HEALS .J. OLD SORES The deep, underlying cause of every old sore is a bad condition of the

blocd. This vital fluid has become infected with some germ or poison which prevents the place from healing. This infection may be the result of an inactive, sluggish condition of the system leaving the refuse matter of the body to be absorbed into the circulation instead of throwing it off through the usual channels of nature. Another cause is the weakening or polluting of this lifestream from hereditary taints, or from the effects of a long spell of sickness, leaving disease germs in the system. When the blood is in this condition a sore cannot heal because the impurities with which the circulation is filled are being constantly discharged into the place to irritate and inflame the tissues and further disease the surrounding flesh. The only treatment that can do any good is one that removes the cause, and for this purpose nothing equals S. S. S. It begins at the fountain head of the trouble and drives out all germs, impurities and poisons, and then the place, being supplied with rich, pure blood, heals naturally and permanently. Local applications assist in cleansing the place, but a cure cin only be effected through a purification of the blood. Book on Sores and Ulcers and any medical advice free.
