CLOSING PRICES ARE HIGHER

Report of Fewer Idle Cars and Foreeast of Bank Statement Produce Good Impression Late in Day.

NEW YORK, April 4.—The stock market today did little more than mark time in accordance with the evident purpose to refrain from extensive commitments until the Eris problem is cleared up by formal announcement. No news were forthcoming on that topic during the short stock exchange session, but opinion was inclined to look for the avoidance of a receivership. There was an impression that the differences at issue concerned the terms to be made with the holders of the notes maturing April 5 and that some manuevering for advantage in these terms was involved. There was some signs in a few issues of a little slow liquidation, especially in the copper securities, but support was accorded the market and no serious inroads on prices resulted. United States Steel was firm and the resistance of this stock to pressure in contrast with its heaviness during the week had some sympathetic effect on the selling list. The inference was suggested that much of the week's selling list must have come from professional sources, having short contracts to be covered. The weekly reviews of the mercantile agencies were scanned with interest, but offered no very scanned with interest contracts to be covered.

come from professional sources, having short contracts to be covered. The weekly reviews of the mercantile agencies were scanned with interest, but offered no very enthusiastic account of conditions.

The late improvement in prices of stocks today followed an intimation that the bank statement might not show so heavy gains as preliminaries had indicated. A good effect was produced by the American Railway association in the figures of the number of idle freight cars, which was decreased considerably. Rumors of an Bric settlement helped the closing. The cash gain disclosed by the bank statement was smaller than the preliminary estimates had shown, but the discrepancy was less in the statement of actual conditions on Friday night than in the statement of averages. The loan expansion is attributed to arrangements for financing the quarterly settlement on the first of the month.

Bonds were steady and dull. Total sales, par value, F33,000. United States bonds were unchanged on call for the week.

anything would bring over \$6.50 at the close of the week, however good it might be.
Cows and helfers declined along with beef steers, the average loss being about 25c on that kind of cattle. The best grades

but still the demand was sufficiently good to clean up everything at prices very nearly as good as those which prevailed earlier. The market might possibly be quoted as closing a little easier. The bulk of the hogs went at \$5.7065.75. With a top at \$5.85. Yesterday the most of the bogs sold at \$5.6506.70, with a top at \$5.75. Everything in the yards was sold by 19 o'clock in the morning.

the yards was sold by 10 o'clock in the morning.

The receipts of hogs this week show very little change as compared with last week, so far as the number is concerned, but a considerable gain as compared with the corresponding week of a year ago. The market throughout the week has been wild and erratic, showing rapid fluctuations, both up and down. Thus, during the first two days of the week, there was an advance of 25030c. On Wednesday there was a drop of nearly 10c, which was fully recovered on Thursday. Friday's market declined about 12½c, while today's market was higher. After all the ups and downs, the week closes with market 200 25c higher than it was at the close of last week, or just \$1.00 higher than it was two weeks ago.

ORANGES-Extra fancy, 80 to 96 size, Cows and hefers declined along with beef steers, the average loss being about 25c on that kind of cattle. The best grades possibly do not show as much decline, the heaviest loss being on the medium kinds. Common canners also escaped with less decline, for the reason that they have not advanced to any extent.

Strictly good feeders sold about as high as any time. In fact, \$5.35 was paid for one strictly choice load of feeding cattle. On the other hand, the sharp decline in beef steers has made medium grades of feeders very weak and generally a little lower, while stockers have been extremely slow sale, with the fair to common kinds as much at 25500 lower.
