BOISE, Ida., Dec. 26 -Judge Wood this morning denied the motion filed by the defense in the Pettibone trial that a verdict of acquittal be advised by the court. In considering the motion to advise acquittal for want of sufficient corrobo rative evidence, Judge' Wood reviewed the independent testimony on each of the crimes confessed by Orchard and stated that in his opinion there were sufficient

corroboration of each of them to require the submission thereof to the jury. Conluding, Judge Wood said:

"I think the facts already in evidence tend to show a conspiracy as contended for by the prosecution, and 1 think that the independent testimony sufficiently

tends to connect the defendant Pettibone therewith to require the submission thereof to the jury." Judge Wood stated that there was independent testimony connecting Pettisone with the killing of Steunenberg ex-

House for this letter are met with refusal Now it is clearly impossible for Admiral Brownson of any of his line officers to make public a copy of the letter without incuring the risk of a court-martial on charges of disrespect toward their superior officer, the president of the United States So they can only look for a change in the executive mind, or congressional investigation, which will develop all the facts.

It may be stated in the absence of the ext of Admiral Brownson's letter that his bjections to the execution of the president's order to put a surgeon in command of the hospital relief ship was twofold. In the first place, like every line officer, he believed that the subordination of any line officer, no matter how low in grade to a staff officer on shipboard, was had policy and subversive of naval discipline. But a stronger objection in his mind was that the proposed action was clearly illegal, inasmuch as it is forbidden by law or naval regulation to assign a staff officer to command shins. It is only fair to staff side to state that this is debatable ground

and that it would not be difficult to construe the naval laws and regulations in either way. So it is not to be doubted that when the subject comes before congress for consideration the lawyers in that body will find material to support either contention.

Law in the Case.

Now that the legality of the president's proposed action in the matter of assigning a staff officer in the person of Surgeon Stokes to command the hospital ship Relief has been called in question, it is proper to state that the reliance of the line officers is upon a provision in section 7 of the naval personnel act of March 3, 1899. That section, among other things, was designed to clear up doubt that existed as to the right of a staff officer to assume the title of a line officer of a corresponding grade in the matter of pay and emoluments and length of service. Up to that date staff officers had enjoyed what was called "relative rank," with which they were not satisfied, so in section 7 the word "relative" was struck out, so that all sections of the revised statutes which, in defining the rank of officers or positions in the navy contained the words "relative rank" were amended so as to read "the rank of." To this provision the following important

jualification was attached: "But officers whose rank is so defined shall not be entitled, in virtue of their rank, to command in the line or in other staff corps."

Line officers understand this to mean that no surgeon or engineer (if there shall SAN JOSE, Cal., Dec. 26 -Bertram Somera ever be again commissioned engineers) or early this morning shot and instantly killed paymaster or constructor shall be placed his 5-year-old boy, having mistaken him for in a position on board ship where, he may a burglar. The child, it is believed, was command the movements and actions of walking in his alcep. The parents were any person not of his own staff corps. The staff officers for their part hold that staff officer and a careful perusal of the act appears to justify the statement that Somers is the son of Robert Somers a this provision is open to controversy and that there is a reasonable ground for a difference of opinion us to the meaning of the law. There were no developments to day in the controversy owing to the absence from Washington of the president.
