

A meeting will be held at the Young m. for the purpose of organizing a United Brethren class. All United Brethren and others, who are interested, are cordially invited to be present. The pastor will give a brief talk on the "Law of Increase, M. O. McLaughlin, pastor.

"Why Omaha Citizens Should Support. Omaha Churches" will be discussed at the First Methodist Episcopal church Sunday morning at 10:30 by the pastor, Rev. Frank L. Loveland.

Rev. Newman H. Burdick of the Second Presbyterian church is delivering a spe-

How to Stop Pimples

In Five Days You Can Get Rid of All Skin Eruptions by the New Calcium Sulphide Wafers.

Trial Fackage To Frove It Sent Free. tired going around with a pimply face day after day; and other people get nwfully tired, too, seeing them go around with faces full of disgusting pimples.

If you are one of the unfortunates who can't get away from your pimples and you have tried almost everything under heaven te get rid of them, take a few of Stuart's Caldium Wafers every day. Do that steadily for a few days and in less than a week look at yourself in the mirror.

You will then say that Stuart's Calcium Wafers are a wonder in getting rid of skin eruptions.

These wonderful little workers contain the most effective blood purifier ever discovered, calcium sulphide.

to No matter what your trouble is, whether pimples, blotches, blackheads, rash, tetter, ecsema or scabby crusts, you can selemnly depend upon Stuart's Calcium Wafers as never failing.

Stuart's Calcium Wafers have cured holls in three days and the worst cases of skin diseases in a week. Every particle of imparity is driven out of your system completely, never to return, and it is done without deranging your system in the slightest. Most treatments for the blood and for skin eruptions are miserably slow in their results, and besides many of them are poisonous. Stuari's Calcium Wafers conain no poison or drug of any kind; they are absolutely harmless and yet do work which cannot fall to surprise you.

Don't go around with a humiliating, disgusting mass of pimples and blackheads on your face. A face covered over with these disgusting things makes people turn away from you and breeds failure in your life work. Stop it. Read what an Iowa man said when he woke up one morning and found he had a new face:

"By George, I never saw anything like There I've been for three years trying to get rid of pimples and blackheads and guess I used everything under the sun. I used your Calcium Wafers for just seven days. This morning every blessed pimple is gone and I can't find a blackhead. I could write you a volume of thanks. I am so grateful to you."

Just send us your name and address in full today and we will send you a trial nackage of Stuart's Calcium Wafers free to test. After you have tried the sample and been convinced that all we say is true you will go to your nearest druggist and get a 50c box and be cured of your facial trouble. They are in tablet form and no trouble whatever to take. You go about 9 as educational director and assistant soc your work as usual and there you arecured and happy.

Send us your name and address today and we will at once send you by mail a sample are invited. package free. Address F. A. Stuart Co.,

VITAL PROBLEM FOR THE FARMER

Prof. Holden Also Preaches Gospel of Good Seed and What it Means to the Greatest Industry of America.

Making the startling statement that the of the seed corn the last week of Sepvalue each year of the corn crop in the tember or the first week of October. United States is twice that of cotton and The sound, full cars should be hung up equal to the combined value of the wheat, in a dry, airy garret and then during oats, barley and rye crops and of the total the fore part of March sort out the very value of live stock, including horses, cat- best ears and extract kernels from varitle, sheep and mules, E. D. Funk of ous sections of the cars, planting them Bloomington, Ill., president of the National in a germinating box, marking the Box Corn association, impressed forcibly on his off into squares and numbering the hearers at a meeting in the Board of Trade squares to correspond with the ears from which the kernels are taken. After eight rooms Friday evening that corn is indeed days it can be seen what ears are fertile king. He talked onthusiastically and enand what barren. Thus in a week's time thused his hearers with the gospel he the farmer has saved the labor of a year preaches, and Omaha's national corn exby satisfying himself before seed time position was given a grand boost. whether his corn will grow or not.

"The greatest part of our wealth lies in the soil and the great study of today is to get the wealth out of the soll and retain the fertility and save it for future genera- cause for a poor stand of corn is poor tions," said Mr. Funk,

"The soil is our bank account, if we draw issue these four orders first thing: Tost out our account, if we draw out the fertilevery car of seed corn, grade every car, ity, and don't put it back we will soon be reject the inferior ears and harvest the bankrupt. It costs \$12 in fertility to produce one ton of corn. If we take that 312 seed corn at the proper time.

out of the soil entirely and do not put it "Nothing is so vitally important as back the land will soon be worthless. To agriculture, but to get the people input that fertility back we must either buy fertilizers or keep the corn on the place terested in this most vital problem we and by feeding it to stock retain the ferfoot than a high instep. It matters not tility. I do not sell a bushel of corn off how small a foot may be, if it looks flat my farm except for seed, I wouldn't think it is sure to be ugly. There is no exercise selling it otherwise. will ever be written-the history of King

that will have any material effect in en-"Corn breeding should be the study larging the instep, for it is entirely a the hour, and to perfect this study we question of the build of the arch of the must have expositions where samples can foot. However, no matter how flat a girl's be shown and corn be talked and all be foot may be, if it is incased in a highprofited. And so in this national corn heeled slipper the effect will be fairly good, exposition which is to be held in Omaha but in a high boot the conditions are quite we are all interested; we are asked to come here and we want to come and be For these unfortunates it is a suggestion one of you, and we will be as proud of the that they should pad their instep by sewsuccess of the exposition as you will be. ing a little cotton wadding on the tongue

Corn Indeed King.

of the laced boot, thus making an arti "Corn is indeed king, but the only way ficial arch. It is a curious thing that no o perfect his kingdom is to hold expaimatter how large the foot may be, if it is arched in the proper way it will look about four sizes smaller: therefore, surely the girl who pads her intep or uses artificial means for gaining the effect of a good arch has a good excuse. The girl who uses If the increase had been as great th's state this method should be really very careful would have produced 40,000,000 bushels more that her foot has not already a pretty than it did and the farmers of Nebraska

tions. Illinois last year showed an annual increase of yield of corn per acre of five pushels, or 45,000,000 extra bushels of corn from its 9,000,000 acres planted. Nebras'sa had 7.893,000 acres planted to corn last year. raises it, declaring that the time had

arch, for if she should add padding to the natural instep the result will closely

resemble a deformity. The artificial pad is made of three layers of cotton batting about three inches long and two inches wide. This is inclosed in a bag of muslin and sown on the tongue of the shoe just above the vamp. If this should prove too thick, it could be reduced to one or two layers of batting When wearing a pad see that it is renewed often, so that it will not get flat, for with a flat instep one day and a large arch the next one might cause comment among one's friends.

Naming the Zones.

The semi-annual examinations were held at a well known upper West Side psivate school the other day and while inspecting the papers the teachers found many hu-morous answers to some of the questions. A class of boys averaging about 12 years of age had been preceded the day before by grammar. by grammar. Among the questions in the geography paper was the follow:

Name the zones. One promising youth of 11 years wrote this answer:

"There are two zones, masculine and feminine. The masculine is either tem-parate or intemperate; the faminine is either torrid or frigid."--New York Sun.

He was born in Chicago in 1859, and be- E. D. Funk of Bloomington, Ill., Talks has been seventy bushels to the acre, Labor Union went on record as opposed to His family own 28,000 acres of land valued at \$200 an acre. Land imdont. mediately adjoining is valued at \$115 an
