At Same Time Holders of Matured Government Securities Are Slow in Presenting Them for Redemption.

NEW YORK, July 14.-The week just passed was marked by the occurrence of several events which together constituted something like a crists in financial affairs, and the consequence was an upset of the organized speculative move for a rise in prices and a sharp reaction.

This movement was entered upon previous to the July 1 settlements and had the encouraging circumstances to go on that the supply of stocks in the market for some time previously had been very scanty, so that professional operations to force lower prices had met with little success. It was also hoped that with the disbursement of an unprecedented sum in dividends and interest in July the long dormant investment demand would revive and a medium be afforded for the digestion of speculative profits. The market campaign was conducted in a flambuoyant style and by methods of newspaper advertising, which kept tion to lift prices in the market. The incident of the failure of the New York City bond offering previous to the first of July dashed the confidence in the early awakening of investment demand. The convergence of some extraordinary demands on the money market during the second week of July also gave warning of difficulties to be encountered in the carrying out of the speculative campaign.

These warnings were disregarded, however, and the market operations for the Lincoln on Tuesday evening, is not findsupport and advancement of prices were ing much favor among democrats of the carried on up to the very threshold of the requirements of July 10, on banking resources. At that point there was an abrupt relapse, which served to dash the speculative interest in the market and to throw it back into a condition of duliness and feeble and uncertain fluctuations. While the meeting of the July 10 requirements had this unsettled effect on the market commitments previously made, the passing of that state is viewed with relief, as the passing of a crisis no longer in the pros-

Slow Presenting Bonds. The known condition of the New York Clearing house banks the previous week made it evident that events of last week must strain the available resources. It was not a surprise that the matured government bonds were slow in appearing for redemption, and, in fact, up to this time, less than one-half of the \$36,000,000 outstanding at the time of maturity have been presented for redemption. The withdrawal of \$30,000,000 of government deposits from the banks on July 10 was only partly offset, therefore, by the redemption operations. This tardiness La bringing into use so large a sum of available capital at a time of a practical famine of capital and onerous terms for use of money is one of the anomalies of the present financial sit-

The money difficulties were aggravated by the resumption of the Paris demand on New York for gold which resulted in the shipment during the week of \$2,750,000 to that point. The further extent to which this movement might go is a matter of concern, in view of the present banking position in New York. If it be the purpose of the Bank of France to re-establish its condition to the average of recent years, there is a considerable marging of recuperation yet to be effected, compared with last year. Its gold holdings at week were still \$23,181,000 less than / year ago, while its loans were \$51,857,000 greater and its note issues \$35,000,000 in excess of those of a year ago. The condition of the Bank of England likewise compares unfavorably with that of a year ago. In view of crop shortages abroad the great foreign banks are looking forward to the necessity of large payments for foodstuffs imported and are anxious to fortify their reserves in preparation. Foreign exchange in New York receded toward the end of the week under offerings of finance bills in the process of drawing on foreign credits by international bankers to lend in New York. This process encounters opposition in London, where it has forced up discount rates. Rates for time loans in New York have also risen materially.

Crop Report a Figure.

The publication of the government's report of condition of cereal crops as of July did not improve the feeling over our own crop prospects. Winter wheat showed less expected improvement during June and the deterioration in spring wheat was a disappointment. The effect of the low percentage of conditions in the corn crop was partly offset by the increase in acreage, and by the fact that the lateness of the crop eperated against the condition showing and left chance for improvement as it matures. Much importance is attached to the postponement of frosts in the fall for the final outcome of the corn crop.

Shooting Ends as Murder. ABERDEEN, S. D., July 14.-(Special.)-Christ Nelson, the victim of Theodore Taylor's murderous attack at Glenham on Wednesday, is dead here at St. Luke's hospital and Taylor now faces a charge of murder in the first degree. After the shooting he was charged with assault with intent to kill, but his hearing was put over until July 17 in order to see what the outcome of the shooting would be. A new charge has now been filed as stated. It sceins that at Glenham and in the country surrounding that town, all of the sympathy

That is what the commission did. Its opinion was put in type several days age and sent to purtaneously Sunday morning. That is what the commission did. Its opinion was put in type several days ago and sent to newspapers throughout the country with the following printed in hold type at the head: "Confidential—To All Newspapers: This report is released for publication on Sunday marning, July 14, 1907, and not before." It is deemed good politics to attack me. But I can stand much better than the people of the country can stand that sort of procedure on the part of the government sedure on the part of the governmen unals charged with the duty of impar

But from what I am told it is full of strange misstatements of fact. For example, in reference to the Chicago & Alton, it says that I caused \$12,000,000 to be credited to construction expenditures in order to find an excuse for borrowing money to pay dividends. As a matter of fact that was a written recommendation made by President Felton when I was in Alaska, and it was adopted by the board of directors at a meeting at which I was not present. Again, it is said that a certain method of accounting that was carried out would have the effect of covering up the payment of the special dividend, thereby intimating some wrongful concealment. This is a most extraordinary statement for the writer of the report to make when it is considered that the stockholders ment. This is a most extraordinary statement for the writer of the report to make when it is considered that the stockholders necessarily know of the dividend, because everyone received his share, and when it was published in every financial journal at the time and was reported to the Stock exchange and shown on its printed lists. The suggestion, therefore, of any reason or desire for conceatment is most unfair.

I am informed by those who have examined it more carefully that the article is full of errors as glaring and inexcusable as these, but I shall read it carefully and make a full statement about it, particularly of m; connection with the Chicago & Alton readjustment, in a few days.

Candidates Are Shy.

Bauman, Jr., for sheriff, and George Murrell for clerk of the district court, republicans, and A. E. Evans, suhave a candidate from Dodge county. County Judge Stinson, who has been mentioned for that office will probably prefer to retain that place for another two years. On the democratic side Judge Hollenbeck, who has been on the bench for the last nine years, probably will be mentioned. There are a number of candidates talked of for county officers by both parties who have not yet filed their applications with the county clerk. It is doubtful it township candidates will care to put up the necessary filing fee.

Attempt Made While President's Carriage Was Being Drawn Through Streets and Populace Was Cheering Him.

PARIS, July 14 .- The national fete today was marred by an attempt on the life of President Pallieries by Leon Maille, a naval reservist of Havre, who, it is believed, is suffering from the mania of persecution. Maille fired two shots at the president, but did not hit him. He was at once placed under arrest.

### KING LEADS STRENUOUS LIFE Edward Setting a Mark for Emperor William and President Roosevelt.

LONDON, July 14.-The program of activities which King Edward is undergoing this summer marks him as one of the busi est and most hard-working monarchs of his time. The German emperor has a popular reputation for activity, and President Roosevelt's name is linked with "the strenuous life," but when it is considered how much older the king of England is than his compeers, he may challenge comparison with either. The visit to Ireland last week was the last chapter in the king's work before an August vacation at Marienbad and concluded a strenuous summer.

This week the king goes to Newmarket for racing and after that the Goodwood. races and the Cowes regatts will fill the time before the departure for Marlenbad. While abroad the king will meet the emperor of Austria. In September the German emperor visits King Edward, while the court is in residence at Windsor. This troops and formalities, but the recent an nouncement has falled to excite any satis-
