

This Week the Automobile Has the Right of Way Over Everything in Omaha Sporting Circles

CAME WITH WABASH CERTAIN

Indiana College to Play Cornhuskers Thanksgiving Day.

MAY COME WITH IT TO OMAHA

Depends Whether University Secures New Athletic Field—Chance of Contest with Michigan Eleven.

LINCOLN, March 14.—(Special.)—The athletic management of the University of Nebraska signed a contract with Wabash college of Crawfordsville, Ind., yesterday for a foot ball game to be played between the Cornhuskers and Little Giants on Thanksgiving day this year. If an athletic field is secured for the Cornhuskers by that date the game will be played in Lincoln; otherwise it will be transferred to Omaha.

The Nebraska-Wabash game is looked upon as the greatest contest scheduled for Lincoln since Minnesota played here in 1906. The Cornhusker athletic authorities expect it will be one of the most important games played in the Missouri valley next fall. Wabash last November gave St. Louis university—the school that defeated Nebraska on Thanksgiving day—the first defeat it had suffered in two years, and by that achievement won the premier football honors of the west outside of the Big Nine. The score of the Wabash-St. Louis game was 12 to 10 and that of the Nebraska-St. Louis contest was 21 to 0. These scores are not taken as showing the relative strength of Nebraska and Wabash, for it is admitted that the Indiana eleven played St. Louis under much more favorable conditions than did the Cornhuskers. In the Wabash-St. Louis game the Indiana players were in tip-top form, while Coachmen's team was without the services of Quarrierback Acker, who wrought such havoc to the Cornhuskers a few weeks later and whom Coachmen said "was the whole team." Schneider, the great line backer of the St. Louis eleven, also was out of the game. In the Nebraska-St. Louis game Coachmen presented the strongest lineup of the season.

Cornhuskers Handicapped. The Cornhuskers, on the other hand, were greatly handicapped by the loss of two stars, Ewing, who was out on account of being delinquent in his studies, and Chaloupka, who because of his injuries was unable to play in the Thanksgiving game. Wabash is given much credit for the victory over the Mound City team, but it is believed that had the Cornhuskers met the Indiana men the game between them would have been a great struggle, with honors about even. The Nebraska-Wabash game, which has just been closed, were carried on for several months by the foot ball managers of the two institutions. The Hoosiers were willing to come west to play, but they were not pleased with the offer made by the Cornhuskers and delayed closing up the contract. The Cornhuskers, although desiring to bring the managers of St. Louis west in the fall, demanded liberal terms and concessions. Several other schools wanted to fill the Thanksgiving day date in the Nebraska schedule and the Cornhusker management did not need to worry about getting a game. The negotiations dragged along until the week when the Hoosiers, realizing that the Cornhusker management would not recede from the position taken early in proceedings, notified Manager Eager that they were ready to accept the Nebraska offer. After this notice was received at Lincoln the signing of the contract was only the matter of a few days.

Wabash Favors Omaha. One point in the disagreement which held up the arrangements for the game was the fixing of a place to hold the contest. The Wabash authorities always were willing to send their eleven west next fall, but they wanted to play Nebraska in Omaha, and not in Lincoln. They believed that the game if played in Omaha would be much better for their treasury than if it were pulled off in Lincoln. When negotiations for the game were first opened the proposition made by Wabash for playing it in Omaha met with favor at Nebraska, for the Cornhuskers were planning to play Wabash in the Capital City on November 21, the Saturday before Thanksgiving, and did not want the Wabash contest to follow in Lincoln within less than a week. The Nebraska authorities knew that two big games would not pay if played in Lincoln in succeeding weeks and said they were willing to meet Wabash in Omaha on Thanksgiving, but that final action would have to be postponed until the Wisconsin game was contracted. When the Badgers failed to give the Cornhuskers a game, and scheduled a contest with Chicago for November 21 instead, the Nebraska students entered a strong protest against playing the Thanksgiving day game in Omaha. The Nebraska management was forced by the strong student sentiment either to schedule the Wabash game for Lincoln or to make arrangements with some other team to play the Thanksgiving day contest in this city.

Man's Latest Triumph in Overcoming Natural Limitations

TYPE OF THE AUTOMOBILE SO FAMILIAR NOW ON CITY STREETS.

GOUGHAM LOOKS FOR LEADERS

New York Fans Expect Both Teams to Be Up in the Pennant Race.

NEW YORK, March 14.—Leading baseball men all over the country are making predictions just now as to the way the team will finish in the American and National league pennant races. New York fans have received assurance from both Clark Griffith and John McGraw that there will be plenty of fine ball to be seen in Harlan this season. It is the consensus of opinion that the New York Americans have a better chance to win a championship than the New York Nationals, for the reason that the Chicago Cubs are expected to retain their present laurels. Griffith has been induced to play this part of a prophet and in an interview given out at Hot Springs he says in his opinion the Detroit will finish first once more, while the New Yorks will be close behind, followed by Cleveland, Chicago, Philadelphia, St. Louis, Boston and Washington in the order named.

Fleider Jones, the competent leader of the White Sox, says that Griffith's reconstructed team will prove the fastest in either of the big leagues and will surely win out with the Sox and Detroit the runners-up. Hugh Jennings, manager of the Detroit, declares that his team will play up to last year's standard but that he fears the New Yorks more than any other team in the American league. Connie Mack, manager of the Philadelphia Athletics, expresses the opinion that the race for the pennant will be closer than ever before and that New York will be at or very near the top from start to finish. Jim McGuire, manager of the Boston Americans, declares that the Detroit, Chicago and New York teams will fight it out for the flag. Manager McAleer of the St. Louis Browns thinks his own team is worth a good bet and picks Detroit, Chicago, New York and Philadelphia as the most dangerous factors. Napoleon Lajoie, leader of the Cleveland, is confident that his men will carry off the honors this time and expects Detroit, New York and Philadelphia to be in the thick of the fight at all stages. All of these managers in discussing the chances of the New York team say that Griffith will have a strong pitching department with Glade, Orth, Chesbro, Hog, Doyle, Newton, Lake and Neuer to draw from, and that the team, outside of the batteries, will prove fast in base running and fielding, also effective with the bat. In a word, these critics unite in the opinion that New York has championship material and that it is up to Griffith to exact the necessary managerial skill.

TO TAME THE BASKET BALL GAME

Rules to Retard Roughness Are Under Consideration.

NEW YORK, March 14.—The roughness and "slugging" which has characterized basket ball this year among the colleges has caused comment among the authorities, and it is a change is not made next year there is a possibility of the faculties interfering and stopping the game. At New Haven there has been a good deal of discussion among the members of the faculty over the roughness of recent contests, especially in the recent game between Yale and Columbia, in which several of the players lost their tempers and indulged in slugging. It is undoubted that the faculty will interfere, and the members of the basket ball squad told that a repetition of such scenes as those of this year will result in the abolition of the game. The Yale athletic authorities have decided to move liberal in the awards of the varsity letter, and in the future the winners of the individual championships will be golf, lawn tennis and gymnastics will be allowed to wear the "Y."

BILLIARDS GET ANOTHER BOOST

French Champion's Arrival Helps Game in New York.

NEW YORK, March 14.—The arrival of Firmin Chassignol, champion billiardist of France, will give professional billiards a much needed boost. The absence of foreign players this year has made matters very dull with the knights of the cue, but a revival of interest will follow the arrival of the French champion. He will remain in this country about six months and during that time will play championship matches with Willie Hoppe, Jake Schaefer, George Sutton, George Blossom, Ora Morang and A. H. Cutler, in addition to taking part in an international professional tournament. Chassignol is acknowledged to be the peer of Vignaux and all the foreign players.

O'NEIL ORDERS PA'S FLAG

Pennant Will Be Unfurled at Vinton Park April 23.

DIFFICULT TO GET EXHIBITIONS

Papa Rourke is Now Sending Out Transportation and Expects All His Children to Come Into the Field.

President Norris O'Neil of the Western league has notified Pa Rourke that he has ordered the pennant which will be unfurled at Vinton street park on the opening Omaha date of the season, April 23. He writes that the pennant will be on hand April 19, far enough ahead to insure no delay for the big day. The pennant is ordered through the Walter G. Clark sporting goods house and is said to be a beauty, being paid for by the entire league. Exhibition games are hard to get this year because of the early opening of the league season. Topeka had arranged to play in Omaha April 18 and 19, but the early opening shots out these dates. The Leeglass-Andersen Originals will open the season at Omaha as usual, the dates being Saturday and Sunday, March 28 and 29. The second bunch of the White Sox will be along for three games, April 3, 4 and 5. Pa is having a correspondence with Ducky Holmes in reference to two games with Sioux City, April 11 and 12. Holmes has the dates already filled, but says he prefers to play in Omaha and will try to arrange accordingly. Pa Rourke also tried to get a couple of games with the Putzberg Pirates, but Manager Clarke refused to come further north than Kansas City. Home Guard Training. The home guard of the Champions is working out daily at the park under the guidance of Johnny Goding, who has given up his position of guardian of Pea smokes and taken up active training for the season. Goding, Dolan, George Clarke, Orry Shannon, Williams and several others journey to the park every afternoon. Transportation has already been sent to the players who are wintering in California and to those who live in the far east, and it will be sent to all the stars of the league. Some of the players who have been holding out for additional salaries have come into the fold, notably Austin, who had his salary voluntarily raised by Manager Rourke, but who still insisted upon having more money. Graham is still holding out, although his salary has been raised. He is expected to come back soon. One or two others are demanding more money, but Pa expects them all to be on hand when reporting day comes.

LANDERS DIDN'T LIKE THE EAST

California Boxer at Home and Fall of Fight Talk.

SAN FRANCISCO, March 14.—Fred Landers, who has been boxing throughout the east for the last six months, has returned to this city and is prepared to box any lightweight on the coast. While away Fred engaged in five contests, the bouts being with Willie Fitzgerald (twice), Willie Moody, Jimmy Bonner and young Donk. He did not meet with a reverse and made quite a hit with the eastern fight fans by his clever milling. Fred said there was not much money in the game east, but that a fighter could get plenty of good matches once he got in right. Fred stated that he found young Donk an exceedingly clever fighter and one who will make any of the lightweights now fighting go some to beat him. "He is a wonderfully clever fellow," said Landers. "In our fight he had me puzzled in the first two rounds with his left hand, but I got wise to it and in the remaining four rounds he was in an uproar, our fight was so fast. "I boxed with Papke, the middleweight, and also saw him fight," continued Fred. "He is certainly a great fighter and should be given consideration by all fight fans. He has a style of his own and it is a hard one to solve. He punches like a heavy-weight and it takes a little more of the experience he will eventually reach the top of his class. He has only been fighting a couple of years and in that time has defeated the best they have in the east, knocking most of his men out. "I want to show you one night to see young Corbett and a few more boys," said Fred. "and it was a pitiful thing to see. Corbett was hog fat and dreadfully slow. He was only a shadow of his former speedy style. In McGovern I was surprised. He says he wants to fight again. Well, it would be a shame to put him on. He seems to act as though he had the St. Vitus dance, he trembles so much. But at that the two are picking up some coin. They are very popular east." Landers stated that he would like to get a crack at either Britt or Nelson.

MIDDIES NOT IN HUDSON REGATTA

Rules Will Not Allow Navy Crew to Row at Poughkeepsie.

NEW YORK, March 14.—All the crews which will row on June 27 in the intercollegiate regatta at Poughkeepsie this year, with the exception of Annapolis, have entered, and the latter institution may be there, provided the authorities of the Naval academy permit the crew to appear. The association sent out the invitations as usual this year to the crews and required an answer by March 1. These answers are all in and Cornell, Columbia, Pennsylvania and Syracuse have signified their intention of competing in the "varsity" regatta, "varsity" four and freshmen eights. Wisconsin will row in the "varsity" freshmen eights and Georgetown in the "varsity" eights, making fifteen crews in all. The response of the Naval academy was as follows: "The Annapolis Naval academy, while appreciating the courtesy in extending the invitation to row in the regatta, has declined such invitation, owing to the policy of the academy not to send an athletic team to compete in outside regatta, except against teams from the West Point Military academy, on account of the interference caused thereby with the academic work and the drills of the institution."

EIGHT GAMES FOR MICHIGAN TEAM

Athletic Board Gives Foot Ball Director Wide Discretion.

DERBOTH, Mich., March 14.—The Board of Athletic Control of the University of Michigan in Ann Arbor has voted in favor of allowing Graduate Director of Athletics Charles Baird to schedule either seven or eight games of foot ball next fall, at his discretion.

IRISH-AMERICAN LEADS ALL

Athletic Club Scores Most Points as Result of Track and Field Meets Last Year.

NEW YORK, March 14.—With the great total of 1,204 points the Irish-American Athletic club led the world in the number of points scored in track and field meets during the season of 1907, and the wearers of the winged fist will be proud of their brilliant record as shown in the report of the athletic committee. Fourteen records, including indoor and outdoor, American and World's fell to the prowess of the red-blooded youths who sport the green and white and the splendid total of forty-two championships was annexed. By winning 23 first, 128 seconds and 123 thirds, scored on the basis of five, three and one, respectively, the winged fist team rolled up its 1,204 points, 300 tallies more than their nearest competitor, the New York Athletic club. The Celtic park contingent developed seventy-point winners and the Travers islanders sixty-eight. A Martin Sheridan of the Irish-Americans captured the individual point honors. The all-around champion scored 124 points, forty-eight of which were made in championship competition. Melvin Sheppard of the Irish-Americans stands second in the individual points column, with a total of 118 points. The great mid-distance runner earned thirty-six points in championship competition. Sheridan's total is the greatest on record, far surpassing any previous showing. The aggregate of Sheridan and Sheppard is the greatest two-man score in the history of athletics.

Nine national senior championships, eleven national junior, six national indoor, five metropolitan senior, seven metropolitan junior, three Canadian and one cross country championship fell before the onslaught of the winged fist athletes last year, and the Irish-Americans captured the titles in the senior national championships, held at Jamestown, the senior metropolitan at Travers island, and the national cross country championship in Celtic park. Martin Sheridan won the national all-around championship. The Irish-American Athletic club led the New York Athletic club in the struggle for the junior metropolitan championships, notwithstanding the fact that the winged fist entry list was considerably smaller than the mercury footers. The Celtic park contingent also won second honors in the junior national championships and captured second laurels in the national indoor championships.

LANDERS DIDN'T LIKE THE EAST

California Boxer at Home and Fall of Fight Talk.

SAN FRANCISCO, March 14.—Fred Landers, who has been boxing throughout the east for the last six months, has returned to this city and is prepared to box any lightweight on the coast. While away Fred engaged in five contests, the bouts being with Willie Fitzgerald (twice), Willie Moody, Jimmy Bonner and young Donk. He did not meet with a reverse and made quite a hit with the eastern fight fans by his clever milling. Fred said there was not much money in the game east, but that a fighter could get plenty of good matches once he got in right. Fred stated that he found young Donk an exceedingly clever fighter and one who will make any of the lightweights now fighting go some to beat him. "He is a wonderfully clever fellow," said Landers. "In our fight he had me puzzled in the first two rounds with his left hand, but I got wise to it and in the remaining four rounds he was in an uproar, our fight was so fast. "I boxed with Papke, the middleweight, and also saw him fight," continued Fred. "He is certainly a great fighter and should be given consideration by all fight fans. He has a style of his own and it is a hard one to solve. He punches like a heavy-weight and it takes a little more of the experience he will eventually reach the top of his class. He has only been fighting a couple of years and in that time has defeated the best they have in the east, knocking most of his men out. "I want to show you one night to see young Corbett and a few more boys," said Fred. "and it was a pitiful thing to see. Corbett was hog fat and dreadfully slow. He was only a shadow of his former speedy style. In McGovern I was surprised. He says he wants to fight again. Well, it would be a shame to put him on. He seems to act as though he had the St. Vitus dance, he trembles so much. But at that the two are picking up some coin. They are very popular east." Landers stated that he would like to get a crack at either Britt or Nelson.

ONE SIZE FOR AUTO PARTS

Standardization of Yokes, Rods and Levers Aimed At by Makers.

INTERCHANGEABILITY DESIRABLE

Mechanical Branch of Licensed Automobile Manufacturers' Association Holds an Important Meeting in New York City.

NEW YORK, March 14.—The meeting of the mechanical branch of the Association of Licensed Automobile Manufacturers, held Tuesday, was one of the most interesting meetings of the branch held since its organization. It being the first meeting held this year, many subjects, which special committees have been experimenting on and investigating in, were reported and papers read to the members. A special committee appointed to work with the test committee toward the standardization of rod and yoke ends, made an elaborate report on what it considered the proper sizes for the standardization of these important parts of construction. Standards for 3-8, 5-16, 1-2 and 7-16 rods were adopted and will be known as the Association of Licensed Automobile Manufacturers' standard adjustable rod and yoke ends. Nearly every manufacturer of American automobiles is at the present time using various sizes of rods and yoke ends, and it was found that there was considerable confusion in getting the proper sizes for immediate delivery. With the adoption of this standard, the manufacturers of rods and yoke ends will carry in stock a full line of the standards adopted, so that users of the sizes which have been adopted may be able to buy in the open market such sizes necessary. This is of particular benefit to the user, as the parts will be interchangeable, and the rods of one car will do for another.

Levers of One Type.

Another important standardization was that of levers. Various weights and sizes of levers have been used with a considerable expense to those automobile manufacturers who do not have drop forging plants. Owing to their inability to buy stock levers, they must necessarily buy the dies from which these forgings were made and with the changing of the type or weight of the lever, new dies, at an increased expense, are necessary. After careful consideration the branch adopted a uniform modified I beam lever, which the drop forge makers will carry in stock, making these levers interchangeable.

Alcohol as Fuel.

At the afternoon session Dr. Charles Edward Lucke of Columbia university, who has been making some very exhaustive tests with alcohol as a fuel for internal combustion engines, delivered an address to the branch. Dr. Lucke's remarks were principally in making comparisons in the tests he had made with the use of alcohol for gas engines for locomotion as compared to those for stationary use. He pointed out clearly that the branch is not to be taken as a fuel for internal combustion engines, delivered an address to the branch. Dr. Lucke's remarks were principally in making comparisons in the tests he had made with the use of alcohol for gas engines for locomotion as compared to those for stationary use. He pointed out clearly that the branch is not to be taken as a fuel for internal combustion engines, delivered an address to the branch. Dr. Lucke's remarks were principally in making comparisons in the tests he had made with the use of alcohol for gas engines for locomotion as compared to those for stationary use. He pointed out clearly that the branch is not to be taken as a fuel for internal combustion engines, delivered an address to the branch. Dr. Lucke's remarks were principally in making comparisons in the tests he had made with the use of alcohol for gas engines for locomotion as compared to those for stationary use. He pointed out clearly that the branch is not to be taken as a fuel for internal combustion engines, delivered an address to the branch.
