vance Friday.

LITTLE ACTIVITY IS APPARENT

lables Are Somewhat Basier Than Previous Day, but Prices Are Holding Well Despite the Henry Selling.

OMAHA, Sept. 21, 1961.
After the strong advance of yesterday he market opened firm and steady, but little activity was shown. ittle activity was shown.
Cables came some easier, but prices are holding well in spite of the heavy selling.
Wheat opened firm and steady, maintaining well the advance of yesterasy. Most all of the long wheat has been sold and the market has taken it well and is proving the predictions of the buil factions. September wheat

tember wheat opened at 90% and closed all 10%c.

Corn opened very firm and heavy buying and replacing of lines which were sold on the advance was the strong feature. September corn opened at 57c and closed at 15%c.

Oats opened some easier and worked down some on free selling, which did not have the least support. There was some easing off on the cemand and trading died down almost to nothing. September oats opened at 55% and closed at 51%. Clearances were 44,000 bu. of corn, none of oats, and wheat and flour equal to \$17,000 bu.

Liverpool closed %6%d lower on wheat and %d higher on corn.

sentiment in the corn pit was bearish because of the failure to materialize of frost in the corn belt, which had been forecasted for last night. Liberal receipts and a break in oats were additional weakening influences. There was considerable weekend profit taking in evidence throughout the entire session. The close was about steady. December opened \$40% lower at \$8008\$4c, sold up to \$85% and closed at \$58%. Local receipts were \$63 cars, with 292 of contract grade. Oats were weak, owing to selling brought

out by liberal primary receipts, which were double those of the corresponding day a year ago. Absence of demand by leading bulls also had a depressing effect. December oponed 1/201/1/1c lower at 52%,053c, held within that range and closed at 52% Local receipts were 255 cars.

Provisions were quite firm early in the Provisions were 235 cars.

Provisions were quite firm early in the day because of moderate demand based on a 5616c advance in live hogs. Later, however, the market eased on profit taking. At the close January pork was off 24,65c at \$15.224, lard was unchanged at \$3.556 to 574 and ribs were down 24c at \$7.924.

Estimated receipts for Monday: Wheat, 27 cars; corn, 1,045 cars; oats, 434 cars; hogs, 32,000 head.

The leading futures ranged as follows:

hogs, 32,000 head. The leading futures ranged as follows: Articles. | Open. | High. | Low. | Close. | Yes'y

LONDON, Sept. II—The supplies of money were plentiful and rates were easy in the market today. Discounts were quiet. Business on the Stock exchange was of the usual weak-end dimensions. The tone was cheerful owing to investment purchases of consols and a few other gilt-edged securities, while home rails hardened on

sommon to medium grades went of that much. During the latter part of the week, with lighter receipts and a pretty good buy. Ing demand, the market has firmed up so that at the close there is very little difference in the market as compared with the close of last week. Some grades might be a little easier, but the general market is right at steady.

There has been a large business doing this week in stock cattle and feeders, both receipts and demand have been large. The receipts, however, have been sufficiently liberal as compared to the demand to give the market a downward tendency. In spite of efforts on the part of operators to maintain values a good many cattle have sold lower, declines in many cases being fully 15625c for the week. On the other hand.

44

right good, fleshy cattle and right good yearling stockers have held up very well and at the close of the week are very little different, if any, from the market prevailing at the close of inst week.

ANNOUNCEMENT

As announced by us last January, we then retired from the promotion business, confining ourselves to our former business of mine operating, successfully devoting our time to the development of the mining enterprises in which we are jointly interested with our clients. As we stated then, any future offerings of mining securities which we would make would be strictly in the nature of an invitation to join with us in the development of any exceptionally meritorious mining enterprise which must present the greatest certainty of success and the minimum of risk.

We now have such an opportunity in the stock of the Goldfield Jupiter Mining Co., of Goldfield, Nevada, of which we have just succeeded in securing the entire allotment to be sold, amounting to 200,000 shares of treasury stock.

The Juipter mine, owned by this company, is too well known to need but slight mention or indorsement by us. The property is situated in the Sandstorm section of the Goldfield district, immediately north of the mine by that name and on the strike of the same leads from which the phenomenal production was made on this and the bonanza mines in the central portion of the camp, such as the Mohawk, Jumbo, Red Top, Florence, etc., which have during the past two years been productive of so many millions in gold.

The Jupiter is developed by a two-compartment shaft to a depth of 270 feet, with over 400 feet of lateral work on the 200 and 254-foot levels. It is equipped with the most complete plant of machinery in the Goldfield district, consisting of a 50-horse power electric hoist, air compressor, machine drills, etc., and the large amount of work already performed and in progress places the property on the very verge of developing into a shipping and producing mine, upon which basis it is the determination of the abie management to place it at the earliest possible moment, in which worthy effort we are confident they will meet with early success. It is the firm decision of the Directorate of the Goldfield Jupiter company

that the present allotment of 200,000 shares should net the treasury not less than \$1.00 per share, which figure we believe it to be actually worth today, based on the intrinsic value of the property represented, and we are pleased to announce that we have secured it on a basis which enables us to receive subscriptions from our clients at the price at which the original allotment was sold last January, namely, 60 cents per share, at which price we invite subscriptions and unhesitatingly recommend its

As all our special offerings in the past have been greatly oversubscribed, we suggest that you telegraph your order for Jupiter stock immediately, and let remittance and subscription follow by mail, as this allotment will undoubtedly be several times oversubscribed, and first come will be first served, all orders being entered in the order in which they are received.
