merely "cultivating inabilities on lentils and discolored water," he calculated on making the vegetarians mad.

He is a man who would have made a name in any profession had not medicine, and especially the study of lunacy, claimed his energies and talents at an early age.

Although he receives the largest fees in London from wealthy patients, there is no medical man who does more work for pure charity.

He is a man who is unforgettable to those who have once seen him, for he cultivates an enormous pair of side whiskers of the Dundreary pattern.

IMMENSE FARM IN AFRICA

American Millionaire Settles Down on British Ground.

HE HAS MANY NEGRO SUBJECTS

His Task is to Transform Jungle into Region of Peace and Plenty—Mighty Medicine Man.

LONDON, Oct. 31.—(Special.)—America is getting too crowded for Americans who hanker after a life of unconventional freedom and adventure.

There is hardly a region of the globe that Mr. McMillan has not explored. He is as familiar with Egypt as he is with his native town and he has followed the tracks of Livingston and Stanley in Africa.

His property in East Africa is situated near Nairobi on the line of the new Uganda railway. It consists of 20,000 acres and really comprises two farms, the Juju and the Juja farms.

In this district where only a few years ago degraded negroes practiced their terrible rites in swamps and jungles, there are today a group of the most modern buildings.

The latest additions to the equipment of these Americanized farms are two wonderful motor cars which have just been completed in England for Mr. McMillan's farm.

Although he receives the largest fees in London from wealthy patients, there is no medical man who does more work for pure charity.

that few passengers could tell they were not traveling on the best pneumatic. Provision is made, however, for cases in which even these precautions may fail to protect the cars from break-down.

The materials of which the cars are constructed are of great importance in tropical climates and those two cars have been built wherever possible of steel.

A skilled chauffeur and mechanic will be taken out from England to look after the cars at first, but Mr. McMillan expects to train his native servants in their management before long.

They declare that his electric plant is a device for harnessing the lightning and they are quite sure that he has entered into an alliance with the great Juju himself.

On his way through Paris a few weeks ago Mr. McMillan purchased a remarkable model of the Sphinx, by Mrs. David Garrick Longworth, an American artist resident in Paris.

They have been built after Mr. McMillan's own designs and are especially constructed to meet the requirements of this out-of-the-way corner of the world.

There are no roads worthy of the name. The only substitutes for roads are the rough paths beaten hard by the bare feet of countless thousands of negroes and deeply rutted by the native bullock wagons.

He is a man who is unforgettable to those who have once seen him, for he cultivates an enormous pair of side whiskers of the Dundreary pattern.

ALL HAIL TO KING EDWARD

Sixty-Sixth Birthday of England's Monarch Observed with Pomp.

PAGEANT WITH RULERS OF PAST

Lord Mayor's Show One of the Most Gorgeous Ceremonies of its Kind Ever Undertaken in London.

LONDON, Nov. 9.—The birthday of King Edward, who was born November 9, 1870, was observed throughout the British empire with the customary military and naval salutes and displays.

English builders have awakened to the fact that American ingenuity has stolen their pious while they slept, but it is too late. From more than a dozen boardings of important work in the metropolis as the Yankee firm starts the Englishman in the face, and behind the boardings London's new race of buildings is arising.

For besides constructing their newest buildings for them the Yankee concern is revolutionizing the aspect of London's architecture. For the old dingy, begrimed buildings that crowded its principal streets and gave it the appearance of a city years behind these advancing times, the American firm is substituting pretentious modern buildings, the elaborate facades of which stand out with startling clearness.

To realize how complete has been this conquest of London by the Waring White Building company one has only to stroll through the Strand, Cockspur street, Aldwych and Piccadilly and keep a sharp eye open for the newer buildings.

They organized a company under the English laws and went after every contract in sight with true American energy. Before the local builders realized they were in the field they had captured a half dozen of the biggest jobs to be had.

They have been built after Mr. McMillan's own designs and are especially constructed to meet the requirements of this out-of-the-way corner of the world.

He is a man who is unforgettable to those who have once seen him, for he cultivates an enormous pair of side whiskers of the Dundreary pattern.

LONDON, Nov. 9.—Among the list of those to whom pensions are granted, printed in the Journal Official, is the name of Major Dreyfus. He is to receive \$60 annually. His service extends over a period of nearly thirty-one years.

The route of the procession was elaborately decorated and the pageant was viewed by enormous throngs of sight-seers.

The new lord mayor of London, Sir John C. Bell, who was elected September 25, was formally installed in office today.

If you have anything to trade advertise it in the For Exchange columns of The Bee Want Ad pages.
