MUSIC AS A MONEY MAKER

Capital and Labor Employed in Making Musical Instruments.

Rapid Growth of Mechanical Player -Deficient Information About Crank Organs Cheerfully Acknowledged.

WASHINGTON, Aug. 33-(Special.)-The bucaru of the census has just published a bulletin on the manufacture of musical instruments. There were 625 establishments engaged in this industry in 1906. They employed 35,220 wage earners, reported an aggregate capital of \$72,225,379, and manufactured products to the value of \$65.574340. drinking and was in a quarrelsome mood, Five years before, when the census of 1900 was taken, the number of establishments reported for this industry was 619; total number of wage earners, 23,714; the aggregate capital, \$47,766,582, and the value | It was not londed. Rich Freel and Aze of products \$44.418,978.

Comparison of the figures for these two gun away from the young man. Henry censuses shows that there was an increase in the five-year interval (1900 to 1905) of \$25,155,362, or 56.6 per cent, to the value of products; \$25,518,797, or 51.4 per cent, in the turning immediately to Vest Carney and amount of capital employed, and 11,506, or taking a shot at Freel before tackling 48.5 per cent, in the number of wage earners. The establishments in the meantime increased by only six, or about 1 per cent. This comparatively small increase in the number of establishments is more or less characteristic of all lines of industry in recent years, being indicative of the tendency toward production on a large scale or of combinations.

It is evident from an inspection of the figures published in this bulletin that the musical instrument industry made much greater progress in the five years between 1900 and 1905 than it did in the ten years between 1890 and 1900. Taking the value of the products as furnishing, perhaps, the best indication of growth, it will be found that this item shows an advance from \$36,568,169 in 1890 to \$44,418,978 in 1900, which was an increase of only \$7,550,809, or 20.5 per cent, as compared with the remarkable increase of over \$25,060,000, or \$6.6 per cent,

in the five years between 1900 and 1905. Principal Producing States.

The leading state in production of musical instruments is New York, which reported products to the value of \$24,277,927, representing more than one-third of the total product of the United States. The state ranking next in importance as regards this industry was Illinois, for which the aggregate product was \$13,997,728. Next comes Massachusetts, with a product of \$8,538,973; then Connecticut, with a product of \$5,-

New York has been a leader in this industry for more than twenty-five years. Massachusetts was the second state in importance in 1880 and again in 1990, but in 1900 was outranked by Illinois, in which state the recent development of the industry has been very rapid.

In presenting the statistics of this inestablishments with respect to their prin- next two days. The sessions will be held cipal product under four main heads, at Christ church, founded nearly fifty years namely, planes, organs, plane and organ age by the late Dr. Melancthon Hoyt, the materials, and instruments and materials pioneer missionary priest of the Episcopal not specified. There were 249 plane establishments, 94 organ establishments, 101 establishments producing principally piano and organ materials and 181 establishments manufacturing instruments ments does not represent planes exclusively, for such establishments frequently manufacture organs also, and sinhlarly the organ establishments produce a limited number of planes.

Planes and Organs. The bulletin, however, gives the total have long felt cramped in their old build- number and aggregate value of planoa ings, and both need new quarters. While and organs produced in all classes of retablishments. Of upright planes 251,957, or more than a quarter of a million were quate for the city authorities. In the manufactured in the year 1805, and their event some such trade is not made, then aggregate value was \$37,397,674. Of the aggregate value \$4,162,053. Of pipe be noticed that the aggregate value of times that of the organ product and that the number of pinnos was rather more Cheyenne. bor, headed by President Gompers, arrived than twice the number of organs. The here today to complete arrangements for number of upright planes manufactured

1900 by 85,171. The manufacture of planes is largely duced in the United States. The number building. The exposition was pronounced produced in Chicago was 42,953. Boston

> HENRY TOO FREE WITH GUN Tries to Shoot Several and is Himself Shot and Instantly Killed.

STURGIS, S. D., Aug. 23 - (Special.)-Mike Henry, oldest son of Mr. and Mrs. J. F. Henry, was shot and killed by Sylvester Carney at 3 o'clock Wednesday afternoon on Deer creek, near White Owl. Young Henry, it is reported, had been making threats to kill someone. Henry got ready to pull out, he told Carney he would kill him and snapped the gun at him several times, discovering Granger, who were witnesses, took the then mounted a horse and rode over to Mike Carney's house, where he frightened the women and secured a shotgun, re-Carney, but Freel was beyond reach of the gun. He pulled his gun down on Carney and said he would kill the whole d-m outfit, when Carney thought matters had gone far enough and shot Henry with a six-shooter. Carney claims the shooting was done in self-defense, and was supposed to have started for Sturgis Wednesday to surrender himself. Richard Freel was sent here to notify Coroner McSloy and Sheriff Stewart of the affair, arriving in Sturgis with the news this morning. The remains and the shotgun were left where the killing occurred, showing one barrel of the cocked. The coroner and sheriff left today for the scene of the shooting.

Episcopal Convocation.

YANKTON, S. D., Aug. 23.-(Special.)-Preparations are on foot here for the entertaining of the delegates to the triennial convocation of the Episcopal mission ary district of South Dakota, which gathering includes delegates from the three deaneries, the Eastern, Black Hills and Niobrara, the last named an Indian deanery, to be in session this week on the Rosebud. The delegates will be two in number from each parish and mission, with many workers in the jurisdiction, from the many Sunday schools and Women's Auxiliaries to the board of missions. The parishes and missions number ninetyeight in the Indian field and some fifty-odd in the white field. General Secretary Lloyd of the board of missions is expected, as is Miss Emery, general secretary of the Woman's Auxiliary. Bishop Hare will be present, and also the bishop coadjutor, Rt. Rev. Field Foote Johnson, D. D. The first gathering will be a reception to be hold Tuesday evening, September 3, and the business and services of the convocadustry the census bureau classified the tion will take up the better part of the church in this section.
