REAL ESTATE

## 4348 Franklin Street \$3,000

Here is a spiendid home for some one looking for a well built house and a good lot in a good neighborhood. This house was built by one of the best of workmen for a home and is complete in every detail. Has reception hall and stairway in oak, parlor, dining room, kitchen, pantry and rear vestibue on first floor and 3 nice bed rooms with large closets on second floor. One bed room has an alcove large enough to make another room. All of the rooms, except the hall, are finished in birch. The basement is divided into fruit room, furnace room and laundry room and has outside reliarway. House has gas and fixtures; fine furnace, open modern plumbing. All the rooms are nicely papered and the house is in splendid condition. Lot 192150 feet, one block from Walnut Hill car line. It would cost \$5,000 to build this house today. Part of this can be paid in monthly payments. Come in today and we will show this place to you.

Hastings & Heyden, 1704 Farnam St., Bee Bidg. (19)—178 12

This iand is worth \$70 per acre in good condition. A snap for party who wishes to milk cows and feed hogs, Address German Land Co., West Concord, Minn. (20)—574 lbx

Oregon. LAND PRODUCES \$600 TO \$1,000 PER ACRE

ANNUALLY.

The city of Mcdford is the heart of the Famous Rogue River Valley. It has 4,000 population, three banks, first-class schools and all modern conveniences. The climate is ideal, no excessive cold, heat or rain. One of the few favored sections of the world where the Newton Pippin and Spitzenberg apple and all varieties of pears reach the highest state of perfection; several orchards here bring annual returns of \$600 to \$1,000 per acre.

There are thousands of acres of this fine orchard land undeveloped, which can be purchased as low as ordinary California alfalfa land.

These lands will produce anything that grows out doors, four crops of alfalfa without irrigation; plenty of water for irrigating when desired. Immense resources in timber, coal, copper and gold, both placer and quarts, as well as farming of all descriptions.

We can offer more undeveloped opportunities for money making than any other section of the United States. For further information and literature address Segretary of Medford Commercial Club, Medford, Oregon. ANNUALLY.

fouth Bakom. ONE MILLION ACRES ROSEBUD LAND SOON to be opened in Tripp county, South Dakots; new and authentic map just out, price, 50 cents, postpaid. Fred Reich-mann, Bonesteel, E. D. (20)—M256 15

Wisconsin. LAND LAND LAND NORTH WISCONSIN FERS YOU A HOME AND

A FORTUNE We'll show you the land at our own expense. We'll make it easy to pay.

This is the most tertile grass region, most promising dairy, stock raising and grain country ever opened for settlement. It is sequa '1 value to any farm in Minnesota or lower Wisconsin. It has been held all these years by big lumber companies, but WE own it now and are ready to sell to the man of small means who will develop his farm. No speculators wanted.

This land in Bayfield and Sawyer countles is covered with a network of railways—five hours from Minneapolis and St. Paul and only ten hours from Chicago—the greatest markets in the world for your product. More favorably located than fowa or Minnesota farms and for only 18.00 to 115.00 per acre on easy payments. Do you realise what this means in dollars and cents to you? Do you realise what it might mean to your family now and in years to come? This is no chance to look upon lightly. It is a clean-cut opportunity—no less—and those whe grasp it will be glad of it. We are ready to show you the whole country and pay the expense if you buy. This is too good to pass up!

Don't wait a minute. Now is the time. Write to us at once and we will show you something in land values that you would never believe could be possible. Write now. Ask for booklet E.

REVIEW OF RECENT BOOKS

Restorative Fower of Nature Told in Stary of "Buff."

PORTER ON MUNICIPAL OWNERSHIP

Some Fletion, but Majority of Books Deal with Actualities of Life and Progress of Man-

"Buff: A Tale for the Thoughtful," by "A Physiopath," describing and illustrating the steps of Buff's progress, as thought, into harmony with the restorative power of nature, will be helpful to many thousands who did not possess a knowledge of the great benefit of careful diet and plenty also the contagious nature of consumption, contending that it arises from wrong living in childhood and youth and the consequont loss of recuperative power. He claims that a perfect physical endowment excesses and living in harmony with one's environment and that the highest montal endowment cannot be secured apart from the highest physical condition, Published by Little, Brown & Co.

"Dangers of Municipal Ownership," by

Robert P. Porter, is the fruit of years of travel, study and observation. It is his position that "trading" is an undesirable element in state and local government, and a menace to progress and to society; that municipal trading is financially unsound, and that an examination of specific public undertakings supports the general argument. He outlines the history of municipal ownership in Great Britain, and sets aspects of the municipal position in that country which have arisen consequent upon an indiscriminate pursuit of the system, with suggestions of the probable effect of the extension of a similar method of conducting public utilities in the United States. While the writer is, frankly, from the title page, an opponent of municipal own-ership as it exists, he presents a vast array of interesting facts and figures to substantiate his position, citing in detail results in specific cases where municipal trading has been tried. A less trained mind and pen might have kept so abstract a subject above the heads of the average reader; but Mr. Porter bas illumined his facts and figures, and the result is a popular, readable and easily understood discussion of the question. The literature in favor of municipal ownership has assumed considerable proportions of late years and been widely distributed; but here is the first full and dependable discussion of the other side. Certainly so authoritative a presentation of reliable facts and figures on so live an issue deserves the reading of est and one of the most valuable and enlightening works on municipal matters of recent years. Published by the Century

Prof. E. W. Hilgard, the author of the mportant treatise on "Soils" published by The Macmillan company, is an eminently receive blds until noon, March 18, for practical scientist. His position as pro-laying about twelve thousand square fessor of agriculture in the University of yards of vitrified brick pavement on California and director of the California six inch concrete base and placing Agricultural Experimental station, is something more than a mere scholastic dis-tinction. In his official capacity he has been repeatedly consulted as to the merits and adaptations of various soils, and his boo a the direct outcome of his experi-J. H. Dousman, book the direct outcome of his experi-City Engineer marily as a text-book, but the author has farmers for a convenient comprehensive reference work on this subject, and it is quite possible that the book will find its largest usefulness in this field.
