PREVALENCE OF THE GUIMP Found in Every Class of Costume from Cheapest to the Most Coutly.

The prevalence of guimpes and undersleeves in summer frocks has made emphatic demand upon the allover nets and laces and upon net top and valenciennes laces. Nine frocks out of ten show a trans- a few drops of tabasco sauce. Freeze parent guimpe and sheer sleeves, and slightly, turn into a brick mold and pack sieeves composed entirely of lace frills are among the chief favorites.

This generally accepted fashion of putting transparent cream or white next the face is universally becoming, and it is long since a season has set the stamp of popularity upon anything so pretty and becoming as the guimpes and undersiceves of this year. Unfortunately many a dressmaker lacky the taste and skill to achieve the individuality and the daintiness which are the marks of success in these details and many a pretty frock is spelled by a clummade or coarse guimpe and sleeves, but there is little excuse for such blunders. The fashion journals present pictures of excellent guimpes and sleeves and the imported models to be seen in all the first lass shops offer excellent suggestions along these lines, for it is in details such as these that the French dressmaker as a rule out-

General Secretary E. C. Wade is just as | Donahue Gets Home from the Jamestown Convention.

Will Ask Uncle Same to Take Over the Identification Bareau and Maintain it for All Cities.

Chief of Police Donahue reported for duty Wednesday afternoon after an absence of two weeks spent in the east, where he attended the meeting of the National Association of Chiefs of Police, which was held at the Jamestown exposition grounds, and visited a number of cities.

"The most important matter before the convention," said the chief, "was considerproject is lying dormant in the meantime. ation of a proposed law to place the bureau of identification under the management of the United States government. Some oppolie and an effort is being made to find out sition to the plan was noted on the part which of the proposed plans will meet the of a few members of the convention, who thought that such a policy would be to Commissioner Ure is still alone in his ad- place the bureau in politics, but the bill vocacy of the construction of the building which has been framed precludes this, as it on the corner north of the city hall with a provides that the chief of the bureau shall Farnam street entrance through the city be appointed by the president of the United hall, but has indicated if this plan does not | States or some cabinet officer upon nominago through he will not oppose a new build- tion by the board of governors of the buing on the present court house block. After the and passed the examination in good shape decides the Omaha house is to be operated, Thirty-second street line is completed the The finger print method of identification a large quantity will have to be bought in to be one of the best methods of identifythe system now in vogue.

"On our way home we visited the police calling cards, plank book and magazine departments in a number of cities and found them confronting questions similar

to those in Omaha. They are working ou their problems in about the same way. In most of the towns they have many more policemen than we do, but I failed to see the improvement in work which might

naturally be expected.

"As to the exposition, it is still in a state of preparation. In a month they will have a good show, but now the workers interfere with the sightnesss. The character of workmen is delaying operations. The men are all negroes. In summer weather they work wearing two shirts and a heavy coat, and their work is what might be expected under the circumstances. The people in charge are doing their best and they are giving warm welcome to all victors."

MALTING PLANT DOING WELL Business Increases to Extent Where Both Local Houses May

Have to Operate. Buch has been the success of the Gate City Malt company in its new manufacturing venture at South Omaha that its business probably will soon require the operation of the old plant at Second and Hickory streets, which has been lying title for set

eral months. A meeting of the board of directors of the company will settle the matter in July or August, their decision depending on the development of the barley crop in the next few weeks. If a crop of good barley is matured, the company will have to run both plants in order to supply its trade, which in the last few months has reached San Francisco on the west and almost to the Atlantic seaboard on the east. Th "The plan has been submitted to President plant at South Omaha can turn out over Roosevelt and we hope to secure his en- 250,000 bushels of malt a year, while the one at Omaha has a capacity of one-thir
