Bank Clearings for April

A larger volume of payments through the banks at some leading cities in the West indicate further slight improvement in that section, but in other sections of the country the large loss of bank clearings in April denotes continued restriction in bank settlements, total exchanges for that month at all cities in the United States, as reported by R. G. DUN & Co., being \$9,743,135,263, a decrease of 32.9 per cent. compared with a year ago and 24.5 per cent. compared with April, 1906. The loss at New York City, due in large measure to the reduced volume of operations in the speculative markets and to the lower security values, still overshadows the loss in other sections, though it is heavy at most New England, Middle Atlantic, South Atlantic and Pacific coast points. The small loss at Chicago, compared with a year ago, shows that the volume of payments through the banks at that important city are again nearly as large as the heavy total in 1907, while in the comparison with 1906 there is an increase. At a number of cities west of Chicago there are considerable gains over 1907, notably at Kansas City, while at St. Paul the loss is very small; likewise at Detroit, Milwaukee and Indianapolis. The reports from Philadelphia, Pittsburg and other leading iron centers indicate little improvement in that important industry, and at the South, conditions are far from satisfactory, the loss at Baltimore, Richmond, Atlanta and New Orleans being quite heavy, though it is small at St. Louis, Memphis and Chattanooga. The April statement is little better than for the preceding months this year, as shown by the average daily figures for the year to date, the loss being heavy in each month. Comparison is made below of bank exchanges by sections covering three years; also the average daily figures for the year to date :

In the Far West the improvement is again quite marked and Eanass City and one or two smaller cities report a considerable increase. There is also a gain at Cedar Rapids and Denver, while the loss at St. Paul is very small. Nearly all cities in this section report gains over April, 1906. The figures in detail follow :
