# GRAIN AND PRODUCE MARKET

## Slump Follows the Boom of the Previous Day.

## FOREIGN BUYING IS NOT LARGE

### Wheat Falls Off Heavily and Loses Most of the Big Gain It Had Made on the Day Before.

OMAHA, Nov. 12.

Grain takes a slump after yesterday's boom. Foreign buying was not large, although good acceptances were reported.

Inquiries were fair but the question of financing checks purchases.

Wheat fell off heavily and lost most of the big gain made yesterday.

Weakness in the northwest, heavy selling by commission houses who were flooded with selling orders were the main influences.

December wheat opened at 87⅛c and closed at 85¾c.

Corn was weak with wheat and the absence of any support. Demand was light and the determined selling by longs broke the market and corn went off several points. December corn opened at 51¼c and closed at 49⅝c.

Heavy selling on all options and the weakness in wheat and corn threw oats off and the break was severe. Little or no support was given and the market closed weak; December oats closed at 44¼c.

Primary wheat receipts were 762,000 bu. and shipments were 484,000 bu., against receipts last year of 1,236,000 bu.

Corn receipts were 189,000 bu. and shipments were 256,000 bu., against receipts last year of 429,000 bu. and shipments of 290,000 bu.

Clearances were 99,000 bu. of corn, 750 bu. of oats and wheat and flour equal to 276,000 bu.

Liverpool closed ¼@½d higher on wheat and ¼@½d higher on corn.

Bradstreet reported 280,000 bu. of wheat and 56,000 bu. of corn taken for export.

## CHICAGO GRAIN AND PROVISIONS

### Feature of the Trading and Closing Prices on Board of Trade.

CHICAGO, Nov. 12.—Wheat prices on the local exchange broke more than 2c today, because of heavy liquidation. At the close wheat for December delivery was off 1⅝c. Corn was down 2@2¼c. Oats were 1¼c lower. Provisions were off 12½c to 35c.

The market was firm at the opening because of the buying of shorts who were actuated by the reports of higher prices at Liverpool. The market, however, soon became weak on selling by two prominent commission houses, whose lead caused many of the smaller traders to turn to the selling side of the market. A report that cleared a large amount of No. 2 red wheat is being held by exporters because they are unable to dispose of it, but which was late denied, had a weakening effect on the early market. The suspension of a small milling firm and a bearish turn in corn gave additional impetus to the selling movement. During the last hour shorts bought freely and this caused the market to close steady. December opened unchanged to ¼c higher at 94¼@94¾c, sold off to 82c and closed at 82¾c. May ranged between $1.01¼ and $1.03⅝, and closed at $1.01⅝@1¼. Clearances of wheat and flour were equal to 76,000 bushels. The world's visible supply as shown by Bradstreets increased 750,000 bushels. Primary receipts were 762,000 bushels, against 1,235,000 bushels on the same day last year. Minneapolis, Duluth and Chicago reported receipts of 727 cars, against 872 cars last week and 982 cars one year ago.

The market for corn was also liberal selling of the December option by prominent holders. This brought about a break of 2¼c in the price of that option. The financial situation and weather suitable for the curing of the new crop were largely responsible for the selling pressure. The market lacked support and was very weak the greater part of the day. The close was weak. December opened a shade lower to ¼@¾c higher at 57¾@57⅞c, sold off to 56¾c and closed at 55⅝c. Local receipts were 18 cars, with 23 of contract grade.

Oats broke sharply because of the weakness of wheat and corn. The market closed weak. December opened ⅛c lower at 47¾c, declined to 46½c and closed at 46¾c. Local receipts were 223 cars.

Provisions were weak on a resumption of freeselling by local packers. The principal seling pressure was on pork. A 100@50c decne in the price of live hogs was a depressing influence. At the close January pork was off 35c at $12.90. Lard was down 12½c at $8.02½. Ribs were 25c lower at $8.87½.

Estimated receipts for tomorrow: Wheat, 34 cars corn, 90 cars; oats, 107 cars; hogs, 23,000 head.

## WEATHER IN THE GRAIN BELT

### Fair and Warmer on the Tab for Wednesday.

OMAHA, November 12, 1907.

The cool wave has extended over the east and south. Freezing weather, with killing frosts, is reported in Louisiana, Oklahoma and Texas. The temperature was below zero in northwestern Nebraska this morning, and temperatures slightly above zero were general throughout the upper Missouri valley. Light snow flurries continue scattered over the central valleys, but the weather has cleared generally throughout the Rocky mountains. The outlook is favorable for fair in this vicinity tonight and Wednesday, with warmer Wednesday.

# NEW YORK STOCKS AND BONDS.

## Conservative Financial Powers Discourage Trading in Margins.

## FALL IN PRICES RESULTS

### Buying Which Will Give Stocks Lodgment Outside Speculative Market and Bring Cash from Hiding Encouraged.

NEW YORK, Nov. 12.—The impression got abroad in the stock market today that the kind of operations which began to make themselves felt yesterday were not approved by the conservative financial powers, whose efforts are all bent at the present time to the mending of the situation. There was a discontinuance of the small ventures on margin which came into notice yesterday. This left the market uncertain and poorly supported. The weakness in the copper group intervened in this state of affairs, and there was no power of resistance to the sympathetic influence of this factor.

The passing of the dividend on a minor property of the Amalgamated Copper company was the immediate occasion of selling of the coppers, but the whole situation in the trade came into discussion. American Smelting was most acutely affected and this gave rise to conjectures of a coming reduction in the dividend on that stock. Even the electrical equipment companies were affected to some extent, the falling off in demand for copper being presumed to come most largely from curtailment in that industry. The renewed sagging tendency of copper, which was communicated to the London metal market today, renewed the doubts over the rate of consumption in the trade, which had been somewhat relieved at the time of the heavy buying of the American output by foreign consumers. There was a disposition to bring into question in a comprehensive way the effect on earning power of corporations and probable dividend payments, and of the setback to trade which must follow the financial entanglements. Reports from various quarters of reduction of operating forces by factories furnished food for the discussion. It has been remarked also that an upward movement in the price of securities leads to early discontinuance of an important part of the investment demand for small lots of stocks, which has been so influential a factor in the absorption and definite removal from the market of a floating supply of securities. The extension of this process is regarded as desirable as making for the health of the market in every way, by broadening the field of interest in the affairs of the corporations, by finding a solid lodgment for large aggregate holdings, as distinguished from the ordinary holdings looking merely to a profit on price advances, and by attracting funds which have been withdrawn from other uses in the present contingency and bringing them back into the channels of the banking operations of the country. It is believed that the discouragement offered by financial leaders to attempts to revive purely speculative operations, this policy being leprogated by the motives described, was more responsible than any other cause for the action of the stock market today. The demand for currency reflected some additional urgency early in the day, but the declining premium on currency again indicated an easing of the strain. More gold was engaged for import, but the gold movement into and out of the Bank of England showed a balance in favor of receipts. Discounts eased both in London and Berlin, and the sterling exchange rate fell back both in Paris and Berlin. In New York also the early further advance in foreign exchanges was not maintained. The report of the London stock market and settlement revealed that the selling of stocks in that market has been somewhat overdone and the covering of shorts by the bears worked an upward movement of prices. This was an influence in the early advance in New York, which was more than lost in the subsequent reaction. The reported failure of one of the larger banks in Portland, Ore., came late in the day and helped to keep prices down to the end.

Bonds were irregular. Total sales, par value, $3,188,000. United States 2s declined ½ per cent on call

### Foreign Financial.

LONDON, Nov. 12.—Money was in good demand for the settlement on the Stock exchange today. Discounts were a shade easier on the better monetary outlook. On the Stock exchange the recent monetary crisis resulted in stiff carry over rates for the settlement, which has just commenced, the charge for Americans being 6 to 8 per cent. The business transacted for the new account was on a fair scale. The improving monetary outlook, owing to the inflow of gold into the Bank of England, consequent upon the 7 per cent bank rate, and the cancellation of some of the New York gold engagements, favorably affected gilt-edged securities, while investors took advantage of the low level of home rails to increase their holdings. Americans started at well above parity in sympathy with the overnight New York news, but early buyers turned sellers around noon and prices drooped. A period of dullness followed, but the receipt of the New York opening prices with good buying imparted strength to the market and prices closed firm at a fraction below the best quotations of the day. Financiers and Kaffirs benefited by confident buying at Paris.

BERLIN, Nov. 12.—Prices on the Bourse today were rather firm upon the advices from London. The money rate was easier.

PARIS, Nov. 12.—Prices on the Bourse today opened firm on the reassuring New York advices and closed quiet and heavy.
