CHICAGO GRAIN AND PROVISIONS

Fer inres of the Trading and Closing

Prices on Board of Trade.

CHICAGO, May 18.—Wheat prices on the Board of Trade again crossed the dollar mark today on a seanational buige which carried September up to \$1.00% and December to \$1.02. At the same time July advanced to \$90%. The upturn was due to reperts that this year's whent crop in Europe and America would be greatly below the normal owing to injury by unfavorable weather and by insects. The net gain for the day on the July delivery was 560%c, compared with yesterday's final quotations. The September option was up 4%c and December in even 5c higher. Corn was affected by the strength of wheat, Jfy closing with a net gain of 1%c. Oats gamed 1%c. Provisions closed 1%c to 1%c. The pandemonium which accompanied the Prices on Board of Trade.

curred today within the last few minutes of trading. After opening weak on re-elizing sales, which were brought out by lower cables and warmer weather, the market at the end of the first half hour market at the end of the first half hour started on an apparently normal recovery. Several leading commission houses bought freely all day, but realizing sales were so beavy that the price rallied slowly. The combined purchases of the few of the leading houses during the afternoon, it is said aggregates between 5,00,000 and 7,00,000 bushels. This demand was based on unfavorable crop reports regarding not only the American crop, but that of Europe as well. Russian reports being particularly pessimistic. The weekly government report from Washington states that "throughout a great part of central and eastern Europe pessimistic. The weekly government report from Washington states that "throughout a great part of central and eastern Europe the outlook for a successful sesson is decidedly less promising than was surmised a month ago." In addition to these advices many reports were received from the southwest claiming a big reduction in the winter wheat crop. During the last fifteen minutes of the session, by which time sellers had become less numerous, the big demand which had existed all day became ronspicuous. The demand was so urgent that prices advanced by lesps and bounds, sometimes 4c or 4c apart. Prices brought remots profit taking, but the reaction thus secasioned did not seriously affect the net result, the closing being excited and strong. July opened a shade to 14614c lower at 254c, a low high point for the crop, and closed at 254c, affect over resterday's close. September, aving sold at 38c at the opening, advanced to 11.63, also a new record for that delivery, and closed at 154c. December opened at 15c to 36c, advanced to 11.62 and closed at 1.01. Clearances of wheat and flour were equal to 113,000 bu., compared with 120.09 bu. a year ago. Minneapolis, Duluth and Chicago reported receipts of 412 cars, against 49 cars last week and 128 cars a year ago.

and Chicago reported receipts of 42 cars, against 49 cars last week and 138 cars a year ago.

The market for corn was weak at the start because of heavy realizing based upon improved weather and on the break in wheat. Later the market railled in sympathy with wheat; the early loss was regulated and the market closed strong, with prices at the high point of the day, July opened to alter and then advanced to file, where it closed. Local receipts were 158 cars including 17 of contract stade.

ONLY TRADING IS AMONG PROFESSIONALS

Volume of Transactions is Small and Price Movements Are Without Significance-Bonds Are Heavy.

NEW YORK, May 18.—Stagnant condi-tions continued to prevail today in the stock markets of the world and the volume of transactions in New York was so trivial as to leave little significance in the price movements which are due al-most wholly to the shitting operations of a small prefessional class who seek only to scalp a quick profit on a narrow price movement.

a small prefessional class who seek only to scalp a quick profit on a narrow price in evement.

The movement proved extremely sluggish even for the purchases of this class, so that their operations are on a dwinding scale. Brokers are hopeless apparently of any early revival of interest in the market unless in the event of some unexpected development which may serve to stimulate activity. Eager use was made yesterday of the short lived sensation caused by the publication of the purported report of the interestate Commerce commission on the Harriman railroad's inquiry and efforts were made to extend those influences into today? dealings. The effort was practically also today a dealings. The effort was practically also to the same special weakness of the same should be purchasing shares in other railroads. That stock's weakness was attributed, however, to rumors of a forthcoming note issue and the General Elsectic convertible bond issue served to bring attention back to the question of the supply of capital available to meet the needs of corporations. The course of the bond market offers no indication of the working off of congestion of issues. The newly listed their appearance in the Stock exchange trading by a decline to a low record figure. New York bankers heard with interest of the renewal of the movement of gold room London to Paris. In connection with he hardening of discount rates in London from London to Paris. In connection with the hardening of discount rates in London and the sharp rise in sterling exchange in this market, conditions are brought again toward the point of profit on shipments of gold from New York to Paris, which seemed to be imminent in the early part of last week. Time money rates here were rather easier today. It is considered probable, however, that any decline in local money rates to a point which would permit gold exports would be taken advantage of by the secretary of the treasury to draw down government deposits with the national banks in preparation for the redemption of maturing gold bonds on July I. Stocks susemed comparatively free from the reflected influence of the wheat market today until the late upward flight in wheat, when stocks ran off from sight advances which had been established. The increase in the National Lead dividend lead to profit-taking in that stock and was without influence on the general list.

CATTLE—The receipts of cattle this morning were very fair for a Thursday, both here and at other market points. At the opening the outlook was none too good and there was a weak feeling plainly discernible. Packers at all points are anticipating large receipts of cattle in consequence of the high price of corn, which would have a natural tendency to induce free shipments. Honce they are rather bearish in their views. bearish in their views.
In spite of the fact that conditions seemed favorable for lower prices or for a weak market, at least, there was a fair out-side demand and the trade opened in pretty

side demand and the trade opened in preity good season with prices steady to a little stronger on some of the better cattle. Anything that would do for shipping account sold quickly and as high as \$5.70 was paid.

Cows and heifers were in fair demand, but the market was without any very note-worthy change, being generally quoted steady with yesterday. Still there were spots where it looked, if anything, weak and some sellers thought they were forced to sell, if anything, a little lower than yesterday.

to sell, if anything, a little lower than yesterday.

Stockers and feeders commanded steady prices and the trade was a little more active, owing to the more favorable weather. In some cases sellers thought they secured a little better prices for their desirable stock cattle.

Small, parasitic fourwinged flies are the greatest benefactors in the control of this insect and kerosene emulsion has proven an effective remedy. The government experiments show that lime sulphur wash, so effective with the San Jose scale and the peach leaf curl, to worthless for the terrapin scale.
