Corset Accessories

In our Corset Department you will find all the corset accessories which makes corset fitting a success. Some figures cannot be fitted properly without an extra pad here and there. Sometimes the hips need attention, other times the bust, so we carry a carefully selected line of hip pads and bust forms to fill out the deficiencies. They are all light weight, and after being attached to the corset, not a trace of them are noticeable.

SCHWAB IS MOST OPTIMISTIC Steel Magnate Looks for Steady Increase in Steel Trade for Many Years.

NEW YORK, Aug. 29,-Charles M. Schwab is optimistic over the steel and iron situation. He sees no reason for discouragement, much less pessimism. He said in an interview that his optimism was based on the observation that during the thirty years in which he has been identified with the steel and from husiness there has been a constant increase in that business almost year by year, and therefore there will be no stoppage now. He continued: "The extension of our railroads obviously necessary, and the increase in our steel producing capacity follows as a

matter of course. "The increase in demand will most assuredly go on, and those who saw 1,000,000 tons of steel used in 1990 and nearly 28,000, 600 tons in 1947, will live to see the time, stand is underlaid with soft shale and need 50,000,000 tons of steel. All records in the steel and fron trade will be eclipsed in the not too distant future.

"Do not misunderstand me. We may have, we shall have, recessions, but the ultimate result is never in doubt."

STRIKERS SUE FOR DAMAGES Minnesota Miners Shot by Officers Will Test Matter in Courts.

ST. PAUL, Minn., Aug. 29.-A special to the Dispatch from Hibbing, Minn., says suits for damages aggregating \$500,000 will be instituted against the Steel trust and St. Louis county by striking miners who have been shot or imprisoned by sheriffs. Armed guards still patrol all trust property and despite the reports to the contrary the strikers say they are making gains. Two men were shot this week by deputy sheriffs. Within a week twenty strikers have been arrested charged with rioting, but the charges could not be sustained in the local municipal court.

Passengers at Fremont Are Refused Transportation to Omaha, but Given It to Missouri Valley.

Eliminating local travel on Overland Limited trains, has put the Union Pacific in much the same fix as the old woman found herself in when she attempted to cross the bridge with the fox, the goose and a peck of corn.

When it issued the order, effective Au gust 26, that these trains should accept no more local travel, its accompanying reason was that traffic had increased to such an extent the trains no longer could make both the time and local stops. But almost in the same breath the railroads were declaring the 2-cent fare had not increased business. Here was a boomerang, Another excuse given-not by the railroads that a demand for an "exclusive" train brought forth this order. strike breakers have left the companies and

Enger Buyers and Market Can Absorb All that Come.

Consignments of sheep have come in with a tremendous rush during the last three days. Last week there were practically no sheep on the market. It was almost truthfully said that there were more buyers than sheep. The flattering market reports sent out last week, however, had the effect of starting up the shipments with a great rush. Last week the shipments were over 19,000 behind those for the same time in 1906, but the scale is now turned and the net increase over the receipts of last year is 10,049. The total receipts for the last three days reach the large figure of 52,-527. The estimate yesterday was 17,009, which is equal to the receipts at Chicago and over three times as many as at any other market.

The market yesterday was very active and the commission men still have more orders for feeders than they have been able to fill. Besides the commission men there are many of the regular buyers of feeders on the market, and this number has increased this year to a large degree. Feeders of sheep have sprung up as if by magic and everyone sems to be anxious to get into the business. Many predictions of failure in past years have proved untrue and investors in sheep have coined money with ease. This accounts for the eagerness of the buyers and the numbers with which they throng the sheep barns. There are enough advance orders to take up all of the consignments for the balance of the week. The commission men who handle sheep expect the market to start with great activity next week. There has been a strong builish tendency these last three days in the face of the large shipments. Every day the market closed strong and steady. There was a large meeting of the Amerwas no unnatural falling off in prices. The top market was commanded by the best grades of mutton lambs. Nearly 1,000 Idaho and native lambs sold at 17 per hundred. The choicest went as the hall, at 8 a. m. market closed strong and steady. There high as \$7.28. The bulk of the sales went at \$5.75@6.00. There has been a shortage in the feeder barns all the week. which has not been supplied by the heavy

Bruce McCulloch says of the Omaha market, with reference to feeder grades of sheep, that it is the best in the world. The reasons for this are many. Omaha is situated in the corn the dense thicket shots were heard. Later belt and within easy reach of all kinds Russ came home, excited and out of of rough feed as well. The sheep which breath, kinsed his baby girl, walked from come to this market are large-boned, northern grown animals, hardy of character and free from disease. They are of altogether better quality than the sheep of the southwest. They put on fiesh much more rapidly and look better. Hence this market has always been patronized by the sheep feeders. They will be dere in plentiful numbers for five or six weeks
