1.55. HOGE-Hogs were active this morning at an advance of 15c over yesterday's market, everything being sold and weighed up at an early hour. The hogs sold very largely at 54.50, with quite a sprinkling as high as 54.58, and a top at \$4.50. Yesterday 54.55 was the leading price with about 25 per cent of the sales at \$4.50, and a top at 14.55.

per cash of the sales at 84.0, and a top at 14.65. It will be remembered that last weak the market was lower every day from start to finish. This week has been just the reverse. On Monday the market was the lowest of the massen, begs selling on that day on an average of 22.56. Prices have been higher svery day since then, the weak closing offsic higher than at the closes of last weak. The recolpts this week have been very light at this point, a large falling off as com-pared with the previous week and with a year ago. The rapid advance in the price of hoge has flept everyone guessing as to the future of the market. The bears who were predicting that hogs would sell right around 24.00 have been forced to give way to the buils, who belives that there is noth-ing in the general business situation to war-rant such low prices. The bears, however, contend that the present Edvance is only a spurt and that prices will take a ture downward in the near future. No cone can tell, however, and it remains for the future OMAHA, Nov. 30, 1907, An area of low pressure from the north-west moved down over the Missouri valley since the last report, and is central this morning over the upper Mississippi valley. This depression caused high winds through-out the Missouri valley last night, and is accompanied by light snows in the upper Mississippi valley and upper Lake region this morning. The weather is warmer from the mountains east over the central valleys to the lakes, but is followed by colder in this vicinity to-night, with con-tinued fair tonight and Sunday. Omaha record of temperature and pretell, however, and it remains for the future to decide. Representative cales:

Omaha record of temperature and pre-cipitation compared with the correspond-ing day of the past three years:
