The proposed law which has been introduced in congress is in no sense experimental. It is based on the best and most successful precedents, as, for instance, and the recent Cunard contract with the British government. As far as South America is concerned, its aim is to provide from the Atlantic and Pacific coasts bettes American lines to the great ports of South America than the present European lines. The South American republies now see only our warships. Under this bill our trade friendship will be evident to them. The bill proposes to build large-sized steamers of sixteen-knot speed. The bill provides for fourteen steamships, subsidized to the extent of over 1,500,000, from the Atlantic coast, all to run to South American ports. It provides on the Pacific coast for twenty-two steamers, subsidized to the extent of 2,550,000, some of these to run to South America, most of them to Manila, Australia and Asia. Be it remembered that while the ships will be owned on the coasts, the cargoes will largely be supplied by the interior, and that the bill will benefit the Mississippi valley as much as it benefits to be a expected from our trade with South America. The lines to the orient are also of vital importance.
