KIERSTED FILES A REPORT

Accompanies it with Draft of Ordinance Fixing the Water Rates.

GROSS REVENUE EIGHTY-EIGHT THOUSAND

Questions Advisability of High Pressure Service at the Present Time, but Other Extensions Are Absolutely Necessary.

At the meeting of the city council last night the report of W. Kiersted of Kansas City, the expert hydraulic engineer employed by the city, filed his report embracing the schedule of water rates on which he has been working for the last week. Mr. Kiersted, who was employed to compute the value of the present water works plant and estimate the cost of a new one, was brought back here last Monday to assist the special water works committee, of which Councilman Wallace is chairman, to arrange a schedule of water rates to be incorporated in the proposed new franchise for the Council Bluffs Water Works company.

Engineer Kiersted's Report.

The report follows:
 I have the honor to submit a report on a schedule of rates for water service covering the charge which the Council Bluffs Water Works company may make for water service in this city, and in so doing respectfully ask your consideration of a draft of an ordinance herewith enclosed embodying a schedule of rates in line with my report of a short time ago.
 The present water rate for 1,000 gal. water consumers, 3,443 metered water consumers. Assuming all of these services to be active and paying services, the value of the proposed schedule of water rate the estimated gross income:
 For flat rate consumers.....\$25,200
 For metered consumers.....45,494
 For hydrant rentals at \$60 per hydrant for 103 hydrants.....17,290

Total.....\$87,984
 It is stated, however, that all services are not active throughout the year and therefore the estimated flat rate income is not as high as is shown in fact, as high as estimated. The books show a gross income for 1906 of flat rate consumers of \$25,200 and an income from miscellaneous sources of \$47. It is further stated that three hospitals receive water without compensation and it is computed that the cash value of the water delivered to the hospitals under the proposed schedule of rates is \$1,875. Therefore, if deductions are made accordingly from the estimated gross income of \$87,984, the available gross income would not then approximate \$85,366.
 A comparison of gross income with valuation computed in line with my report of valuation, the cost of operation being a constant quality in each case, is shown by the following tabulation:

Valuation.	Gross Income.	Pr. Ct.
\$50,000	\$28,538	14.1
\$25,000	20,913	14.5
\$15,000	16,283	14.3
\$10,000	12,942	14.0
\$7,000	9,718	13.8

What Income Can Support.

Therefore it is computed that the gross income with no deductions for inactive services for water can support a total valuation of \$65,000. It is further stated that the probable gross income under the proposed schedule of water rates of \$85,366 support a total valuation of about \$100,000.

The operating expenses of \$39,085, as estimated in my report and as contained in the above showing, embraces \$2,885 for state and county taxes. If, however, these taxes should be proportioned upon a valuation of \$65,000, they would amount to about \$5,125, and the operating expenses would then reach \$44,210. The gross income of \$85,366 can then support a valuation of about \$100,000. The total loss for the year is \$15,447.25. With \$44,475 insurance, the department has thirty-two men, including the chief, and the cost of maintaining it last year was \$23,350, of which \$19,537.74 represents salaries.

Chief Jones recommends that new horses be purchased for the departments, that engine horse No. 3 be repaired and that a longer ladder be purchased. The annual report of City Electrician J. G. Bradley shows that in the reconstruction of the fire and police telegraph lines 45,000 feet of old wire was replaced with copper wire. Fees collected during the year amounted to \$1,105.25, while the expenses amounted to \$2,600.

A Comparison.

Consider the small yard in your home town, then think of two yards containing on an average about 30 times as much stock, then you will see why we can make such a difference in price to you by buying a straight car of lumber, instead of a mixed car as your local dealer must do. Of course, you are not in the lumber business and do not realize the advantages we have over him, but if you will mail us an itemized bill of what you wish, we will surprise you. C. Hafer Lumber Co.

New Construction.

The construction of the reinforcing main from Glen avenue to the warehouse district is a necessity which is believed the water company consents and which it should speedily carry out.

The estimated cost of the high-pressure construction is \$75,000, and if the investment is made it will yield nothing of itself in compensation for the expense of operating the high service.

The cost of operating a high-service station in the high service district, and if provided for in the earnings would necessitate the metering of the entire high service district and an increase in the proposed water rates about 17 per cent, when applied to the consumers under the high service.

In view of the fact that at the present time there are comparatively few consumers beyond the reach of water service it is suggested that for the present the several high service districts where there is inadequate pressure be independently provided with high service insofar as it is possible to do so, leaving the complete development of a high service district to a later date.

The extension of the pipe lines into new territory where there is a demand for water service should be made as promptly as possible.

If the water company would agree to expend now \$50,000 to \$60,000 in the improvements in the three districts named and to do so—there being no hesitation in entering into a new contract based upon the schedule of water rates herein offered for your consideration, and recommended for adoption.

The schedule of water rates, as well as other matters relating to the adoption of this matter have been fully discussed with Mr. Hart, the superintendent of the water company, as well as with members of your committee and it is hoped the schedule may be found acceptable to both the city and the water company.

Rates Proposed by Engineer.

The schedule of water rates suggested by Mr. Kiersted varied but little from his former schedule incorporated in his report at the time he made a valuation of the plant. It is practically based on a valuation of about \$600,000, his estimate of the value of the plant, plus the cost of reinforcing the mains in the business section of the city, providing for the proposed "high service" and extensions of the mains in various portions of the city. To the council, after the report and schedule had been read, Mr. Kiersted stated that if the company made the improvements and extensions suggested and this, in his opinion, it was prepared to do, the city council need have no hesitation in entering into an agreement with the company on the schedule of rates as prepared by him. No action was taken on the report.

Manager Hart of the water works was not prepared to make any definite statement last night, as he had not seen the report schedule until shortly before the meeting of the council. He said, however, he believed that in order to bring the matter to an amicable settlement, his company probably would accept the schedule of the city's expert.

Jones' Bond Approved.

Charles M. Nicholson, the appointee of the newly created Fire and Police commission for chief of the fire department, did not make much of a bit with the city council last night. When the matter of the newly created Fire and Police commission, was brought up, a motion by Councilman Younkerman was seconded by Councilman Maloney, to approve it, was amended by Councilman Wallace to defer action on it. The amendment was voted down and then the original motion met with a like fate. W. Jones, the present chief of the department, faced better. He had also filed a new bond and it was approved, there being only one dissenting vote, that of Councilman Younkerman. Even Councilman Maloney voted to approve it. Attorney Stuart of the firm of Saunders & Stewart addressed the council on behalf of Charles M. Nicholson. His bond was represented by Attorney S. B. Wadsworth.

An ordinance requiring all inspectors and collectors of gas, electric light and water companies to be garbed in the uniform of a policeman and to wear a star or a badge and, further, to be appointed by the city marshal, was introduced by Councilman second reading sent to the committee of the whole. The penalty prescribed by the ordinance is a fine of not exceeding \$100.

An ordinance providing for all sidewalks on paved streets, after June 1, to be constructed of artificial stone, was also referred to the committee of the whole. Discussion of the measure showed that several of the councilmen considered it entirely too drastic.

An ordinance providing for the condemnation of the old City mill, at the corner of Washington avenue and Bryant street, was passed under the suspension of the rules.

It was decided that bids on all curbing and sewers ordered should be in the hands of the city clerk by noon of May 3.

The annual report of Chief Jones of the fire department submitted to the council last night shows that 19 alarms were responded to during the last year, the greatest number of any one year in the history of the city. With the exception of the destruction of the Union Transfer company's warehouse on South Main street, December 10, the fire loss was not large. The total loss for the year was \$15,447.25, with \$44,475 insurance. The department has thirty-two men, including the chief, and the cost of maintaining it last year was \$23,350, of which \$19,537.74 represents salaries.

Chief Jones recommends that new horses be purchased for the departments, that engine horse No. 3 be repaired and that a longer ladder be purchased. The annual report of City Electrician J. G. Bradley shows that in the reconstruction of the fire and police telegraph lines 45,000 feet of old wire was replaced with copper wire. Fees collected during the year amounted to \$1,105.25, while the expenses amounted to \$2,600.

A southbound Fifth avenue motor struck a double-seated survey occupied by four girls, members of the family of W. O. Walling of Washington avenue, at the intersection of Pearl street and Willow avenue yesterday afternoon. The horses dashed onto the sidewalk in front of the Merriam block, and but for the presence of mind of Edward Pierce, custodian of the block, who seized them by the bridles, would have plunged down the area way at the side of the building. The young women escaped injury, but were badly frightened. One of the horses which was struck by the motor was hurt, but not seriously.

Mrs. Brown and a neighbor of Harrison street were thrown from a buggy yesterday morning on East Washington avenue, the horses escaping by driving running away. Both women escaped with a few bruises, but the rig was demolished before the horse was caught.

The derailing of a big Omaha motor at Main street and Fifth avenue yesterday blocked both the South Main and Fifth avenue lines for half an hour.
