DUN'S REVIEW OF TRADE

Epring Business Makes Favorable Comparison with Same Peried Last Year.

IRON OUTPUT AT RECORD Domestic Steel Rail Regulrements

Supplemented by Large Orders from South America and Japan.

NEW YORK, March 15.—R. G. Dun & Co.'s Weekly Review of Trade will say:

Spring trade is making a most favorable comparison with the volume this time last yeaf, except in a few sections where the weather is still unfavorable, and mercantile collections improve steadily despite the high money market. Leading industries have orders covering production well into the future, especially cottom factories and steel mills, while the output of pig iron when the month opened was close to the largest on record. High prices in the footwear industry have checked placing of contracts for fall shoes at New England factories, some decline in prices of hides and leather encouraging buyers to delay ordering the finished product, but most mills are still busy on spring goods.

Prices are well maintained in all sections of the iron and steel industry, premiums being frequently offered for prompt delivery, but orders are seldom accepted on these terms because of the oversoid condition of mills and furnaces. There is a nominal difference of about 14 per ton between spot and third quarter business and Bearcely any sales are made at the higher figures because little iron is available for prompt shipment. Demestic steel rail business is supplemented by large requirements by South America and Japan that may be filled in this market if satisfactory deliveries can be arranged.

Textile mills are producing at a remarkable rate without threatening any accumulation of atocks and advanced prices for cotton goods have not checked demand. Premiums above regular quotations are willingly paid for early shipments. Most jobbers have not provided for all the spring trade, but others will not be able to meet the requirements of customers. This is especially the case with western jobbers, who still receive liberal orders.

In woolens a fair renewal trade is apparent in many lines of men's fabries, but the market is irregular. New lines of dress goods are being brought out and the cutting up trade is the most active factor. Leather is more quiet, stocks NEW YORK, March 15 .- R. G. Dun & Co.'s Weekly Review of Trade will say:

velopment of trade in fall shoes. Prices of hemical sole leather remain unchanged, bids at 25 cents for middleweight hemical thirds being rejected, but supplies expand. A smaller demand for belting butts has weakened quotations and trade in upper leather is backward, except for calfskins. Domestic hides are dull, prices showing a downward tendency.

Prices of grain were well maintained in view of the official report of farm reserves on March I that showed the unprecedented total of 205,485,000 bushels of wheat, 1,283,000,000 bushels of corn and 348,461,000 bushels of oats.

There was no change in the cotton situa-tion. Advance in price started liquidation that caused a sharp decline.

BRADSTREET'S REVIEW OF TRADE

Increased Complaints of Short Stocks Come from Many Points. NEW YORK, March 15 .- Bradstreets to

Spring business has further expanded, jobbing operations being maintained at a volutine equal to or exceeding last year, while trade has felt the stimulus of the approach of Easter and the appearance of springilke weather. Increased complaints as to short stocks in some lines, notably dry goods, come from many points and glow deliveries are still complained of. Industry is active, except where, as in the flooded section of the Ohio valley, mill operations are restricted. While business is large, there is claimed to be no tendency to gurchase beyond legitimate requirements, and the prospects favor active demand and a large turnover.

preparations are progressing under layorable soil conditions for a large cotton
acreage.

In the pig iron market buyers and sellers
seem to be maneuvering for position as
regards prices, and while little new business has been placed, except in the Birmingham district, the undertone appears
to be stronger. Production in February was
below that of January, but the daily output during the first named month increased
somewhat over January, the largest part
being furnished by the leading interest,
and not by the merchant furnaces, whose
product has the most influence on the open
market. All finished lines are very active,
with specifications coming in freely. Pipes
and tubes are in brisk request and the
leading interest has withdrawn prices and
notified the trade that no orders will be
taken for shipment this side of June 1.
Sheet and tin plate mills were never so
rushed and fancy premiums prevail.

In the wool market firmness prevails and
interest conters in foreign grades, arrivals
of which are very heavy. Stocks of domentic wool are very small, though sales
thereaff are of moderate proportions. The
mills are still running on worsteds and
therefore staple wools are in good demand.

S.S.S. PURIFIES

As every part of the body is dependent on the blood for nourishment and strength, it is necessary that this vital fluid be kept free from germs, impurities and poisons. As long as it remains uncontaminated we are fortified against disease and health is assured; but any humor or impurity acts injuriously on the system and affects the general health, or culminates in some special blood disease. Pustular cruptions, pimples, rashes and the different skin affections show that the blood is in a feverish and diseased condition as a result of too much acid, or the presence of some irritating humor. Sores and Ulcers are the result of morbid, unhealthy matter in the blood, and Rheumatism, Catarrh, Scrofula, Contagious Blood Poison, etc., are all deep-seated blood diseases that continue to grow worse as long as the impurity or poison remains in the circulation. Some persons are born with an hereditary taint in the blood and we see the effect manifested in various ways. The skin has a pallid, waxy appearance, the eyes are weak, glands in the neck often enlarged and usually the body is not fully developed or strong, because it has always been fed on weak, impure blood. In all blood troubles S. S. S. has proved itself a perfect remedy. It goes down into the circulation and removes all poisons, humors, waste or foreign matter, and makes this stream of life pure and health-sustaining. Nothing reaches inherited blood troubles like S. S. S.; it removes every particle of taint, purifies and strengthens the weak, deteriorated blood, supplies it with the healthful properties it needs and establishes the foundation for good health. Rheumatism, Catarrh, Scrofula, Sores and Ulcers, Skin Diseases, Contagious Blood Poison and all blood diseases and disorders are cured permanently by S. S. S. It is made entirely of roots, herbs and barks, and is the King of all blood purifiers. Book on the blood and any medical advice desired THE SWIFT SPECIFIC CO., ATLANTA, GA.

Dish, one of the new pitchers, formerly belonged to the Detroit team in the American league. While still the property of Detroit, he was loaned to the Evansville team in the Central league, where he made a great record. He was the one good pitcher on the team and kept the Evansville team well up in the race. On days when he was not pitching he would be placed in the outfield, where his hitting would break up games many times. " Moore and Kelsey are former Texas leaguers and were bought from Texas teams last season. Moore is counted as a comer, as he is big and has all kinds of smoke and curves. He is also a good hitter. Kelsey is a good backstop and was considered one of the best men in the Texas league last summer, Shortly after Cooley had closed the offer for these players the St. Paul team was

Connie Mack has asked for walvers on Jimmy Burke. This means that the former manager of the Cardinals will return to Kansas City. Mack drafted Burke at the close of last season. There was a good deal of talk that Connie secured the infielder to plug up a hole at third base. He evidently thinks that Jimmy is not of major league callper or else he would not seek to let him out of the American league.

Comiskey will raise the tariff on his grounds. He will cover the first-base bleachers and charge 50 cents for them, and will build a new bleacher in the outfield, besides increasing the capacity of the grounds by 2,000, a total increase of 5,000, making the capacity of the grounds

Subsidized sporting papers that come out every week with their columns filled by the highest bidder and his stool pigeons are aggravating the situation between base ball managers and "star players" who are not getting their worth in salaries and are holding out for it. These papers, which get their news service for free passes and thrive off the subsidy, studiously labor to spread the false doctrine that high salaries cannot be afforded, blinded by the fact that they are the logical outcome of the unprecedented revenues of the managers.

IOWA-NEBRASKA GAME IN THE AIR

Board of Control Will Consider Foot Ball Matter Wednesday;

Board of Control Will Consider Foot
Ball Matter Wednesday:

IOWA CITY, Ia., March 15.—(Special.)—
Whether the action of the State University
of Nebraska in refusing to adopt the threeyear playing rule for athletes will result
in the cancellation of the Iowa-Nebraska
game scheduled for nex fall the local university authorities are unwilling to state.
The Hawkeye management has been willing to waive other rules of the western
conference in the past, but the general
opinion has been established during the
last three months that Iowa would insist
on a strict adherence to all of the eligibility rules. The matter will probably come
up for decision at the meeting of the Board
of Athletic Control on Wednesday of next
week, after which meeting it will be possible to announce what Iowa expects to do.
Last season the state university waived the
limited games and training table rule when
contracting with the State Agricultural
college for a game, but the Aggies were
held to a strict interpretation of the eligibility rules, in order to make the game fair
on both sides. It is for this reason it is
boliseed that the state university will be
unwilling to play the Nebraska eleven in
the event that the Cornhuskers insist on
playing their freshmen.

At the State University of Iowa the base
ball schedule for the coming season has
been approved, and Lesite Story, formerly
a stan player on the State University of
Iowa, but last year coach of the Cornell
college team at Mount Vernon, has been
employed as a coach. The base ball men
are working in the symnastum daily now
under the direction of Catiln, and Story
is expected to take charge of the men as
soon as they are able to go out on the
diamond. The following games are to be

the Krugs won in an extra frame, and the last was nearly even up to the last frame. The Krug boys made a spectacular finish, four of them putting three strikes in the tenth frame. Marble had the high single game and total, with 216 and 624. Scores:

tional Base Ball commission today disallowed the claim of Pitcher Ruelbach of the Chicago Nationals that he is a free agent in base ball and at liberty to sign wherever he pleases. Ruelbach claimed that his last year's contract was only for one year and that as he was tendered no contract to sign for this year the Chicago club no longer has any claim on his services. The commission decided that his contract is for three years.
