The beginning of the ending of the Cass street school has begun. When this building was constructed it took the place of the Dodge street school, now used as police headquarters and city jail, and to the Dodge street district, which has a large section of town lying in the northern part of the city. It was for several years one of the most congested buildings in the city, but this year it is practically the only house not crowded for room. Last year there was a slight decrease in attendance, but this year the decline is so great as to cause comment. The decrease in attendance is due to the demolition of dwellings to make room for business blocks in the Third ward. The most important change is due to the construction of the Northwestern freight depot, which resulted in the tearing out of fifty or more children from the district. People crowd the car wherever it is shown and the excitement in the product of Nebraska and Wyoming are a surprise and a revelation to the people of the middle states. The advertising has been of great value to the state as well as to the railroad for all the home-seekers' excursions which are now running are crowded with seekers for Nebraska and Wyoming land." C. ONLY NECESSARY TO TREAT THE STOMACH Claim of Central Figure in Recent Controversy is Novel The new theory advanced by L. Y. Cooper relative to the human stomach has attracted such widespread attention that the public in cities visited by the young man has been joined by many physicians in a discussion of his beliefs and medicine. Mr. Cooper says that human health is dependent almost entirely upon the stomach. He says that no disease can be conquered without first alleviating all stomach disorders. He further says that most men and women of this generation are half-sick, owing to degenerate stomachs. And lastly, he claims that his New Discovery medicine will rejuvenate the human stomach in 99 days. Cooper has been traveling from one city to another, conducting in each what he calls a campaign of education. For the last year he has met the public in the larger cities of the country, and his success has been phenomenal. Thousands of people have flocked to his headquarters wherever he has gone, and the sale of his medicine has been beyond anything of the kind ever before witnessed. Possibly the most interesting feature of the attention this young man has attracted is that his army of followers, whom he has converted to his beliefs, are all of them, he says, in way on the subject. The following statements are from two well known residents of Chicago and Boston, respectively, and the enthusiasm characteristic of Cooper's admirers generally. Chicago, says: "I have been suffering for a long time with a combination of stomach troubles, catarrh and constipation. I had a gnawing pain in the pit of my stomach,

TALK OF THE POLITICIANS 'Have You Registered?' Succeeds Greeting, 'Good Morning.' BOTH PARTIES AFTER THE VOTE Democrats Are Reading Every Nerve and Mayor Jim Calling on the Unregistered to Get Into Line. Politically the chief interest centers in the registration of Saturday. The democrats apparently are making unusual efforts to get out a full registration and the matter has reached a point where Mayor Dahlen has sent word to his friends and city employes that each will be held personally responsible for the registration in his district. Saturday afternoon will be the grand rallying time for the city forces. Under the regulations they do not work during the afternoon of Saturday and they will be expected to devote the time to the polling places. The republican committee also is straining every nerve to get out a full registration and the usual morning greeting of active politicians has given way to "Have you registered?" With practically 50 per cent of the vote unregistered on the last day of registration the committees fear that in some respects there will be difficulty in getting all voters registered if they wait until after the close of working hours and for this reason they request all who can to register in the morning or at noon. At the city hall more interest is being manifested in the should the city improvement bonds, since practically all paving now done and all storm sewers contemplated depend upon the approval of the proposals for bonds for intersection paving and sewers. The park board's plans also depend on the \$50,000 for which it asks. Not only the management of the high school, but the construction of ward schools where necessary wait upon the approval of the proposal for school bonds. Members of the Southwestern Improvement club were amused by a report from a committee which visited the mayor to ask him to vote the board street sewer outlet contract. The committee's chairman said he arrived at the mayor's office while the councilman candidate for sheriff was pleading for the mayor's approval of the contract. According to the report of the chairman the councilman said, in effect: "Mr. Mayor, you should approve this contract because to renege on it would not be fair to his contractor who has presented the lowest bid. Other men want the work and there can be no doubt that they will offer to do it for less than this bid."
