The week opened out stronger, but packers at all points were very bearish in their views and inclined to pound values wherever the opportunity was presented. St. Louis General Market.
St. Louis Gener containty outside of Chickgo, encouraged with the rise of the last week, bought wheat constantly. At times there were slight re-essions in the upward movement of prices on heat, realizing sales. At one time the market was forced back %c, but the ef-forts of the shorts and local traders were of no avail agrinat the flood of buying or-ders that came from all parts of the coun-try. The market started up again and closed strong and near the high market, with the buying demand apparently still unsatisfied. The specific causes of the strong market at Liverpool, the continued coid weather in the west and northwest of this country, which, it is believed, will seriously damage the winter wheat crop, and sensational advices from Canada, claiming that up to the present time only if per cent of the estimated total amount of, seeding has been done in Manitoba. Cash wheat at St. Louis and Kanana City advanced 265c and the prices of grain at various continential markets were also re-ported as on the rise. Just before the close free predictions were made by en-thusing the the prices of Just where ported as on the rise. Minecapolis, Duluth and Chicage reported receipts of 525 cars, against 527 cars last week and 102 cars a year ago. The corn market was strong and active and day. Local receipts were small, but the chief builtan factor was the strength of wheat, which carried all other grain with it. Efforts were made at times by bears to resist the advance in prices, but the sethacks were only slight and instead but a brief time. The market closed strong and with an excellent demand. July corn opened withic in the black of wheat. The gov-strates were were 221 cars, with 40 cars of contrast grade. The oats market was strong and active and followed the lead of wheat.
