

Rev. J. B. McLaughlin Praises Per-una.

It Is Undeniable That Per-una Is a Cure For Catarrh.

Rev. J. B. McLaughlin, 416 5th St., N. W., Washington, D. C., formerly city attorney of Little Rock, Ark., now an attorney residing in Washington, writes: "Catarrhal complaint in all its various forms is so general, that the public should be informed of a remedy for the same. It is undeniable that Per-una is a cure for that disease. From experience and general knowledge of its beneficial use I have no hesitation in giving it my earnest endorsement and recommendation."

CATARRH soon destroys the elasticity of the mucous membrane, producing a flabby condition. This leads to watery secretions, sometimes thickened mucus, and constitutes altogether a very disagreeable condition. It makes no difference whether the catarrh is confined to the nose, head or throat, or whether it is located in the lungs, stomach or bowels. The essential condition is the same. Anything that tones up the system tends to the relief of the catarrh. Anything that purifies the system helps to clear away the poisonous secretions from the body. Per-una has a world-wide reputation as a catarrh remedy. We have many testimonials from all parts of the country and from all walks of life, attesting to the benefit of Per-una in catarrhal diseases. "Mr. Boss Craig, Fork Vals, Tenn., writes: 'I had catarrh of the head for two years and had abandoned all hope of being cured. To my surprise, Per-una cured me sound and well.'"

AFFAIRS AT SOUTH OMAHA

Pennsylvania Railroad Officials Inspect Packing Houses and Yards.

SEWER WORK MOVES SLOWLY

Error in Footing Totals for Justice of Peace Leaves Two a Tie and Causes Considerable of a Flurry.

A large party of officials of the Union Pacific and Pennsylvania railroads visited the South Omaha packing district yesterday morning on a general tour of observation. It is said by the packing house officials that the visit was purely for personal observation and bore no weight in local or financial affairs. The party was splendidly entertained by Swift and Company, and the members expressed themselves warmly grateful and well pleased with the clean appearance and thrifty conditions of the plant. They were especially interested in the new beef killing house, for it is something new in many features of architecture and construction. One-half of the building is complete and in daily use, but the north half is only begun. The company is working steadily on the foundations. Repairing Damaged Building. Swift and Company are busily engaged in repairing the fertilizer which was damaged by fire a week ago. These repairs are of a temporary nature and the expectation is to build a new building next summer, as soon as the beef house is completed. The floors and the roof of the old building will be restored. The work has already so far progressed that the company has been able to handle part of the offtal as before. The rest is sent to other points for reduction. In the course of a month the department will be in full working order again. Sewer Work Is Slow. The work on the Mud creek and the N street kitchen sewers has moved very slowly for several months. The work is being done under many difficulties. In the N street kitchen sewer the machinery is inadequate for rapid work. The National Construction company have good excavating machinery, but have met with many difficulties in the laying of concrete. The spillway at the river bank was a very difficult proposition, on account of the treacherous foundation. In many places piles had to be driven to support the concrete to keep it from settling and cracking too much. The lower section of the sewer proper is progressing quite satisfactorily. The earth is at present a very hard, blue clay. It is hoped that this material will last through the winter. If so, the work will be greatly simplified. If sand or loose material is encountered, or quantities of water, the excavation will have to be done under a hood. This is a shield to prevent caving
