An imitation takes for its pattern the real article.

There was never an imitation made of an imitation. Imitators always counterfeit the genuine article. The genuine is what you ask for, because genuine articles are the ones with merit. Imitations come and go; they are not advertised, but depend for their business on the ability of the dealer to sell you something claimed to be "just as good" when you ask for the genuine, because he makes more profit on the imitation. Why accept imitations when you can get the genuine by insisting.

Secure imitations—Get what you ask for.
