Your harvset is over. Now that you have a few dollars that you can spare make an investment with us and we will make you more money on the amount you invest than you can make in many years in any other investment. This is no dream or speculation but an up-to-date standard gauge electric road, running through the most fertile portion of Nebraska with all the preliminary work completed, right of way contracted for, valuable franchises given us by the towns through which we pass, \$80,000.00 worth of precinct bonds voted to us by the people

along the route to assist in the building of the road besides thousands of dollars worth of stock has been subscribed for by the hundreds of people along the line. This should convince the people living away from the line of the sincerity of the proposition and that the road is under construction and will be completed and when completed will be the biggest paying proposition in Nebraska. Notice our map and you will readily realize that the territory through which we pass is in great need of this line and a proposition for which there is a need is one in which to make a sure and paying investment. We don't need to tell you of the millions of bushels of grain and the thousands of head of live stock raised along this line to be transported to market. We don't need to tell you of the tons of freight that will have to be shipped into this territory. We don't need to tell you of the thousands of homes to be lighted by electricity and the hundreds of thousands of people to be served by this proposition. You know all this and know that it means large dividends to its investors. What you want to know is will the road be built. The fact as we state above in regard to the amount of work that has already been accomplished and the donation of \$80,000.00 of bonds by the people along the line to assist in this work and that the road is actually being built now should convince you that it will be built. It is no test case. Over Thirty Thousand miles of these roads are in operation today, and you know that the dividends are something great.

The child was playing in the Anderson dooryard, when a large rooster from a neighboring yard came running at full speed and struck her in the breast, knocking her down. The rooster then jumped on the child and began to peck her face. The little one's face was wounded in several places where the rooster had struck with his sharp bill, and it is the greatest wonder in the world that the eyes were not injured. Fortunately there was someone close by to rescue the child soon after the rooster's attack .-Columbus Telegram.

The blow which knocked out Corbets was a revelation to the prize fighters. From the earliest days of the ring the knock-out blow was aimed for the jaw, the temple or the jugular vein. Stomach punches were thrown in to worry and weary the fighter, but if a scientific man had, told one of the old fighters that the most vulnerable spot was the region of the stomach, he'd have laughed at him for an ignoramus. Dr. Pierce is bringing for an ignoramus. Dr. Pierce is bringing home to the public a parallel fact; that the somach is the most vulnerable organ out of the price ring as well as in it.
