MR. HEARST'S SOFT PEDAL.

The political world, which knows William Randolph Hearst, editor of a chain of more or less sensational newspapers between New York and San Francisco, will have to sit up and take notice of a change which has apparently come over the spirit of the dreams of this stormy petrel of American journalism and politics. It is something of a gasp-producing proposition to find Mr. Hearst insisting that "all reforms should be made with as little disturbance of existing conditions as possible." Heretofore he has been wont to demand that the existing order of governments, empires and worlds be changed over night to suit his fancy. The west has not been disposed to label as a panic breeder any person who helped to expose corrupt conditions in order to apply the cure for it.

At the same time, the west does not demand a perpetual "policy of agitation."
