of different reservations, as per schedules,
detailed specifications, conditions to be observed by bidders, etc., which will be furnished on application to the Indian Office,
Washington, D. C.; the U. S. Indian warehouses at New York City, Chicago, Ill.,
Omala, Neb., St. Louis, Mo., and San
Francisco, Cal.; the U. S. Indian agents at
Standing Rock agency, Lower Bruie, agency,
Lower Bruie, S. D., Rosebud agency, Rosebud, S. D., Cheyenne River agency, Cheyenne agency, S. D., and the "suerritendents" "The weather outlook for the coming summer" said Forecaster Weish in his office Monday in reply to a question. "The temperature during the coming summer will be higher than during the winter just closing. We will have warm weather in July and August. There will be rain at various times. Thunder will be heard and lightning seen. I may even venture the as-

next December." Colonel Welsh, having made this sibylline utterance, smiled benignly upon the

sertion that there will be some cold days

interviewer and continued: "Seriously speaking, long range forecasts are not in my line. In fact, none of them is reliable in the least. There are several men in the United States who make a good living out of gullible people who awallow the dope prepared for them in the shape of forecasts for a year shead.

Crow Creek, S. D.; Rosebud agency, Rosebud, S. D.; Cheyenne River agency, Cheyenne agency, S. D., and the superintendents of the Santce agency, Santee, Neb., and Fort Peck agency, Poplar, Mont. Bids upon the blanks furnished are not absolutely essential; they may be made in any other form, provided the conditions are observed. For further information apply to F. E. LEUPP. Commissioner. 'How is it done? It is done with the statistics of the weather bureau and the aid of a Jim Crow astronomer. The long served. For turtner F. E. LEUPP, Commissioner, A 2-4-6-9-11-13-16-18-20 range boy finds the planets to be in the same position this year as they were a number of years ago. He merely reprints the weather conditions for that former year and makes them his forecast for the present year. Under this system one can as well make a 'forecast' 1,000 years shead.

A16-17-18-19 M11-12 Only True System. "Now, the government system is the only true system. The people who know about things rely upon me and my forecasts. I strike it right about nine times out of ten. The weather is a very fickle thing and it may depart from all rules at the last moment and then the people, the ignorant people, give me the laugh. Why, here recently when I predicted rain or snow and we had that hot weather I never heard the last of it. My prediction was all right, but nature made a peculiar divagation from its usual course and the people laughed at me. They should have laughed at nature.

"I tell you there's no class of people think they know so much about the weather as those who know nothing of it. Why, there are thousands of people who think I come down here in the morning, look at the thermometer and barometer, open the window and sniff at the air and them make a guess. But it's nothing of the kind. It's all a system, and once the map is made out anyone can make the forecast. "A large number of business houses of Omaha rely on daily predictions. The biggest houses here call up every day to learn what the outlook is. They know it's

CHIEF QUARTERMASTER'S OFFICE— If I say fair, the store advertises a big sale; if I say rain, it is all off. This business is a science and no joke." Brenker of Records. The records of Colonel Weish's office show that the year 1907 has so far broken several secords. For example, March broke the record for high temperatures, when on the 25th the mercury registered 9t degrees. March showed an extremely small rainfall, the smallest in thirty-six years. It was only .29 inch. The average for the month
