CHICAGO GRAIN AND PROVISIONS

Pentures of the Trading and Closing Prices on Board of Trade. CHICAGO, March 15—Constant and heavy liquidation caused sharp declines in grain and provisions here today. At the close wheat for May delivery was down ic. Corn was off 46%c. Oats were to lower, Provisions were down loc to 12%c.

whest for May delivery was down le. Corn was off 46%c. Cats were ic lower. Provisions were down lice to 19%c.

At the opening prices showed moderate advances because of the covering by shorts, who were induced to purchase by the improvement in the Wall street situation. The firmness, however, continued but, a short time. Selling of a general character leveloped before the end of the first quarter hour and continued unabated throughout the day. Prices yielded readily to the selling pressure. A feature of the market das the active selling by commission bouses, which was said to be based upon the reports that no damage has been done in Kansas by the green bug. Record breaking exports for the week from Argentina increased the weakness. The movement in this country also continued heavy, the total receipts being 680,000 bu., against 52,000 bu. last year. The market closed weak, with prices only a shade above the low point. May whent opened 16%c to 15%c and closed at 75%grac. Clearances of wheat and flour were equal to 8,100 bu. Exports for the week as shown by Bradstreis' were equal to 2,00,000 bu. Minneapolis, Duluth and Chicago reported receipts of 62 cars, against 50 cars last week and 25 cars a year ago.

Greater weakness was manifested in corn then in wheat. Local and outside longs as well as cash houses sold freely. Local receipts were more than 100 cars in excess of what had been estimated and reports from Nebraska indicated that the movement will soon be much greater because of an improvement in the car situation. The principal support to the market came from shorts. The close was weak. May corn opened unchanged to 4%c and closed at 45%c. Local receipts were 37 cars, with none of contract grade.

Liquidation was general in the oats pit, especially by the holders of May contracts. The weather was considered excellent force pering work sit there was said to be prospects of an increase in the movement, May oats opened as shade to 4c higher at 40%c to 40%c. declined to 46%c and closed at 16%c. HEAVY BUYING BY BARGAIN HUNTERS

Thousand Shares in Small Lots and This Acts as Support for the Market.

NEW YORK, March 15.—Yesterday's presages of further disaster in the stock market were not fulfilled today. A violent rebound in prices occurred, instead. The change in conditions was outlined before trading began here by the wide advances established in London. Prices opened here in consequence at spasmodic recoveries from the demoralized closing of yesterday. This inviting level of prices attracted very large selling and wild fluctuations, indicating that in some cases deals were hastily closed out which had been carried through yesterday, presumably with difficulty. This realizing shook the market baddy for a time and the violent reaction caused a revival of acute uneasiness. But the support made itself effective again and it became evident that the panicky conditions had subsided. The market remained feverish, but the violence of the fluctuations was in diminishing degree.

The appearance of brokers offices this movining indicated the arrival in the field in force of the class of buyers known in Wall street as "bargain huntera." It is estimated that purchases during the day in amail lets buyers of this kind aggregated several hundred thousand shares. Stocks thus bought go out of the street and appear no more until some distant, period of inflation and excited speculation, when they are added again to the burden that market manipulators of a boom are obliged to care for. Buying of this class in such volume on a single day is rare and formed a positive supporting factor in the market. Much greater was its sentimental effect in reassuring holders of stocks that the frenied selling of yesterday's panie stricken flinging away of stocks. But the readjuatment of sentiment was not achieved without an exertion of large degree of main force in the market. This came in the shape of liberal buying orders distinguished. Of climaban. Total males for the LONDON, March 15.—The supplies of money in the tanrict today were sufficient for the moderate demand. Discounts were firmer. Although three small failures were announced on the Stock exchange this merning, they did not check the more cheerful feeling and improved tendency which commenced with the recovery of Greene to Americans. Comeous led the gilt-edged securities with a rise of a quarter of a point during the morning and advanced further, while better continental news caused a gen-

eral improvement in foreigners. Americans were excited in the morning. Dealers started marking up quotations from partly by dollars at a time and then-fresh and influential buying appeared on the part of psopie who had not dealt in Americans for some time, but who were attracted by the low level. The reports from New York of the possibility of relief from the United States treasury created a favorable impression and with the recovery in Berlin prices at about noon were 2 to 10 points over partly. Later the excitement abated and prices see-sawed, but the noon level wal stendily maintained. In the afternoon trading was active and there were occasionally considerable illictuations, but the market closed firm.
