WORLD'S GREATEST TELESCOPE Huge Observatory Instrument with Which the Solar System Will

Be Studted.

One by one this country is equipping itself with a group of the greatest observatories in the world. On the summit of Mount Wilson, a peak in sonuthern Cally fornia, is a solar observatory which wall

It is under the patronage of the Carnegle institute at Washington. The income of the strenuosity of President Roose- as the site because the atmosphere there-One of the most important subjects of re-

> termine how much faith can be put in the nebular hypothesis. The popular notion is that the astrono mer points his telescope directly at the sun and fires his vision point blank across the chasm of millions of miles. Instead, the errant sun rays are lassooed by a coelestat, a great circular mirror driven by clockwork in such a manner that it throws its light into another mirror above, and this in turn sends the long, concen-

nebular origin, and who will try to do-

lastment to each other, so that the solar and go to Ffty-second street.

beams may be shot into the building, no matter in what portion of the sky the sur may be situated. At the further end of the building the reflected sunbeam strikes a concave mirror, which catches the light, and, flashing it back toward the opening whence it first entered, focusses it into

perfect image of the sun-The greatest reflecting telescope in the world is to be the climax of the equipment mild sensation last week in Pueblo, Colo., of this observatory. A huge lens, five feet a city forty-five miles away. Some resiin diameter, eight inches thick and weigh- dents had been wondering whether a new ing a full ton, is being perfected at the and unknown comet had made its appear-Mount Wilson laboratory in Pasadens. To ance in the northwest and was dazzling such exact nicety must its surface be ground and polished it will require three when several would-be-famous astronomers years to complete it ready for mounting With great patience and the highest me-

chanical skill it is being fitted for its momentous work. When completed it will be transported by an auto truck up the narrow trail to pueblo Star-Journal, who was sitting on the observatory, and there will be mounted under a rotating dome fifteen feet in diameter. With this monster eye it will be possible to penetrate further into the depths of space than by any instrument ever before designed by man.

Thousands of tourists from all parts of the world visit the observatory every year So great is the popular interest in the work there it has been decided to establish a museum of astronomical photographs in connection with the observatory, to be open to the public at all times.-Philadelphia
