CHICAGO, April 3.—An official forecast of rain for Kansas, Nebraska and Missouri weakened today in the local wheat market, the May delivery closing at a net loss of 1/2c.

The wheat market was inclined to be more of a steady day. There was a little show of strength at the start, owing to an advance at Liverpool, but the price soon weakened.

Local receipts were weak throughout the session, owing to liberal realizing by holders and selling by commission houses.

Freezing temperatures, with generally clear weather, are reported throughout the corn and wheat region this morning.
