Track Men Down to Work.

DES MOINES, Ia., Feb. 4.—(Special.)—Doc Pell's bunch of track men out at Drake university are hard at work on the preliminary indoor stunts the past week. Of the bunch of men who made the Grinnell team go their limit last year to win the coveted state meet, only three of the point winners will be absent when the bunch gets out on the cinders. Drake has an unusually hard schedule this year, and will meet the best teams west of the Mississippi river. Iowa will come to Des Moines in a dual meet, and probably a dual meet will be pulled off with Ames. Besides these, will be the state meet, the meet of the Missouri Valley conference, and the cream of the Drake team will be sent to the Big Eight meet in Chicago. Hazgard, in the pole vauit, will try out for the Olympic game, and if there are other men of his class in the squad, they also will be given a chance at the big svent. Captain Conoway, who broke the state record in the shot put last year, will probably be an extremely classy man this season. McCord and Whider will at least take points in the state meet. There is an abundance of green material to pick from, and a number of indoor meets will be held in the near future to give these men a chance to show their merits. 'Track Men Down to Work.

"This salt unites with albumen, and by the addition of oxygen creates nerve-fluid, or the grey matter of the brain. Of course, there is a trace of other salts and other organic matter in nerve-fluid, but potassium phosphate is the chief factor, and has the power within itself to attract, by its own law of affinity, all things needed to manufacture the elixir of life. Therefore, when nervous symptoms arise, due to the fact that the nerve-fluid has been exhausted from any cause, the phospsate of potasium is the only true remedy, because nothing else can possibly supply the deficiency.

"The ills arising from too rapidly consuming the grey matter of the brain cannot be overestimated.

"Phosphate of Potash is, to my mind, the most wonderful curative agent ever discovered by men, and the blessings it has already conferred on the human race are many. But 'what shall the harvest be' when physicians everywhere fully understand the part this wonderful salt plays in the process of life? It will do as much as can be done through physiology to make a heaven on earth.

"Let the overworked business man take it and go home good-tempered. Let the weary wife, nerves unsrung from attending sick children or entertaining company, take it and note how quickly the equilibrium will be restored and calm and reason assert her throne. No 'provings' are required here. We find this potassium salt largely predominates in nerve-fluid, and that a deficiency produces well-defined symptoms. The beginning and end/of the matter is to supply the lacking principle, and in molecular form, exactly as nature furnishes it in vegetables, fruits and grain. To supply deficiencies—this is the only law of cure."

Please observe that Phosphate of Potash is not properly of the drugshop variety but is best prepared by 'Old Mother Nature" and stored in the grains ready for use by mankind. Those who have been helped to better health by the use of Grape-Nuts are legion.

WISE CLERK Quits Sandwiches and Coffee for Lunch, The noon-day lunch for the Department elerks at Washington, is often a most ser-

ious question. "For fifteen years," writes one of these clerks, "I have been working in one of the Gov't. Departments. About two years ago I found myself every afternoon, with

a very tired feeling in my head, trying to get the day's work off of my desk. "I had heard of Grape-Nuts as a food for brain and nerve centres, so I began to eat it instead of my usual heavy breakfast, then for my lunch instead of sand-

wiches and coffee. "In a very short time the tired feeling in the head left me, and ever since then the afternoon's work has been done with as much ease and pleasure as the morn-

ing's work. "Grape-Nuts for two meals a day has worked, in my case, just as advertised, producing that reserve force and supply of energy that does not permit one to tire easily-so essential to the successful prosecution of one's life work." "There's a
