served the identity of the indicted men will not be determined.

The commission is of the opinion this new order will necessitate a great deal of work on the part of the railroads, but winder the circumstances it saw no other way to get at the information desired, and it believes also such a report will serve as a damper on people accepting free transportation. The Missouri Pacific, which reported today, did as the other roads had done, reported nothing of any importance. After looking up the matter very carefully Attorney General Thompson advised the second order of the commission.
