Charcoal is a remedy that the more you take of it the better; it is not a drug at all, but simply absorbs the gasses and impurities always present in the stomach and intestines and carries them out of the system.

Charcoal sweetens the breath after smoking, drinking or after eating onions and other odorous vegetables.

Charcoal effectually clears and improves the complexion, it whitens the teeth and further acts as a natural and eminently safe cathartic.

It absorbs the injurious gases which collect in the stomach and bowls; it disinfects the mouth and throat from the on of catarrh. All druggists sell charcoal in one form

Hence these reductions-this cut of one-third from the price of every article in our Omaha store.

A Splendid Opportunity to Feather Your Nest

Now, then, what is the effect of such constant, such insistent expression of his love for his native Scotland? In the first versaries.

Following is the essay which drew the prize out of 123 in the competition. A remarkable thing about it is that none of the Scotch chifdren in the public schools wrote as eloquently about the poet of their country or reasoned as clearly on the subject as the German hoy, Walter Berndes:

In pursuing the life and the works of Robert Burns the attention of even a careless reader is arrested by the peculiar quality of his patriotism. And to the interested student the question must arise as to what has been, what is, and what will be the effect on the world of such a patriotism on the part of such a man.

Let us consider the nature of the trait before following out its effects. To say micrely that Burns was intensely patriotic seems hardly to be doing him full justice. He did not only love his native land very flowed more gently, every brook murmured.
