BLOOD POIS

HUMILIATING-VILE-DESTRUC

The first symptom of Contagions Blood Poison is usually a little sore or ulcer, which is quickly followed by a red rash on the skin, swollen glands in the groin, falling hair, ulcerated mouth and throat, and often copper-colored splotches on different parts of the body. As the blood becomes more fully contaminated with the poison, pustular eruptions and sores break out on the flesh, and in extreme cases the nerves and hones are attacked and the finger nails drop off. Then the sufferers find there selves diseased from head to foot with this humiliating, vile and destructive poison. No other disease is so highly contagious; many an innocent person has been inoculated by handling the clothing or using the toilet articles of an infected person. There is but one certain, reliable cure for Contagious Blood Poison, and that is S. S. S. It attacks the disease in the right way by going down into the circulation, and

neutralizing and forcing out every particle of the poison. It makes the blood pure and rich, tones up the system, and completely and permanently cures this disease. S. S. S. has cured thousands of cases of Contagious Blood Poison. If you are suffering with this debasing and destructive disease begin the use of S. S. S. and get the poison out of your blood before it

permanently wrecks your health. We have a home treatment book on the discase which we will send free to all who wish it, and in addition our physicians will give without charge any medical advice needed.
