

Rich Gulch Wonder Mining Co.

Incorporated Under the Laws of Nevada

250,000 Shares of the Treasury Stock Offered for Subscription at 25 cents Per Share, Par Value \$1

Capital Stock \$1,250,000

Non-Assessable

1,250,000 Shares, Par Value \$1.00

50,000 Shares in the Treasury for Mine Development.

750,000 Shares Issued to Acquire the Property.

OFFICERS AND DIRECTORS:

President..... T. F. DUNAWAY
Vice President and General Manager of Nevada, California & Oregon Railroad.
First Vice President..... HON. JOHN SPARKS
Governor of Nevada.

Second Vice President..... U. S. WEBB
Attorney General of California.
Treasurer..... D. B. BOYD
For twenty-five years successively Treasurer of Washoe County, Nevada.

Secretary..... EDMUND R. DODGE
President of the Sierra Valleys Railroad Company; General Counsel of Nevada, California & Oregon Railroad.

Registrars and Transfer Agents: Nevada Trust Company, Reno, Nev., and New York Trust Company.

Property Owned by the Rich Gulch Wonder Mining Co.

RICH GULCH LODE Mining Claim.
GOLDEN FLEECE LOAD Mining Claim.
BUTTERFLY LODE Mining Claim.
GOOD HOPE LODE Mining Claim.
PORCUPINE LODE Mining Claim.

A compact group. Mineralized area, 95 acres. Main vein 3,000 feet long and from 4 to 20 feet wide. Assays give returns of \$7.50 to \$404. Situated in Wonder Mining District.

Rich Gulch Vein Unquestionably One of the Strongest in Nevada

The following disinterested report on the property owned by the Rich Gulch Wonder Mining Company was made by telegraph to T. B. Rickey, President of the State Bank and Trust Company of Carson, Tonopah, Goldfield and Manhattan, Nevada, on March 30, 1907, by Wallace MacGregor, the bank's consulting engineer:

"Have examined Rich Gulch Group. It has one of the widest ledges in the district, traceable the length of one claim and into a second. A very promising property and worthy of extensive development. Group is five claims and a fraction. Adjoins Colorados where rich ore found."

Here is a detailed report of the property by Edward Hoffman, the consulting engineer and mine manager of the Rich Gulch Wonder Mining Company:

WONDER, Nevada, April 4, 1907.
To the President and Directors Rich Gulch Wonder Mining Company,
Gentlemen: I have examined the Rich Gulch mining property, and beg to submit the following report:

The property is located in the Wonder Mining District, Churchill County, Nevada. The following mining claims are embraced in the group: Rich Gulch, Golden Fleece, Porcupine, Good Hope and Butterfly. There are about 95 acres in all. This property is one of the best located in the district, being in the center of the mineral zone.

The property carries two strong quartz leads. The main vein can be traced 3,000 feet through the Golden Fleece, Rich Gulch and Porcupine claims.

A shaft on the Golden Fleece claim, just commenced, is eight feet deep and has a good showing. The ore here carries gold and silver values of from \$5.00 to \$22.00 per ton.

There are other openings on the vein on the Rich Gulch and Porcupine claims from which assays have been taken that give returns of from \$7.50 to \$404.00.

The main vein as revealed on the surface and in shallow surface cuts varies in width from four to twenty feet for the entire distance of 3,000 feet through the property.

This vein unquestionably is one of the strongest in the Wonder Mining District. The strike of the vein is northwest and southeast, similar to the strike in the vein on the Spider and Wasp and the Nevada Wonder, the other two important properties of the district.

There has also been opened up on the Rich Gulch property, striking east and west, a quartz vein which crosses the Rich Gulch and Good Hope claims. Surface assays on this vein give average returns of \$21.00 per ton.

I have examined the properties which neighbor the Rich Gulch, and find that the Golden Wonder, adjoining the Rich Gulch on the southeast, has opened up the same vein and is in ore on the surface that assays \$200.00 per ton.

On the Colorado group, adjoining the Rich Gulch property on the northwest, there has been opened up a continuation of the Rich Gulch vein, and shipping ore has been disclosed in four places.

The Billy-the-Kid group to the north, owned by the Ruby Wonder Mining Company, has several openings from which they are sacking ore that assays from \$200.00 to \$600.00 per ton.

The proved width and length of the main ledge, on the Rich Gulch group would stamp the property as worthy of the highest development, were the assays only half as flattering as those already obtained. Taking the width and length of the ledge, in conjunction with the splendid assays obtained, showing the presence of large bodies of both milling and shipping ore, I do not hesitate to say that the property owned by the Rich Gulch Wonder Mining Company compares at this time with any mining property in the Wonder Mining District, barring the Nevada Wonder and the Spider and Wasp alone, which are in a much more forward state of development.

Acting under instructions I have engaged a force of twelve miners, and have commenced the development of the property. Respectfully submitted,

(Signed) EDWARD HOFFMAN, E. M.

Edward Hoffman is a mine manager of twenty years' experience in Utah and Nevada. He has probably managed as many dividend paying mining properties as any engineer in the west.

250,000 shares of treasury stock, of the par value of \$1.00 are offered for subscription at 25c per share. The funds derived from the sale will be devoted to the development of the property, and a dividend paying mine will be made as quickly as possible. Allotments will be made in order of receipt of subscriptions, which must be paid in full on delivery of stock. The right is reserved to refuse any subscriptions or to allot any part of the given number subscribed for, and to CLOSE SUBSCRIPTIONS WITHOUT NOTICE. Applications for listing the stock on the leading mining and industrial exchanges of the country will be made at an early date.
