NEW BASIS FOR VALUATION

State Beard of Assessment May Spring a Surprise on the Roads.

If Plan is Finally Adopted the North western Would Be Decreased and Union Pacific and Burlington Materially Increased.

(From a Staff Correspondent.) LINCOLN, May 23.-The State Board of Assessment is devoting considerable attention to adjusting values between the various railroads doing business in the state, and done by which it is possible to figure on be, some very marked changes are liable to be made in the assessment of the various systems, even though the total assessment is not materially increased or de-'a sweet little cookie" that arrived last creased. The fact that the board is figuring on the earnings in Nebraska and the mileage in Nebraska, compared to the earnings and mileage of the entire systems, tends to show that a new plan is to be board is now figuring on three or four different methods, including the stocks and conds and the capitalization of the net FREMONT CONVICT CAUGHT IN IOWA earnings, together with one or two other plans not heretofore employed in Nebraska. One plan of assessment which may be finally adopted provides for taking \$2 and the common at \$1.50, the value of reform school. While awaiting commit be \$40,870 a mile. Of the earnings 9.8 per on deck. The new moon, at Madison, will of the mileage is in this state. Taking the value of the stocks and bonds for a basis and applying the per cent of earnings and mileage in Nebraska, the road here would be worth \$28,550 a mile, and outside of Nebraska \$42,850 a mile.

Another test applied to the Northwestern, and this is the test based on the same principle used by the Interstate Commerce commission, makes the value of the Northwestern in Nebraska \$33,250 a mile. By this method the net earnings capitalized at 5.94 per cent makes each mile of road worth \$35,600; capitalizing first test, makes the total of the three methods \$99,750, which divided by three earnings are in Nebraska,

It is by no means certain, however, that either of the plans now under discussion by the board will be adopted, but some other plan may be evolved out of these. The figures which have been presented to the board, or will be, were compiled by Secretary Bennett, who with members of the board have been at work on a system of railroad assessment which will be uniform to all roads.

Joker in Corporation Bill. Senator King's bill, passed by the recent legislature, requiring foreign corporations to file with the secretary of state the name of a person to act as agent of the company mistakes, bury him. Dead people are the upon whom service can be had, is causing a lot of uneasiness around the state house because it looks like the bill has a "joker" in it. The bill provides that the corporation shall not begin to do business in the state "until the name of the agent is filed with the secretary of state." This has been interpreted to mean that the foreign corporations will not have to file articles of incorporation as they do at present. Should this be the proper interpretation it will mean the state will lose thousands of dollars, for the cost to the corporations for filing the name of the agent is 30 cents,
