DOES ROTATION BALLOT GO?

Magney Says That Section of Law is Not Changed.

PRIMARY ELECTION'S NEW PHASE

County Attorney Reverses Rimself, but Deputy County Clerk Says Secretary of State Decides.

Deputy County Attorney Magney has reversed his opinion given several weeks ago n relation to the ballot, and now is of the belief that the rotated ballot will have to be used in Douglas county at this fall's primary. In his first opinion he held the section of the law requiring the use of the rotation ballot in Douglas county had been repealed by the new primary law, but subsequent investigation has convinced him that it was not affected by the new enact-

"When I gave my opinion to County Auditor Smith," says Mr. Magney now, I had referred to copies of the law published in the newspapers. From these I was of the opinion that Section 5811 of Cobbey's Annotated Statutes was repealed in its entirty. The rotation ballot is provided for in subsection i of section 5811. Since examining the pamphlet copy of the law I find that only subsections a to h of section 5811 were repealed by the new law, leaving subsection i intact and in full force. Hence I am now of the opinion the rotation ballot will have to be used in this county this

Dewey Has Another View. Deputy County Clerk Dewey discussing the use of the rotated ballot declared the question was up to the secretary of state "The secretary of state prepares an official ballot for us, and we will use whatever he prepares for us. This office has nothing to say about that, as the duty of making the form is placed on the state We are not worrying much about officer.

The general mines, the same as we do, to insure their for use on the county roads that are being election law provides ballots for state of Miss Jean Cudahy, Miss Bess Baum, Miss ficers shall be uniform throughout the state. If Douglas county has a rotated ballot for district judge, it is argued, and Washington county has not, will it not be a violation of the law requiring uniformity, both counties being in the same district? Deputy County Clerk Dewey has raised this question and Mr. Magney admitted it might be a serious one. He declined to express any opinion on it, however, until he had looked

usually cut in one, and adjusted at the waist by a draw string, while the skirt buttons around the waist; but there are a few princesse models which are vers pretty if well made and worn, though they are less becoming to the ordinary figure than a blouse and skirt and suggest the advisability of wearing a bathing corset. For almost any sort of outdoor use the hand knit sweater is one of the most useful garments a woman can own. To those who expect to include camping, fishing, tramping, hunting, or any such outings in their summer vacation, the sweater is almost indispensible. And the sweater of the present season is, by the way, a much altered garment. It is not the original, tightly hugging jersey effect thing that made the average woman look like a fright, but an altogether shapely, and even pretty thing. It may follow the lines of any of the several styles of jacket in vogue just now and may have cuff and collar trimming of velvet, sorge, taffeta or knitted ribbed bands of some contrasting color. For use on occasions where the corset is dispensed with, such as mountain climbing or other exercise, where absolutely free play of the muscles is necessary, the new sweater is ideal. There are just two things to be kept in mind when buying or making the garment. It must be an easy fit and of a color that will bear washing.
