NEW YORK STOCKS AND BONDS

Current of Market Changes So Often that Speculators Are Confused.

UNION PACIFIC LEADS ADVANCE

Steel Issues Become Heavy and Adversely Affect the Market—Rally on Bank Statement—Market Close Strong.

NEW YORK, March 27.—Prices moved continuously in today's stock market, but the course of the movement changed so often as to leave speculative sentiment thoroughly confused.

The action of Union Pacific had an important influence on the whole list, for sympathy and reaction were created by yesterday's announcement of a coming issue.

The completions of the weekly currency movement showed that the return of 200,000,000 was going on unintermittently.

With the large payments made to the sub-treasury on account of the return of 200,000,000, the government deposits had been reduced to 1,000,000,000.

It is not supposed that the United States treasury will be able to avoid further calls on depositors.

The current deficit in the revenues necessitates the paying out of its available cash balance. These payments in excess of the current income, however, obviously operate to return sums to the channels of the money market.

The government's operations, in fact, are not interfering with the latter's activity. The money conditions, confidence in continued ease of money is expressed among stock exchange members.
