the payment of those bonds? What him of tax can it levy to pay interest on the bonds?

There will, of course, be a revenue derived from the operation of the plant, the amount of which will depend upon the number of consumers, the rates to be charged and the expense of operating it.

What the revenue will be should not be left to speculation, for if no other method is available that can be fairly ascertained without much expense by a canvass of the patrons of the old company. The expense of operating the plant and the sum necessary to keep it in repair and up to date can be ascertained from persons skilled in that work. And the rates to be charged should be made known to the public. In considering the contract and cost of the plant you should not overlook the fact that during the period for the construction of the plant and before there can be any revenue from its operation, if bonds are to be issued, some means will have to be found for the payment of the annual interest upon them.

While I have the utmost confidence in our city engineer, it is no reflection upon him to say that in my judgment the plans prepared by him should be reviewed by an engineer having years of practical experience in that particular line of engineering.

We Know How

Please learn what a difference there is in baked beans, and what makes it

First the beans. We pay \$2.10 per bushel for ours, to get the choicest Michigan beans. Some sell for 30 cents. We get only the whitest, the plumpest, the fullest-grown. Then the tomato sauce. We could buy sauce ready made for exactly one-fifth what ours costs to make. But we use only vine-ripened tomatoes.

We have spent 47 years in learning how best to prepare these beans

We cook in live steam, so the beans are not browned, not broken. They are baked until mealy, yet they are nutty Our ovens are heated to 245 degrees, so the fibre is broken down, and the beans are digestible.

The beans, the tomato sauce and the pork are all baked together. Thus we get our delicious blend.

Van Camp's pork and beans baked with tomato sauce

Compare them with home-cooked beans. Home beans are heavy and hard to digest, because you lack the facilities to apply the needed heat. Some are baked to a crisp; some are less than half

And if you ever compare Van Camp's with other brands you will see why we advertise.

Beans are 84 per cent nutriment. They are Nature's choicest food

Beans form one of the cheapest foods, compared with their food value. And one of the very best. Then why not serve the best beans, so that your people

will want them more frequently? And why not carry a dozen cans in the house? Then you have a hearty, delicious meal always ready.

10, 15 and 20# per can.
