BEFORE TELEGRAPHY CAME

A Glance Backward at the Ancient Means of Communication. Distant Signals Read with Telescopes. Various Methods Employed to Convey Messages on Battlefields—Foughten Inconveniences of Other Days. To compare the present with the ancient means of communication is to appreciate that you are living in the commercial twentieth century.

square and round—are situated on the most prominent hillsides. Up to 1844—when experiments assured the success of the electric telegraph—these towers were the means of communication in France. In that year there were 380 stations. The towers were two stories high, with index signals of light wood or iron mounted at the top of a pole on the roof.

At that time France was at war with nearly the whole of Europe. The first telegraphic national message was received by Carnot, grandfather of a recent French president, telling of the restoration of Comde to the republic.

paratus which is carried by an army, the old system was rather inconvenient. Semaphores in Use. During the Crimean war a system of sending messages by the use of semaphores was adopted in 1854, by which messages were conveyed from one camp of the allied armies to another.

our present system, which is so great that only about 12 per cent of the power generated is applied directly to propelling the trains. The difficulty has been to maintain a steady balance for a train having a single point of support.

their gyrostatic action and stored up energy can be utilized. These flywheels are mounted on high class bearings and are placed in exhausted cases, so air and journal friction is reduced to a minimum, and consequently the power required to keep them in rapid motion is very small.

Reflections of a Bachelor. Nearly everybody is honest unless he gets caught. A gambler is the fellow who gets your money at it.

RAILROADING ON ONE RAIL

Device of a London Inventor Astonishes Experts and Provokes Comment. For twenty years or more inventors have been busy with the problem of making trains run on one rail instead of two.
