be placed 200 miles anart apart.

No brakes are required. The stopping is done by reversing the current. there is no flattening of the wheel and consequent jogging of the cars wheels do not grind on the rails to start trains, hence no holes and depressions are made. are made. It is easier on the roadbed and co and practically no repairs will made. is easier on the roadbed and cars,

What has been said regarding over steers would apply equally well to the market on cows and helfers. While buyers have ap-parently wanted everything coming, the receipts have been fully equal to their re-guirements and they have not been forced into active buying through lear of not be-ing able to fill orders. Buyers have scen-ingly been in a position where they could afford to take their time and accordingly have worked leisurely all the week. Thus, while stoady prices nave been maintain.d. the trade has been dul from start to finiorn, bu.....

The 158 6 259 66 257 6 50 SHEEP-Although It was a Saturday there were a few cars reported in today, practically all of them sold before ar-rival. There were three cars of owes that were weighed up at \$5.5 and two cars of the Kling shorn wethers at \$5.00, the say price that they have been bringing all t

share of stock you buy. It means that if you bought 100 shares at the present price you would be tole to get at least \$1,000 by turning your certi-ficate of stock in to us, to be paid from royalty money in our treasury. I don't think you will ever want to sell, because of the enormous dividends we will pay. But if you should be compelled to sell, your certificate would then be worth its full face value.

This Contract Means

that out of the royalties paid by railroad companies using my system this company will pay you full face value for every share of stock you buy.

tract with any construction company hav-

royality money in our treasury. I don't think you will ever want to sell, hecause of the enormous dividends we will pay. But if you should be compelled to sell, hecause of the enormous dividends we will pay. But if you should be compelled to sell, vour certificate would then be worth its full face value.
 This makes it absolutely impossible for any stockholder to be frozen out of the company.
 No Larking Scheme in This
 We have no sideshow companies of branch organizations for the purpose of fooling people, and will have none. All business to be done or contracts performed by, with and for the Leffler Elector.
 Matter the state of the company will not contract with any construction company have

CHICAGO LIVE STOCK MARKET

Cattle, Sheep and Lambs Steady-

It will be understood from this that the sheep and lamb market is in a good bealthy condition, entirely satisfactory to shippers to do is to hold back their stuf-until it is thoroughly fattened and ready for market. If this policy is pursued there is no danger but what present high prices for good kinds will continue. Quotations on killers: Good to choice tamber 57.550; fair to good to choice yearlings, lamb weights, 55; good to choice yearlings, lamb weights, 56 there 50; fair to good yearlings, lamb weights, 56 there 50; fair to good to choice year-lings, heavy weights, 55.5505.50; fair to good to choice of weethers, 55.5505.50; fair to good to choice year-lings, heavy weights, 55.5505.50; fair to good to choice year-lings, heavy weights, 55.5505.50; fair to good to choice year-lings, heavy weights, 55.5505.50; fair to good to choice year-lings, heavy weights, 55.5505.50; fair to good to choice year-lings, heavy weights, 55.5505.50; fair to good to choice year-lings, heavy weights, 55.5505.50; fair to good to choice year-lings, heavy weights, 55.5505.50; fair to good to choice year-lings, heavy weights, 55.5505.50; fair to good to choice year-lings, heavy weights, 55.5505.50; fair to good to choice year-lings, heavy weights, 55.5505.50; fair to good to choice good old wethers, 55.5505.50; fair to good to choice week, 55.5505.50; fair to good to choice good old wethers, 55.5505.50; fair to good to choice good old wethers, 55.5505.50; fair to good to choice good old wethers, 55.5505.50; fair to good to choice good old wethers, 55.5505.50; fair to good to choice good old wethers, 55.5505.50; fair to good to choice good old wethers, 55.5505.50; fair to good to choice good old wethers, 55.5505.50; fair to good to choice good old wethers, 55.5505.50; fair to good to choice good old wethers, 55.5505.50; fair to good to choice good old wethers, 55.5505.50; fair to good to choice good old wethers, 55.5505.50; fair to good to choice good old wethers, 55.5505.50; fair to good to choice good go fair to good g

# Points to Remember About This System for Street Railways.

There are no overhead wires, no third rall, no slot in the street, no under-ground trolley, no obstruction in the street

Can be run faster, safer, easier and more comfortably than any other system known,

It is cheaper to operate, uses a half ess fuel at power-house, is cleaner, surer and quicker in operation than any

Cannot be stopped by sleet or snow cannot be stopped by sleet or snow storms, rain, ice, grease, dirt or any other similar obstruction on the track. It cannot produce electrolysts on water pipes or conduits in ctreets, which is now such a heavy expense to cities under the trolley. It cannot interfere with any other electric wires, requires loss current

electric wires, requires less current than other systems and develops great-

than other systems and develops great-or power. It is all controlled by one lever, and is always under the most absolute con-trol anywhere, and under all conditions. It is noiseless, since there are no gearings, motors or other inachinery to grind, squak or rattle. There are no "burn-outs" of motors, because there are no motors to turn out. It is impossible for man or least to get a shock from an electric current.
