The young voters of Nebraska since 1896 have been many and they have largely turned away from the leadership as unsound.

Young voters certainly have a great stake in wise government. They are about to enter business, and as years run on will be called upon to carry its most serious responsibilities. Mistaken political policies will cost them dear. Years of business duliness and derangement give a poor re ward, yet add to the labor and anxieties. Young men must largely fill the armles and navies. Their careers are ahead, and they help to shape them by their ballots. South Carolina is as poor a pattern among the states as Senator Tillman is among statesman, or as one-party rule is in ar riving at an enlightened political judgment. No young man can afford to be politically fossilized for to chase fallacious public policies. Bad politics will strike him, no matter what field he chooses for his efforts to get on in the world. Mr. Bryan is a sensational talker. As a business or political adviser he is a failure. The world ls governed by facts, not by shifty eloquence, and the majority of the young men of the United States know it.

NEGRO'S STRUGGLE IN NORTH.

Fierce Competition in the Field of

Ray Stannard Baker in American Magazine In the south the negro still has the field of manual labor largely to himself, he is unsharpened by competition; but when he reaches the northern city, he not only finds the work different and more highly organized and specialized, but he finds that he must meet the fierce competition of half a doren eager, struggling, ambitious groups of foreigners, who are willing and able to work long hours at low pay in order to get a foothold. He has to meet often for the first time the Italian, the Russian Jew, the Slav, to say nothing of the white American laborer. He finds the pace set by competitive industry immensely harder than in nost parts of the south.

No life in the world, perhaps, requires as much in brain and muscle of all classes of men as that of the vast northern cities in the United States. I have talked with many colored workmen and I am convinced that not a few of them fail, not because of their color, nor because they are lazy (negroes in the north are for the most part hard workers-they must be, else they starve or freeze), but for simple lack of speed and skill; they haven't learned to keep the pace net by the white man.
