DISASTERS IN PHILIPPINES

Town of Iloilo, Capital of Panay, Totally Destroyed by Fire.

EARTHQUAKE SHAKES LUZON ISLAND

Two Provinces Report Damage to Buildings, While Manila Feels Lighter Shake—Communication May Be Delayed.

MANILA, April 19.—The town of Iloilo was totally destroyed by fire this morning and 20,000 people rendered homeless. The flames are still raging, fanned by a heavy wind. The fire has passed beyond control of the civil and military authorities. The damage has not been estimated. Only meager reports have so far been received here, as telegraphic communication is affected.

Iloilo is the capital of the island of Panay, located on the east coast. The port, which is the second in importance in the Philippines, next to Manila, is the center of the sugar import trade.

Reports have been received from South Luzon of a severe earthquake in the town of Nueva Caceres, capital of the province of Arbores Camarines, and also at Nayaban, in the province of Tayabas, in northern Luzon. The destruction of buildings is reported, but so far there is no mention of any loss of life.

It is feared that communication by wire has been affected. A tremor was experienced at Manila, with intermittent shocks for three hours this morning. Three of the shocks were severe, but the majority of the others were scarcely perceptible.

Ysidor Wave on Carolina Islands. BERLIN, April 19.—Colonial Director Dernburg informed the budget committee of the Reichstag today that a cable message had been received from the governor

RUMOR OF BIG WILL CONTEST

Nearest Relatives of "Silent" Smith Say His Desire Will Be Respected.

NEW YORK, April 19.—The immense fortune, estimated at \$75,000,000, left by James Henry Smith when he suddenly died in Japan while on a wedding tour around the world may, according to a story printed here today, be the subject of a contest, as the story asserts that more than a score of Smith's relatives have reached a determination to insist upon a division of the estate.

CHICAGO, April 19.—Relatives of the late James Henry Smith denied today that they intended to contest his will. Mr. Smith's two sisters, Mrs. Victor Ross and Mrs. J. N. Mills, and his nephew, William S. Mason, all declared today that no effort whatever would be made to break the will.

CHANGES IN THE PRIMARY MARKETS

Change has appeared in the primary markets for textile fabrics, wool, rubber, firm, and mills are well occupied. Remains of cotton are recorded, but without active effect, buyers being ready to take advantage at second hands. While the coarse wool section is active, there is no accumulation of goods, and there is no indication of speculation. Few actual alterations have occurred in prices of cotton goods, but the tendency is still upward, premiums being frequently paid in order to secure early deliveries. Supporting feature is the curtailment of production, which is unavoidable because of the scarcity of labor.

ALTHOUGH THERE IS A BETTER DEMAND FOR HIDE

Although there is a better demand for hide for the week several grades have cheapened still more because of heavy accumulations. Foreign dry hides are all lower for the week, several grades being fourth to three-fourths of a cent lower. While leather markets are fairly well sustained, recent large purchases have not had as much effect as was anticipated and current business is quiet.

BRADSTREET'S REVIEW OF TRADE

Cold Weather Delays Farming Operations and Dulls Business. NEW YORK, April 19.—Bradstreet's tomorrow will say: Continued cold weather throughout the country delays crop preparations and de-

DUN'S REVIEW OF TRADE

primary Business Develops Slowly Because of Unseasonable Weather.

BUILDING OPERATIONS STILL ACTIVE

Factories Are Busy and Labor Disturbances Are Few—Freight Blockades Lifted in Large Degree.

NEW YORK, April 19.—R. G. Dun & Co.'s Weekly Review of Trade tomorrow will say: Spring trade develops slowly because of unseasonable weather, but the last ground will be recovered in large measure when normal temperatures prevail. Cold weather has prevailed over unusually large areas, retarding agricultural progress, as well as trade, as in light weight wearing apparel and other spring goods, but similar had started in other years have sometimes brought results. The only actual damage of any account is reported in some winter wheat fields of the south-west, where insects and drought combined to injure grain and in most of this area some other crop has been planted.

Wholesale business for later seasons is on a liberal scale, building operations are active and leading manufacturing plants are busy. Few labor struggles retard work in the industries and an unusually small number of strikes are scheduled for May. Little complaint is heard regarding freight blockades and with the resumption of lake navigation on the northern border, traffic conditions will soon be entirely satisfactory.

Quiet conditions in the pig iron market were to be expected after the large sales of last week and production has been slow so far ahead that quotations are fully maintained. In the steel department there is an increasing scarcity of billets that handicaps consumers. The wire trade is especially disturbed, because demand has been so urgent that stocks could not be accumulated for spring business, and the season opens with smaller supplies than ever before. Progress in building operations brought out requirements for structural shapes that cannot be satisfactorily met.

Change has appeared in the primary markets for textile fabrics, wool, rubber, firm, and mills are well occupied. Remains of cotton are recorded, but without active effect, buyers being ready to take advantage at second hands. While the coarse wool section is active, there is no accumulation of goods, and there is no indication of speculation. Few actual alterations have occurred in prices of cotton goods, but the tendency is still upward, premiums being frequently paid in order to secure early deliveries. Supporting feature is the curtailment of production, which is unavoidable because of the scarcity of labor.

ROSS HAMMOND AFTER PLUM

(Continued from Third Page.) note and settle all the expense incurred, but the plaintiffs refuse.

BEATRICE—An organization comprising about twenty-five of the business men of Blue Springs and to be known as the Base Ball Park association has been perfected at Blue Springs by the election of the following officers: C. W. McCullough, president; M. Kehoe, secretary; J. F. Roderick, treasurer; A. H. H. Bishop, and E. E. Morrow, board of managers. A base ball team has been organized and it is the intention of the association to do something for the town the coming year.

TEKAMAH—John A. Goodwill, aged 77, died this morning at 11:30 a. m. His short duration, Mr. Goodwill came to Nebraska in 1877, stopping at Base, a town a suburb of Omaha. In 1882 he came

velopment, injures fruits, vegetables and cotton and dull retail trade. Coincidentally orders from and collections by jobbers and wholesalers are affected, but the latter branches of trade feel this relatively less than in other years, because they are still very generally pushed to complete deliveries on earlier orders. In cottons, features are the tendency to mark up quotations of the week spring sales, but this is an early drive are accumulating and concessions can be obtained on all commodities. The country's largest market has been the announcement of the amendment of the wool spring sales to complete deliveries on earlier orders. In cottons, features are the tendency to mark up quotations of the week spring sales, but this is an early drive are accumulating and concessions can be obtained on all commodities. The country's largest market has been the announcement of the amendment of the wool spring sales to complete deliveries on earlier orders.

WEST POINT—Fred Putzeer, the North-western section hand who was held to the district court by the county judge on a charge of entering the dwelling house of Frank Heller, has settled his case. Owing to the youth of the prisoner and the fact of his parents being aged, respectable people, the county attorney decided to accept a plea of guilty larceny. The case was therefore returned to the defendant's residence to a term of thirty days in the county jail and to pay the costs of the prosecution.

WEST POINT—The snow, which had been falling continuously for the last thirty-six hours has abated. About fifteen inches of solid snow has fallen, laying perfectly level, there being absolutely no wind. The immense amount of moisture which has fallen will be of great benefit to growing crops, as from its even distribution it is soaking into the ground without any danger of frost. The soil was very dry and the general opinion seems to be that the precipitation was just what was needed and came in the best form. No damage of any kind is reported, either to fruit buds or to growing grain from the recent freezing weather.

NEBRASKA FROM DAY TO DAY

Quaint and Curious Features of Life in a Rapidly Growing State.

Emil's Nolsy Cards—Emil Kaufman's cards just whither at you—Norfolk News.

Fortunately the Tekamah newspapers have found two points on which they can agree—the higher subscription price and the actions of Governor Sheldon.

If the snow of this week is not to be an unmitigated evil it will make the grain crops so big that farmers can pay higher prices for fruit without reducing net profits.

Army of Benedictines—What a gallant army shall it be when the great army of Benedictine columns are dumb as an oyster, what will the people of St. Paul do for their perennial newspaper rowl? The answer is easy—take a long needed rest—Ord Quiz.

Beneficial Effect of Marriage—The justice of the peace of this place called upon to marry a couple a few days since, and is now suffering from nervous trouble. Better let the preachers tie these knots—Nemaha City Correspondent Auburn Granger.

Publicity at Beemer—This editor has always tried to say a good word for this

little city in which we live, and for that reason has, from time to time, said nothing regarding incidents reflecting on the character or business of any of our citizens. Incidents have been happening lately that make it almost impossible for us to keep quiet and have any self respect left.

"Pay Dirt" in Chickens—It may be news to some of our readers to learn that a specialist has visited our vicinity prospecting for gold. Some chickens shipped to New York City were found to have particles of gold in their craws. After much investigation it was found that the fowls had been shipped from Pawnee City. What this find will result in remains for us to find out—Clay Correspondence Pawnee Republican.

When Warner Was Tempted—We are not fighting the battles for the people for some petty financial gain. Had we bowed to the will of the republican schemers, we could have been thousands of dollars better off today, but we defied them. Even the great John M. Thurston offered us the Lyons postoffice and we have his letter on file in our office in which he so stated, but we declined the offer; we would not uphold the republican doctrines of Mormonism, gold-bug, high-way tariff robbery and general corruption for a million post-offices—Lyons Mirror.

County "Jug" Located—Last Saturday morning there came to the postoffice a letter addressed to "The County Jug," in care of the postmaster. Postmaster Nesbit inquired from several whom the county jug might be and one and all declared they were not a part of it. The postmaster finally decided the nearest approach to a county jug in Tekamah was County Judge Basler, and there the letter found its proper destination. It was another case of the Roosevelt-Carnegie spelling reform. The writer thought there was no use putting so many silent letters in such a word as judge, so cut it down to the proper sound. Hereafter his honor may be better known as the county jug, if you want to spell it that way—Tekamah Journal.

COMMERCE OF THE WORLD

Department of Commerce and Labor Gives Figures Showing State of Trade.

WASHINGTON, April 18.—The international commerce of the world now exceeds \$20,000,000,000, according to a statement issued by the bureau of statistics of the Department of Commerce and Labor today. Of the imports of countries other than the United States, 14 1/3 per cent are drawn from this country, and of their exports, 3 1/2 per cent are sent here. These figures of exports include only the domestic products exported, but do not include the foreign colonial merchandise exported into the country and re-exported.

The total imports of the countries other than the United States are given as \$2,613,143,000 and the share of these imports drawn from the United States as \$1,738,339,000, or 67 per cent of the total. The total exports of the countries other than the United States are given as \$1,678,496,000 and the share sent to the United States as \$1,001,113,000, or 60 per cent of the total.

A. B. Huberman, 80 years at S. E. Cor. 13th and Douglas; 30 years direct diamond importer; sold at import prices.
