UNION LABOR LAUDS VERDICT Considers Haywood Case Victory for

BULLETIN NEBRASKA TELEPHONE COMPANY

July 29

**FACTS** CLAIMS

Deadly Parallel No. 6.

The Nebraska Telephone Company does not have to earn or pay fixed charges on watered stock or inflated capital of any kind. Why? Simply because its capital rests absolutely dollar for dollar on real plant value. It has no watered stock. It has no bonds. It pays 6 per cent dividends -no more, no less. Some day the people of Omaha will appreciate that this conservative capitalization is a great advantage to the telephone user as well as the telephone

If the Nebraska Telephone Company had been over captalized it could not have kept its place in the front rank of the telephone procession. It could not have afforded, in that case, to have replaced half-worn equipment with equipment that is thoroughly up-to-date. It could not have provided, in advance, for the growing telephone needs of Omaha and provided an outlet in every direction by means of a comprehensive system of toll lines. It could not have provided branch offices for the further convenience of its customers and for the purposes of securing greater accuracy and economy in the handling of the growing traffic of the city. It could not have given subscribers the benefit of rates which are actually lower today than they were ten years ago, although the number of subscribers has more than trebled.

The American people have learned to look to the capitalization of their public utilities. They have learned that they cannot for any length of time get a fair rate and a fair value of service for that rate unless the finances of the public utility companies rest on a sound basis.

The growth of the Nebraska Telephone Company has been remarkable. The Company endeavored to show a progressive spirit in meeting this growth and at the same time has kept its finances on a strictly conservative basis.

The Company is therefore in a position to give its subscribers resonable rates and full value for their money.

The promoters of the new Omaha telephone company are attempting to dispose of bonds to the amount of \$1,500,000 to finance the building of a plant having 6,000 telephones. In the bond circular signed by their fiscal representative, Louis J. Wilde of Portland, it is claimed that these 6,000 telephones will make total earnings of \$243,900 a year. Under the head of "Expenditures," this \$243,900 is apportioned

Interest at 5 per cent on \$1,500,000

Sinking Fund to Retire All Bonds

Dividends at 4 per cent on \$1,500, 000 preferred stock...... 60,000 Operation, Maintenance, Reconstruction, etc. ..... 46,500

Total Expenditures .....\$207,374

This statement that "Operation, Maintenance, Reconstruction, etc." will be covered by \$46,500 is manifestly untrue. The items of operation, maintenance, reconstruction, etc., include all salaries and wages, insurance and taxes, repair and reconstruction material, rent, light, heat and power and miscellaneous expenses of all kinds, and the sum of \$46,500 will scarcely,

cover half of these various expenses.

Take a case in point. The Lincoln Telephone Company also has an automatic switchboard with considerable less than 6,000 telephones and yet the Lincoln company pays out over \$53,000 a year merely in salaries and wages, without considering material, rent, light, heat and power, insurance and taxes and other miscellaneous expenses. The Lincoln pay roll is about as

General Manager's Office (3 em-

Maintenance Dept. (43 employes).. 34,392 Operators (17 employes) . . . . . . . . 6,000 Record Dept. (2 employes)...... 840 Bookkeeping Dept. (4 employes)... 2,520 Contract Dept. (4 employes)..... 2,700 Collection Dept. (2 employes).... 2,520

Total Salary and Wage for year. \$53,772 The Omaha company promises nearly a thousand more telephones than Linclon is now operating, and its salaries and wages will cost more rather than less. But at the Lincoln rate the Omaha company's pay roll alone will be \$7,272 more than has been appropriated for all operating, maintenance and reconstruction expenses. The experience of the Automatic exchange in Lincoln shows that the figures in the prospectus of the new Omaha company have been juggled and are seriously misleading. Either the stockholders or the subscribers must suffer on account of the discrepancy.

few minutes sufficed to wipe them out

Arthur Lee, manager of Steeplechas park, speaking for Mr. Tilyou, said that the loss on the park, which was completely destroyed, would reach \$1,000,000, and there was no insurance. The hotels destroyed were small and the property loss on then will not reach much over \$100,000.

Technically Under Arrest.

WORCESTER, Mass., July 28.—General Josiah Pickett, 85 years old and a veteram of the civil war, is said to be dying here, technically a wealthy prisoner. He has been under arrest, it is stated, ever since the battle of Cold Harbor and has declared that he will die under arrest. Pickett was colonel of the Twenty-fifth Massachusetts during the fighting at Cold Harbor, and in a fit of anger in the height of the fight, replied roughly to General Stannard, his superior. The latter promptly placed him under arrest and took his sword. Later Pickett was commended by Stannard for gallantry in the Cold Harbor bor battle while heading a charge, but the record of arrest was never changed, and General Pickett has been technically under arrest for forty years.

He wanted to protect the innocent and get away from the company of the guilty, so he resigned as a director and helped pay back money invested by innocent parties. His part was a correct one and it cost him considerable money to help clear his skirts of apparent responsibility which did not even amount to actual responsibility. I knew something about the Omaha meting. It was a surprise to Kelby when he learned the actual condition of affairs and he insisted that restitution be made to innecent stockhoiders. This was done and Kelby was active in seeing that it was done.
